OVERVIEW
Vanderbilt University Medical Center has built a strong reputation as a leader in medical education, research and patient care throughout the Southeast and the nation over the course of its 135-year history. At its heart the Vanderbilt Medical Center is driven by discovery and the immediate incorporation of new knowledge into innovation in patient care and physician and nurse education.

MEDICAL EDUCATION
The School of Medicine, originally having shared faculty with the University of Nashville, awarded its first Vanderbilt medical degrees in 1875. Since the early days, a Vanderbilt medical education has been held in high esteem among its peer institutions, and that legacy continues.

The School of Medicine attracts the most accomplished and talented students in the country. They are drawn by the quality of the training, the excellence of the faculty, the collegial atmosphere between faculty and students and the close personal attention that students receive. The diverse first-year class of 2012, selected from a pool of 5,032 applicants, represents 24 states and undergraduate degrees from 51 different colleges and universities. The School of Medicine placed 16th among 125 medical schools in U.S. News & World Report’s 2008 survey, “America’s Best Graduate Schools.”

NURSING EDUCATION
The School of Nursing, founded in 1908, was one of the nation’s first nursing programs to incorporate its curriculum into a liberal arts degree. It enters its centenary decade as one of the country’s premier nursing schools, listed among the Top 20 by U.S. News & World Report. The School offers a master’s program with an accredited baccalaureate equivalent or “bridge” (pre-licensure) curriculum component. This approach enables students from diverse backgrounds, who are not nurses or do not have a B.S.N., to enter master’s level study and prepare for careers in advanced practice nursing. The innovative “bridge” program has served as a model for many other such programs across the country. The Ph.D. program established in 1993 was enhanced in 2006 by the addition of the Health Services Research Track – the first in the country in a school of Nursing. The new Doctorate of Nursing Practice (D.N.P.) was launched in Fall 2008. All of our doctoral programs (and many of the majors in our M.S.N.) have a significant distance learning component.

RESEARCH
Biomedical research at Vanderbilt has long been recognized for its contributions to the advancement of medicine. The School of Medicine claims two Nobel Laureates, Earl W. Sutherland Jr., in 1971, for his discovery of the metabolic regulating compound cyclic AMP, and Stanley Cohen, in 1986, for his discovery (with a colleague) of epidermal growth factor. The Medical School’s reputation for outstanding research is reflected in the amount of federal and private support it receives. Because of the creativity of the faculty, the School of Medicine ranked No. 10 among U.S. medical schools for NIH funding for federal fiscal year 2007. VUMC research funding from all sources has doubled since 2001. Support for competitive research grants from all external sources has grown continually to more than $417 million for fiscal year 2008. In addition, five School of Medicine departments ranked in the top ten nationwide in scholarly output in 2006-07, calculated in terms of faculty publications, citations, awards and grants. Major translational research initiatives at Vanderbilt are moving discoveries from the bench to the bedside and will transform health care and health care delivery.

At the School of Nursing, faculty engage in research aimed at improving the lives of individuals, families and communities. Faculty researchers collaborate with investigators from across the Medical Center, University and the world. School of Nursing researchers accomplish their mission through studies that emphasize clinical and health services intervention.

Examples of the challenges include those related to the health workforce, quality and safety across the health care
system, prevention and treatment of lymphadema, congestive heart failure symptom management, premature births, child health, death and dying, and acute and chronic pain. The School prepares future researchers primarily through its Ph.D. and post-doctoral education programs.

**PATIENT CARE**

In 2008, the Vanderbilt clinics had over 1,179,000 patient visits, and more than 51,800 patients were admitted to the Vanderbilt hospitals. A principal referral center for physicians and patients throughout the region, Vanderbilt University Hospital and the Vanderbilt clinics consistently rank among the premier health-care facilities in the United States. Vanderbilt University Hospital and the Monroe Carell Jr. Children’s Hospital at Vanderbilt are two of only three Tennessee hospitals included on the list of “America's Best Hospitals” compiled by *U.S. News & World Report* magazine. VUH is the only hospital in Tennessee to be named to the *U.S. News Best Hospitals “Honor Roll”* of the nation's top 19 hospitals. Vanderbilt is the only Tennessee health care provider ranking eight of its adult medical specialties among the nations top 50 by *U.S. News*. VUH was named among the nation's top 100 hospitals by Thomas Reuters.

*U.S. News & World Report* named Vanderbilt’s specialty programs in heart and heart surgery; gynecology; cancer; kidney disease; ear, nose and throat; endocrinology; respiratory disorders; and urology as among the best programs nationally. In 2006 Vanderbilt achieved designation as Nashville's first Magnet hospital by the American Nurses Credentialing Center.

Among Vanderbilt’s specialty programs is the Vanderbilt-Ingram Cancer Center, the only Comprehensive Cancer Center designated by the National Cancer Institute in Tennessee that conducts research and provides care for adult and pediatric cancers. The Cancer Center provides innovative, multi-disciplinary care for patients and families along with a comprehensive program in basic, translational, clinical and population-based research in cancer care, prevention and early detection. In 2007, the Cancer Center was invited to join the prestigious National Comprehensive Cancer Network, a non-profit alliance of the world’s 21 elite cancer centers collaborating on improving the quality and effectiveness of cancer care for patients everywhere.

Additionally, VUMC’s Level I trauma center, comprehensive burn center and LifeFlight air emergency transport program offer critical trauma care to a three-state region.

The Monroe Carell Jr. Children’s Hospital at Vanderbilt is the most comprehensive children's hospital in the state and is dedicated to meeting the unique health care needs of children, from newborns to young adults, by providing primary and sub-specialty services. Children’s Hospital serves as a regional referral center and has been recognized by *U.S. News & World Report* as one of the nation’s premier children's hospitals. *U.S. News* ranked Children’s Hospital 23rd on its listing of “America’s Best Children's Hospitals.” The pediatric specialty programs in Neonatology and Neurology and Neurosurgery were both ranked among the nation's top 20 by *U.S. News*.

The Vanderbilt Heart and Vascular Institute has become one of the nation’s foremost cardiac research programs. *U.S. News & World Report* recently ranked Vanderbilt Heart and Vascular Institute 23rd on its list of “Best Hospitals” in the Heart and Heart Surgery category.

Vanderbilt Transplant Center is one of the largest and most respected in the Southeast with more than 400 solid organ and bone marrow transplants performed each year. A new pediatric liver transplant program was begun October 1, 2007 at the Monroe Carell Jr. Children’s Hospital at Vanderbilt.

The Nurse Faculty Practice network includes five primary care centers, three school health clinics, and five employer-based care centers. During fiscal year 2008, these clinics treated more than 30,000 patients. The Faculty Nurse Midwifery Service delivered over 600 babies at Vanderbilt Hospital and area general hospitals. All clinics are staffed by faculty nurse practitioners and nurse midwives. VUSN nurse practitioners/nurse midwifery students rotate through these sites as part of their education.

**Meharry-Vanderbilt Alliance**

Suite 511 Signature Center
1900 Church Street
Nashville, Tennessee 37203-2106
(615) 936-6070, fax (615) 322-8375
www.meharry-vanderbilt.org

Established over ten years ago, this nationally recognized historic collaboration between two uniquely diverse medical education institutions and traditions has become a tremendous success. Created to foster a diverse educational and scientific environment, this partnership has focused on clinical science training, academic support, biomedical research and training, and health services initiatives with emphasis on those that affect the disparities between the majority and minority populations. More than 50 students per year from both campuses have shared cross campus experiences through clerkships, residencies and fellowships benefiting student curricula and enhancing the academic support infrastructure of both institutions. The initiatives focus on four specific areas: undergraduate medical education, graduate medical education, student affairs, and information management and libraries. Collaborative efforts
in research and training yielded over $40 million in grants in FY07. Joint projects have resulted in 219 publications, of which 197 were published post-creation of the Alliance. The Alliance has created translational and participatory community health initiatives which are benefiting the underserved community. The Alliance has also formed a Meharry-Vanderbilt Student Alliance (MVSA) which involves over 200 students from both campuses in educational, clinical and community service programs. MVSA is a student-run organization and develops programs suggested by students. MVSA publishes a newsletter three times a year to highlight student activities and interests.

**COMMUNITY IMPACT**

Vanderbilt Medical Center, the largest private employer in Middle Tennessee and second largest in the state, employs more than 22,300 and has an annual regional economic impact of approximately $6.0 billion, of which the Medical Center’s impact totals about $4.3 billion. Vanderbilt will provide more than $245 million in uncompensated and charity care to members of the community unable to pay for their own care. It is the largest provider in the region under the state’s Medicaid program for the poor and uninsured, TennCare.

Vanderbilt consistently leads all private universities in the country in support of the United Way and Combined Charities. The Medical Center leads one of the country’s largest fund raising efforts for the American Heart Association. Vanderbilt gives to its community but it also receives support from it. In FY08 the entities that comprise the Medical Center received more than $72 million in philanthropic gifts.

As an integral part of the Nashville community, VUMC provides such community services as the Adolescent Substance Abuse Program, nurse-managed primary care to an underserved urban neighborhood, the maternal-infant health care outreach workers’ program in Appalachia, and the Tennessee Poison Center, an independent agency based at Vanderbilt and partially funded by VUMC.

**Center for Health Services**

Residence 7, Nashville, TN 37232-8180
(615) 322-4773, fax (615) 343-0325
Enhancing health in disadvantaged communities in six states, CHS programs focus on youth, adult and senior health, environmental issues and medical education. The Maternal Infant Health Outreach Worker program (MIHOW) trains more than 100 paraprofessional outreach workers each year and has served more than 15,000 families since 1982. The Student Community Health Coalition helped launch more than 100 community clinics in Appalachia and provides health and fitness services for seniors in 13 Tennessee counties. The Service Training in Environmental Progress (STEP) program assists communities dealing with toxic issues. The Community Health Emphasis program trains medical students to implement public health projects.

**MAJOR FACILITIES AT VUMC**

In addition to the School of Medicine (page 15), the School of Nursing (page 25), Vanderbilt University Hospital, The Vanderbilt Clinic (page 28), and Monroe Carell Jr. Children’s Hospital at Vanderbilt (page 76), major components of VUMC are as follows:

**Vanderbilt-Ingram Cancer Center**
2220 Pierce Avenue
1 (800) 811-8480 Cancer Information Program
Director’s Office (615) 936-1782
fax (615) 936-1790
www.vicc.org
The Vanderbilt-Ingram Cancer Center is the only Comprehensive Cancer Center designated by the National Cancer Institute in Tennessee that conducts research and provides care for adult and pediatric cancers, and one of only 41 such centers in the country. In 2007, the Cancer Center was invited to join the prestigious National Comprehensive Cancer Network, a non-profit alliance of the 21 of the world’s elite cancer centers collaborating on improving the quality and effectiveness of cancer care for patients everywhere. The Cancer Center provides innovative, multidisciplinary cancer care for all types of cancer, with a special strength in clinical trials (especially Phase I studies) and treatment of colorectal, lung, breast, prostate, head and neck, and kidney cancers, melanoma, leukemias and lymphomas and sarcomas. The program unites nearly 300 physicians and scientists who generate more than
$180 million in annual support from public and private sources. With $67 million in NCI funding in 2007, the center was ranked seventh in overall competitive grant support from the NCI. The Cancer Center's specialized programs include the region's only Family Cancer Risk Service, its comprehensive and experienced Blood and Marrow Transplant Program, and its only Cancer Information Program staffed by experienced oncology nurses and linked to the NCI and the NCCN. The Cancer Center also reaches into local communities with clinical trials available through members of its Affiliate Network in Tennessee, Kentucky, Virginia and Florida.

**Vanderbilt Center for Better Health**
3401 West End Avenue Suite 290
Nashville, TN  37203-8670
(615) 322-6591, fax (615) 322-8844

The Vanderbilt Center for Better Health’s mission is to accelerate change in health care. To accomplish this mission, the Center convenes diverse stakeholders to accomplish critical-path planning, provides methods for reducing time to results, conducts research through demonstration projects, and supports active learning through sessions that leverage facts during solution design. The VCBH innovation center is one tool utilized by our clients to achieve this mission and focuses on leveraging our strengths in the areas of Strategic and Skills for Health Care, and Clinician Adoption of Health IT. Our research programs include the Regional Informatics initiative and the Health Care Solutions Group — a think-and-act-tank jointly sponsored by Vanderbilt Medical Center and the Nashville Health Care Council. Research into future programs focused on Personal Health Record (PHR) and Applications (PHA), as well as Consumerism in Health Care, are current.

**Vanderbilt Bill Wilkerson Center for Otolaryngology and Communication Sciences**
Medical Center East, South Tower, Suite 7209
1212 21st Avenue South, Nashville, TN 37232
(615) 322-7267 • fax (615) 936-5000

The Vanderbilt Bill Wilkerson Center is devoted to comprehensive patient care, education and research in the field of communication disorders and diseases as well as ailments of the ear, nose and throat, and head and neck. Its programs are highly regarded nationally; *U.S. News & World Report*’s 2008 survey of the nation’s “Best Hospitals” ranked VUMC’s Otolaryngology program, under the category of “Ear, Nose and Throat,” at number 14 nationally. Bill Wilkerson’s audiology program ranked first among 118 other programs, and its speech pathology tied for fifth out of 225 other programs.

**Vanderbilt Stallworth Rehabilitation Hospital**
2201 Children’s Way, Nashville TN 37212
(615) 320-7600 • fax (1) 558-2081
Inpatient Referral (615) 963-4030

Vanderbilt Stallworth provides comprehensive inpatient rehabilitation services for adult and pediatric (age 6+) patients with neurological, orthopaedic and other injuries as well as chronic conditions and disabilities. With state-of-the-art treatment technology, the hospital specializes in the treatment of stroke, brain and spinal cord injury, multiple traumas, amputee, hip fracture and other diagnoses. A designated Stroke Center of Excellence within its 100 hospital rehabilitation network, Stallworth repeatedly exceeds national benchmarks for patient satisfaction and functional outcomes. It is also home to the Vanderbilt Center for Multiple Sclerosis. This hospital is a joint venture with HealthSouth Corporation.

**The Psychiatric Hospital at Vanderbilt**
1601 23rd Avenue South, Nashville, TN 37212
(615) 320-7770

This facility provides inpatient and partial hospitalization services to children, adolescents and adults with psychiatric and substance abuse problems. Services include 24-hour crisis assessment and a year-round accredited school for children and adolescents.

**Annette and Irwin Eskind Biomedical Library**
2209 Garland Avenue, Nashville, TN 37232
(615) 936-1401

This state-of-the-art library gives patrons access to information worldwide through the very latest in informatics retrieval and management technology. Following a non-traditional path to information delivery, the Eskind Biomedical Library incorporates knowledge management principles into education, research and patient care.

**Transplant Center**
801 Oxford House, Nashville, TN 37232-4753
(615) 936-0388

The Vanderbilt Transplant Center is a multidisciplinary alliance of transplant specialists. Each transplant program within the center represents a collaboration of medical and surgical professionals working together in the best interests of the transplant patient.
The Vanderbilt Sports Medicine Center is a full-service medical, surgical and rehabilitative approach to acute and chronic musculoskeletal injuries.

Vanderbilt Dayani Center for Health and Wellness
1500 Medical Center Drive, Nashville, TN 37232
(615) 322-4751
www.dayanicenter.org

Moving in 2009 to VanderbiltHealth One Hundred Oaks,
719 Thompson Lane, Suite 20000, 37204
(615) 343-4142

The Kim Dayani Center is a medically-based fitness/health promotion center which specializes in the modification of risk factors, including those related to cardiovascular disease, weight management, stress, sedentary lifestyle and smoking.

Vanderbilt Heart and Vascular Institute
Medical Center East, South Tower, Suite 5209
1215 21st Avenue South 37232-8802
(615) 322-2318, fax (615) 343-1786

Moving in 2009 to VanderbiltHealth One Hundred Oaks,
719 Thompson Lane, Suite 22100, 37204

The Vanderbilt Heart and Vascular Institute is a comprehensive and integrated heart and vascular program offering diagnosis, medical treatment, minimally invasive therapies, surgical intervention and disease management, state-of-the-art techniques and personalized treatment programs offered to meet each individual’s unique needs.

Gordon R. Bernard, M.D.
Assistant Vice Chancellor for Research

Kenneth J. Holroyd, M.D., MBA
Assistant Vice Chancellor for Research

Julie K. Hudson, M.D.
Assistant Vice Chancellor for Health Affairs

Nancy J. Lorenzi, Ph.D.
Assistant Vice Chancellor for Biomedical Informatics

David S. Raiford, M.D.
Assistant Vice Chancellor for Health Affairs and
Senior Associate Dean for Faculty Affairs

Dan M. Roden, M.D.
Assistant Vice Chancellor for Personalized Medicine

Jeanne M. Wallace, D.V.M.
Assistant Vice Chancellor for Research and
University Veterinarian

Lynn E. Webb, Ph.D., MBA
Assistant Vice Chancellor for Health Affairs

Susan R. Wente, Ph.D.
Assistant Vice Chancellor for Research (Basic Science)

Marilyn A. Dubree, M.S.N., R.N.
Executive Chief Nursing Officer and Director of Patient Care Services, Vanderbilt Medical Center

Allen B. Kaiser, M.D.
Chief of Staff, Vanderbilt University Hospital and
Associate Chief Medical Officer, Vanderbilt Medical Group

Larry M. Goldberg, M.H.A.
Executive Director and Chief Executive Officer
Vanderbilt University Hospital

Kevin B. Churchwell, M.D.
Executive Director and Chief Executive Officer
Monroe Carell Jr. Children's Hospital at Vanderbilt

Reginald W. Coopwood, M.D.
Chief Executive Officer, Hospital Authority, Metro Hospitals

Susan Heath, M.S.
Chief Executive Officer
Vanderbilt Stallworth Rehabilitation Hospital

David R. Posch, M.S.
Chief Executive Officer of the Vanderbilt Clinic and
Executive Director of Vanderbilt Medical Group

Clifton K. Meador, M.D.
Executive Director, Meharry-Vanderbilt Alliance
Ann H. Price, M.D.
Executive Director, Medical Alumni Affairs

Vice President for Facilities Planning and Development

Ronald W. Hill, M.P.H.
Vice President for Strategic Development

John F. Manning Jr., Ph.D., MBA
Vice President for Academic Enterprise Options

Margaret Head, R.N., M.S.N., MBA
Chief Operating Officer and Chief Nursing Officer of the
Vanderbilt Medical Group

Peter J. Giammalvo, Ph.D.
Chief Learning Officer

Jill D. Austin, MBA
Chief Marketing Officer

Karen F. Nanney, B.S., CPA
Director of Finance, Medical Center Enterprise-Wide Functions

Bret L. Perisho, B.S.B.A., CPA
Director of Finance, Business Development & Corporate Planning

J. Mel Bass, J.D.
Director, Federal Affairs and Health Policy Development

Robert K. Browning, B.S.
Director, Plant Operations

Missy Eason, B.S.
Director, Canby Robinson Society / Donor Relations

William N. Hance, J.D.
Director, Medical Center News & Public Affairs

William R. Rochford, M.P.H.
Director, Client and Community Relations

Patricia N. Stapp, B.S.
Director, Medical Center Special Events

Associate Dean for Clinical Affairs

Gerald B. Hickson, M.D.
Associate Dean for Clinical Affairs and Director of the Vanderbilt Center for Patient and Professional Advocacy

George C. Hill, Ph.D.
Associate Dean for Diversity in Medical Education

Scott M. Rodgers, M.D.
Associate Dean for Medical Student Affairs

John A. Zic, M.D.
Associate Dean for Admissions

P. David Charles, M.D.
Assistant Dean for Admissions
Overview

The School of Medicine at Vanderbilt University is committed to the education of physicians who are firmly grounded in the basic medical sciences, will provide compassionate care to their patients based upon their evaluation and application of the latest scientific research and will become leaders and scholars in their fields.

The medical school’s major strength lies in the quality of its students and faculty. The school provides a supportive and stimulating environment where students are encouraged to pursue individualized interests in clinical medicine and research. Our graduating students traditionally gain entrance to high quality residency programs of their choice throughout the country. The faculty, which represents a variety of specialties and research programs, has a national and international reputation for excellence in the biomedical sciences and clinical care.

Class Profile

Number of degrees granted in May 2008 94
2008–2009 Enrollment 530
First Year 105 M.D./MBA 3
Second Year 105 M.D./Ph.D. 82
Third Year 129 M.D./J.D. 2
Fourth Year 103 M.D./M.Div. 1

Profile of the First-Year Medical School Class
51 women, 54 men
20 underrepresented minority students
Residents of 24 states
Undergraduate degrees from 51 different colleges & universities
Average MCAT score: 11.3
Average GPA 3.8
Tuition: $38,400

Eighty-five percent of the medical students at Vanderbilt receive financial aid. Sixty percent of the students receive aid from our own institution.
In total, $17,435,670 was awarded to our students with $8,096,464 funded by our School of Medicine.
Institutional aid is composed of honor and need-based scholarships and loans. Federal funds consist of Stafford and Graduate PLUS Loans. A variety of other sources including alternative private loans are also utilized.
Students in the Class of 2008 who received financial aid graduated with a total average indebtedness of $127,900, including their educational debts from college.

DEPARTMENTS AND DEPARTMENT CHAIRS

Anesthesiology:
Michael S. Higgins, M.D., M.P.H.

Biochemistry:
Michael R. Waterman, Ph.D.

Biomedical Informatics:
Daniel R. Masys, M.D.

Biostatistics:
Frank E. Harrell Jr., Ph.D.

Cancer Biology:
Harold L. Moses, M.D. (Interim)

Cell and Developmental Biology:
Susan R. Wente, Ph.D.

Emergency Medicine:
Corey M. Slovis, M.D.
Hearing & Speech Sciences:
Fred H. Bess, Ph.D.

Medicine:
Eric G. Neilson, M.D.

Microbiology and Immunology:
Jacek J. Hawiger, M.D., Ph.D.

Molecular Physiology and Biophysics:
Roger D. Cone, Ph.D.

Neurology:
Robert L. Macdonald, M.D., Ph.D.

Obstetrics and Gynecology:
Howard W. Jones III, M.D. (Interim)

Ophthalmology and Visual Sciences:
Paul Sternberg Jr., M.D.

Orthopaedics and Rehabilitation:
Dan M. Spengler, M.D.

Otolaryngology:
Robert H. Ossoff, D.M.D., M.D.
Roland D. Eavey, M.D. (February 2009)

Pathology:
Samuel A. Santoro, M.D., Ph.D.

Pediatrics:
Jonathan D. Gitlin, M.D.

Pharmacology:
Heidi E. Hamm, Ph.D.

Preventive Medicine:
William Schaffner, M.D.

Psychiatry:
Stephan H.W. Heckers, M.D.

Radiation Oncology:
Dennis E. Hallahan, M.D.

Radiology and Radiological Sciences:
Jeremy J. Kaye, M.D.

Section of Surgical Sciences:
R. Daniel Beauchamp, M.D.

Cardiac Surgery: John G. Byrne, M.D.
Neurosurgery: George S. Allen, M.D., Ph.D.
Oral Surgery: Samuel J. McKenna, D.D.S., M.D.
Pediatric Surgery: Wallace W. Neblett III, M.D.
Plastic Surgery: R. Bruce Shack, M.D.
Surgery: Naji N. Abumrad, M.D.
Thoracic Surgery: Joe B. Putnam Jr., M.D.
Urology: Joseph A. Smith Jr., M.D.

CHAIRS AND PROFESSORSHIPS

Fully Endowed Chairs

Accenture Chair of Biomedical Informatics
Mark E. Frisse, M.D., MBA

Dorothy Beryl and Theodore R. Austin Chair in Pathology
Samuel A. Santoro, M.D., Ph.D.

Betty and Jack Bailey Professorship of Cardiology
vacant

Amy and Barry Baker Chair in Laryngeal,
Head and Neck Research
vacant

Allan D. Bass Chair in Pharmacology
Randy D. Blakely, Ph.D.

Melinda Owen Bass Chair in Medicine
Gordon R. Bernard, M.D.

Bixler/Johnson/Mays Professor in Psychiatry
Herbert Y. Meltzer, M.D.

James G. Blakemore Research Chair in Psychiatry
Richard C. Shelton, M.D.

James G. Blakemore Chair in Psychiatry
Stephan H.W. Heckers, M.D.

William L. Bray Chair in Urologic Surgery
Joseph A. Smith Jr., M.D.

Frances and John C. Burch Chair in Obstetrics
and Gynecology
Lonnie S. Burnett, M.D.

Lucius E. Burch Chair of Reproductive Physiology and
Family Planning
Katherine E. Hartman, M.D., Ph.D.

Betty and Lonnie S. Burnett Chair in Obstetrics and
Gynecology
Vacant

Benjamin F. Byrd Jr. Chair in Clinical Oncology
Jennifer A. Pietenpol, Ph.D.

Ann and Monroe Carell Jr. Family Chair in Pediatric
Cardiology
Thomas P. Doyle, M.D.

Chancellor’s Chair in Medicine
Vacant

Chancellor’s Professorship in Medicine
Walter J. Chazin, Ph.D.

Amos Christie Chair in Global Health
Sten H. Vermund, M.D., Ph.D.

Sam and Darthea Coleman Chair in Pediatric
Ophthalmology
Sean P. Donahue, M.D., Ph.D.
Mark Collie Chair in Diabetes Research
Stephen N. Davis, M.D., F.R.C.P.

Cornelius Abernathy Craig Chair in Medical and Surgical Oncology
David H. Johnson, M.D.

Craig-Weaver Chair in Pediatrics
James A. Whitlock, M.D.

Joe C. Davis Chair in Biomedical Sciences
Alvin C. Powers, M.D.

Annette Schaffer Eskind Chair for Vanderbilt Kennedy Center for Research on Human Development
Pat R. Levitt, Ph.D.

John Clinton Foshee Distinguished Chair in Surgery
R. Daniel Beauchamp, M.D.

Gottlieb C. Friesinger Chair in Cardiovascular Medicine
Vacant

Thomas F. Frist, Sr. Chair in Medicine
John A. Oates, M.D.

Ernest W. Goodpasture Chair in Investigative Pathology
Vacant

Ernest W. Goodpasture Chair in Experimental Pathology for Translational Research
Cheryl W. Coffin, M.D.

Mary Phillips Edwards Gray Chair in Stem Cell Biology and Tissue Regeneration
Vacant

Catherine McLaughlin Hakim Chair in Medicine
Alp T. Ikizler, M.D.

George W. Hale Professorship in Ophthalmology
Paul Sternberg Jr., M.D.

Donna S. Hall Chair in Breast Cancer
Vacant

Paul V. Hamilton, M.D. Chair in Geriatrics
John F. Schnelle, Ph.D.

Paul V. Hamilton, M.D. and Virginia E. Howd Chair in Urologic Oncology
Bruce J. Roth, M.D.

Elsa S. Hanigan Chair in Pulmonary Medicine
John H. Newman, M.D.

Joel G. Hardman Chair in Pharmacology
Ronald B. Emeson, Ph.D.

Patricia and Rodes Hart Chair in Urologic Surgery
Michael John Cookson, M.D.

E. Bronson Ingram Chair in Pediatric Oncology
Debra L. Friedman, M.D.

Ingram Chair in Surgical Sciences
William O. Richards, M.D.

Hortense B. Ingram Chair in Molecular Oncology
Harold L. Moses, M.D.

Lisa M. Jacobson Chair in Cardiovascular Medicine
Douglas B. Sawyer, M.D., Ph.D.

Rudy W. Jacobson Chair in Pulmonary Medicine
James E. Loyd, M.D.

David T. Karzon Chair in Pediatrics
John A. Phillips III, M.D.

Krick-Brooks Chair in Nephrology
Volker H. Haase, M.D.

Grant W. Liddle Chair in Medicine
Alfred L. George Jr., M.D.

Lee E. Limbird Chair in Pharmacology
P. Jeffrey Conn, Ph.D.

Guy M. Maness Chair in Otolaryngology
Roland D. Eavey, M.D.

Guy M. Maness Professor of Laryngology
Robert H. Ossoff, D.M.D., M.D.

Jack Martin, M.D. Research Professorship of Psychopharmacology
Vacant

Jeffrey W. Mast Chair in Orthopaedic Trauma
Philip J. Kregor, M.D.

Dan May Chair in Medicine
Charles Michael Stein, M.B., Ch.B.

Katrina Overall McDonald Chair in Pediatrics
H. Scott Baldwin, M.D.

McKesson Foundation Chair in Biomedical Informatics
William W. Stead, M.D.

William F. Meacham Chair in Neurological Surgery
George S. Allen, M.D., Ph.D.

Stanford Moore Chair in Biochemistry
Tadashi Inagami, Ph.D.

Hugh J. Morgan Chair in Medicine
Eric G. Neilson, M.D.

Harold L. Moses Chair in Lung Cancer Research
David P. Carbone, M.D., Ph.D.

Elizabeth and John Murray Chair in Medicine
Ray Stokes Peebles, M.D.

John A. Oates Chair in Translational Medicine
Gregory R. Mundy, M.D.
Carol and John S. Odess Chair in Facial Plastic and Reconstructive Surgery
  W. Russell Ries, M.D.

James C. Overall Chair in Pediatrics
  Jonathan D. Gitlin, M.D.

Ralph and Lulu Owen Chair in Medicine
  Vacant

Harry and Shelley Page Chair in Interventional Cardiology
  David Ziao-Ming Zhao, M.D., Ph.D.

Carol D. and Henry P. Pendergrass Chair in Radiology
  Jeremy J. Kaye, M.D.

Dr. J.C. Peterson Pulmonary Chair
  Vacant

Carolyn Perot Rathjen Chair in Pediatric Hematology and Oncology
  Vacant

Ann and Roscoe R. Robinson Chair in Nephrology
  Raymond C. Harris, M.D.

Ann and Roscoe R. Robinson Professorship of Clinical Research in Diabetes
  Tom A. Elasy, M.D.

Wilhelm Roentgen Professor of Radiology and Radiological Sciences
  Robert M. Kessler, M.D.

David E. Rogers Professorship in Medicine
  Douglas S. Kernodle, M.D.

Paul W. Sanger Chair in Experimental Surgery
  James K. Goldenring, M.D.

John L. Sawyers Chair in Surgical Sciences
  Najib N. Abumrad, M.D.

Kenneth Schermerhorn Chair in Orthopaedics
  Kurt P. Spindler, M.D.

H. William Scott Jr. Chair in Surgery
  C. Wright Pinson, M.D., MBA

Addison B. Scoville Jr. Chair in Medicine
  Richard T. D'Aquila, M.D.

Ruth King Scoville Chair in Medicine
  Vacant

John L. Shapiro Chair in Pathology
  Robert D. Collins, M.D.

Mark C. Smith Chair in Otolaryngology/Head and Neck Surgery
  James L. Nettewelle, M.D.

Phyllis G. and William B. Snyder, M.D. Chair in Ophthalmology and Visual Sciences
  John S. Penn, Ph.D.

Julia Carell Stadler Chair in Pediatrics
  Judy L. Aschner, M.D.

Ann Geddes Stahlman Chair in Medical Ethics
  Larry R. Churchill, Ph.D.

Edward Claiborne Stahlman Chair in Pediatric Physiology and Cell Metabolism
  Louis J. Muglia, M.D., Ph.D.

Gladys Parkinson Stahlman Chair in Cardiovascular Research
  David M. Bader, Ph.D.

Gray E. B. Stahlman Chair in Neurosciences
  Michael Aschner, Ph.D.

Major E.B. Stahlman Chair in Infectious Diseases and Inflammation
  Vacant

Mary Geddes Stahlman Chair in Cancer Research
  Lawrence J. Marnett, Ph.D.

William Stokes Chair in Experimental Therapeutics
  Dan M. Roden, M.D.

William S. Stoney Jr. Chair in Cardiac Surgery
  John G. Byrne, M.D.

Jacquelyn A. Turner and Dr. Dorothy J. Turner Chair in Diabetes Research
  Alan D. Cherrington, Ph.D.

Jim Turner Chair in Alzheimer's Research
  Vacant

John B. Wallace Chair in Medicine
  Robert J. Coffey Jr., M.D.

Mina Cobb Wallace Chair in Medicine
  Richard M. Peek Jr., M.D.

Natalie Overall Warren Distinguished Chair in Biochemistry
  Michael R. Waterman, Ph.D.

William C. Weaver III Chair in Neurology
  Subramaniam Sriram, M.B.B.S.

Dorothy Overall Wells Chair in Pediatrics
  Terence S. Dermody, M.D.

Albert and Bernard Werthan Chair in Medicine
  Robert S. Dittus, M.D., M.P.H.

Lester and Sara Jayne Williams Chair in Academic Surgery
  Michael D. Holzman, M.D.

Anne Potter Wilson Chair in Medicine
  Pelayo Correa, M.D.

Elton Yates Professorship in Autonomic Disorders
  David Robertson, M.D.
Annually Funded Chairs and Professorships

Oswald T. Avery Distinguished Chair in Microbiology
Jacek J. Hawiger, M.D., Ph.D.

F. Tremaine Billings Professorship in Medicine and Pharmacology
Vacant

Harry Pearson Broquist Professorship in Biochemistry
F. Peter Guengerich, Ph.D.

Stanley Cohen Professorship in Biochemistry
Richard M. Caprioli, Ph.D.

John Coniglio Chair in Biochemistry
Neil Osberoff, M.D.

Rosalind E. Franklin Professorship in Genetics and Health Policy
Ellen W. Clayton, J.D., M.D.

Gerald M. Fenichel Chair in Neurology
Vacant

James Tayloe Gwathmey Clinician-Scientist Professorship
Jeffrey R. Balser, M.D., Ph.D.

Godfrey Hounsfield Chair in Radiology and Radiological Sciences
Ronald R. Price, Ph.D.

Ingram Cancer Research Professorships
Jordan D. Berlin, M.D.
Robert J. Coffey Jr., M.D.
David K. Cortez, Ph.D.
James E. Crowe Jr., M.D.
Dennis E. Hallahan, M.D.
Scott W. Hiibert, Ph.D.
John F. Kuttesch Jr., M.D., Ph.D.
Bo Lu, M.D., Ph.D.
Lynn M. Matrisian, Ph.D.
Joe B. Putnam, M.D.
Albert B. Reynolds, Ph.D.
J. Ann Richmond, Ph.D.
Mace L. Rothenberg, M.D.
Yu Shyr, Ph.D.
Jeffrey A. Sosman, M.D.
Wendell G. Yarbrough, M.D.
Wei Zheng, M.D., Ph.D., M.P.H.
Mary M. Zutter, M.D.

Donald A.B. and Mary M. Lindberg University Professor of Biomedical Informatics
Randolph A. Miller, M.D.

T. H. Morgan Professorship in Human Genetics
Jonathan L. Haines, Ph.D.

Elliott V. Newman Professorship in Medicine
Billy G. Hudson, M.D.

John C. Parker Professor of Anesthesiology Research
Kevin Strange, Ph.D.

T. Edwin Rogers Chair in Pharmacology
L. Jackson Roberts II, M.D.

Joseph C. Ross Chair in Medical Education and Administration
Gerald B. Hickson, M.D.

Ronald E. Santo Chair in Diabetes Research
David H. Wasserman, Ph.D.

Sarah H. Sell Chair in Pediatrics
Kathryn M. Edwards, M.D.

Shedd Chair in Pediatric Infectious Diseases
Vacant

Norman Ty Smith Chair in Patient Safety and Medical Simulation
Matthew B. Weinger, M.D.

Earl W. Sutherland Jr. Professorship in Pharmacology
Heidi E. Hamm, Ph.D.

Earl W. Sutherland Jr. Chair of Molecular Physiology and Biophysics
Mark A. Magnuson, M.D.

University Professor of Radiology and Radiological Sciences and Biomedical Engineering
John C. Gore, Ph.D.

Vanderbilt Dean’s Chair
D. Brent Polk, M.D.

Vice Chancellor’s Chair in Breast Cancer Research
Carlos L. Arteaga, M.D.

Levi Watkins Jr. Professorship for Diversity in Medical Education
George C. Hill, Ph.D.

Robert H. Williams Professorship in Medicine
Nancy J. Brown, M.D.

John B. Youmans Professor of Medicine
Richard M. Breyer, Ph.D.

William K. Warren Sr. Chair in Pediatric Gastroenterology
Vacant
THE SCHOOL OF NURSING

Administration
Colleen M. Conway-Welch, Ph.D., R.N., C.N.M., F.A.A.N., F.A.C.N.M.

Dean
Linda D. Norman, D.S.N., R.N., F.A.A.N.

Senior Associate Dean for Academics
Bonita A. Pilon, D.S.N., R.N., B.C., F.A.A.N.

Senior Associate Dean for Practice
Ann M. Minnick, Ph.D., R.N., F.A.A.N.

Senior Associate Dean for Research
Elizabeth E. Weiner, Ph.D., R.N., B.C., F.A.A.N.

Senior Associate Dean for Educational Informatics
Becky Keck, M.S.N., R.N., N.E.A., B.C.

Assistant Dean for Administration
Marilyn A. Dubree, M.S.N., R.N.

Assistant Dean for Clinical Practice
Executive Chief Nursing Officer
Jana Lauderdale, Ph.D., R.N.

Assistant Dean, Cultural Diversity
Patricia A. Peerman, M.S., R.N.

Assistant Dean for Enrollment Management
Craig R. Carmichel, MBA, CPA

Director of Finance, Academic and Research Enterprise
Sarah B. Ramsey, M.Ed.

Director of Student Affairs
Kristie Smith, M.Ed.

Director of Student Financial Aid Services
Nancy Wells, D.N.Sc., R.N., F.A.A.N.

Assistant Director for Joint Center for Nursing Research
and Director of Nursing Research at the Vanderbilt University Medical Center

Overview
Today’s complex health care system requires the availability of a critical core of nurses who are prepared for advanced and sophisticated clinical practice. These include, but are not limited to, the roles of primary care nurse practitioner, specialty care nurse practitioner, nurse midwife, clinical nurse specialist, clinic nurse leader and health systems manager.

The capabilities of the School of Nursing were greatly expanded by the dedication in November 1998 of Patricia Champion Frist Hall, a three-story, 25,000-square-foot structure providing classroom and office space adjacent to Godchaux Hall. In January 2009, we will begin construction to add two additional floors to Patricia Champion Frist Hall. The school has the additional excitement of celebrating our Centennial this year.

Class Profile
Nursing students 774 Special students 65
Bridge students 138 D.P.N. students 34
M.S.N. students 535 Ph.D. students 23

Financial Aid (FY08)
Last year 132 Pre-Specialty level students received approximately $772,717 in scholarships and tuition assistance from sources funded or controlled by the School of Nursing. Sources included endowed scholarships, foundations and the School’s operating funds.

The 237 Specialty level students received approximately $1,596,631 in scholarships and tuition assistance from sources funded or controlled by the School. Two (2) students received full funding from the National Health Service Corps.

The Federal Nursing Student Loan program awarded approximately $168,000 to nursing students. Pre-specialty and specialty students borrowed approximately $2,860,252 through the Federal Stafford Subsidized Loan program and approximately $3,923,944 in Federal Stafford Unsubsidized Loans. Both groups of students also borrowed approximately $8,012,634 in loans from private financial institutions. Private loans are packaged as part of most financial aid awards for most students. The School of Nursing Loan program awarded approximately $83,000 from the HHS Division of the Nurse Faculty Loan Program.

Dual Degree Specialties
• M.S.N./M.Div.
• M.S.N./M.T.S.

Primary Care Programs
• Adult Nurse Practitioner
  - Forensic Nursing
  - Cardiovascular Disease Prevention & Management
  - Palliative Care
• Adult Nurse Practitioner/Gerontological Nurse Practitioner
• Family Nurse Practitioner
• Pediatric Primary Care Nurse Practitioner

Specialty Care Programs
• Acute Care Nurse Practitioner
• Neonatal Nurse Practitioner
• Family Nurse Practitioner/Acute Care Nurse Practitioner
• Nurse Midwifery
• Nurse Midwifery/Family Nurse Practitioner
• Pediatric Acute Care Nurse Practitioner
• Psychiatric Mental Health Nurse Practitioner
• Women’s Health Nurse Practitioner
• Women’s Health Nurse Practitioner/Adult Nurse Practitioner
Management Programs
- Clinical Management
- Health Systems Management
- Clinical Research Management

Special Programs
Senior Year in absentia with:
- Birmingham Southern College
- Covenant College
- Mary Baldwin College
- Vanderbilt University - Peabody College
- Vanderbilt University - A&S College

Affiliation Agreements:
- University of the South
- Millsaps College
- Rhodes College

Partnership Program:
- BSN at Fisk University
- BSN at David Lipscomb University

Joint Center for Nursing Research
The Center for Research Development and Scholarship (CRDS) at Vanderbilt School of Nursing achieves its mission by fostering a scholarly environment and offering services relevant to our researchers while considering the future directions and needs of science.

Clinical Facilities
In addition to Vanderbilt Medical Center and the Nashville Veterans Administration Medical Center, students may have clinical assignments in public hospitals, private hospitals, mental health or community health agencies, military hospitals, nursing homes and private practices in Middle Tennessee and across the country.

Chairs
Fully Endowed Chairs
- Julia Eleanor Blair Chenault Chair in Nursing
  - Ann Minnick, R.N., Ph.D., F.A.A.N.
- Independence Foundation Chair for Nursing Education
  - Lorraine Mion, R.N., Ph.D., F.A.A.N.
- Martha Rivers Ingram Chair in Nursing
  - Barbara Given, R.N., Ph.D., F.A.A.N.
- Valerie Potter Distinguished Chair in Nursing
  - Peter I. Buerhaus, R.N., Ph.D., F.A.A.N.
- Nancy and Hillard Travis Chair in Nursing
  - Dean Colleen Conway-Welch, Ph.D., C.N.M., F.A.A.N., F.A.C.N.M.

Committed Chairs
Conway-Welch Chair in Nursing
- George DeLong
  - Executive Director
- Charlotte B. Chaney, MBA
  - Executive Program Director

**CLINICAL CENTERS**

**Addiction Center**
1601 23rd Avenue South, Nashville, TN 37212
(615) 327-7200

Housed within the The Psychiatric Hospital at Vanderbilt, the Vanderbilt Addiction Center provides a comprehensive approach to the treatment of alcohol/drug dependence and associated psychiatric problems for patients 18 and older. The program consists of a complete psychiatric and medical assessment and inpatient detoxification, with follow-on treatment available as required.

**AIDS Project**
A-2215 Medical Center North, Nashville, TN 37232-2647
(615) 343-2437

The Vanderbilt AIDS Project provides support in the areas of community service, education, training and research. The project also offers a wide range of support services to AIDS patients including individual and family counseling, along with assistance for discharged patients.

**Asthma/Sinus/Allergy Program (ASAP)**
2611 West End Avenue, Suite 200, Nashville, TN 37203
(615) 936-2727

Opened in 1997, ASAP was the first clinic in the nation to offer comprehensive treatment of all airway diseases and disorders in a centralized location.

**Vanderbilt Autism Clinic**
Vanderbilt Kennedy Center, 110 Magnolia Circle
(615) 322-7565
kc.vanderbilt.edu/kennedy/triad/vac.html

This clinic is a gateway to Vanderbilt clinical and research programs and resources for autism spectrum disorders (ASD), including the Vanderbilt Autism Treatment Network, as well as those in the community, state and region. Resources include autism-specialized diagnostic, medical, early intervention, educational, behavioral and counseling services for children, adolescents and adults with ASD. The VAC is a partnership between the Vanderbilt Kennedy Center and VMC.

**Vanderbilt Bill Wilkerson Center for Otolaryngology & Communication Sciences**
Medical Center East, South Tower
1215 21st Ave South
Nashville, TN 37232-8718
(615) 936-5000

- Balance and Hearing Center (615) 322-4327
- Southeast Nashville Hearing Center (615) 781-3733
- St. Thomas Audiology (615) 222-3132
The Hearing Centers offer state-of-the-art diagnostic and rehabilitative services to persons with hearing loss and vestibular disorders.

**The Scottish Rite Masons Research Institute for Communication Disorders**  
1215 21st Avenue South, Nashville, TN 37232  
(615) 936-5000  
The Scottish Rite Institute conducts research and provides intervention in the field of child language disorders and other communication delays.

**The Pi Beta Phi Rehabilitation Institute**  
9211 Medical Center East - South Tower  
1215 21st Avenue South, Nashville, TN 37232-8590  
(615) 936-5040  
The Pi Beta Phi Rehabilitation Institute provides comprehensive rehabilitation and community reintegration services to individuals who are recovering from a traumatic brain injury.

**Breast Center**  
2500 Village at Vanderbilt Nashville, TN 37232-8534  
(615) 322-2064  
*Moving in 2009 to VanderbiltHealth One Hundred Oaks, 719 Thompson Lane, Suite 25000, 37204*  
The Vanderbilt Breast Center is a unique clinical setting in which women can obtain comprehensive breast health care in a single location. Services include mammography, breast ultrasound, MRI for diagnosis and screening of high risk patients, clinical breast examination, stereotactic biopsy, surgical evaluation and special multidisciplinary clinics for women at high risk of developing breast cancer and newly diagnosed patients. More information at www.thevbc.org.

**Burn Center**  
11 South, Vanderbilt University Hospital, Nashville, TN 37232-7175  
(615) 322-4590  
Vanderbilt’s 25-bed Comprehensive Burn Center is staffed by physicians, nurses, therapists and support personnel including psychiatrists, social workers and a chaplain who work as a team to provide the most advanced technology and treatment methods to burned adult and pediatric patients.

**Center for Human Nutrition, Adult Practice**  
514 Medical Arts Building, Nashville, TN 37232-2713  
(615) 936-1288  
The Center for Human Nutrition specializes in providing evaluation and treatment for malnourished patients requiring nutritional support interventions.

**Clinical and Research Ethics**  
319 Oxford House, Nashville, TN 37232-4350  
(615) 936-2686  
The center’s objectives are to promote ethically sensitive patient care and an informed patient population; to assist in developing an educated citizenry within the Medical Center, the University, and the surrounding community; and to encourage thoughtful deliberation concerning the moral and ethical issues pertaining to the health care system.

**Clinical Improvement Center**  
B-131 Vanderbilt University Hospital, Nashville TN 37232-7220  
(615) 322-3366  
The aim of the Center for Clinical Improvement is to systematically and continuously improve care based on the Institute of Medicine’s (IOM) dimensions of care (Safe, Timely, Effective, Efficient, Patient-Centered and Equitable); to collaboratively assess and communicate measures of quality; to develop new knowledge, tools and resources to advance the science of improvement; and to disseminate improvement science knowledge to current and future health care professionals.

**Community Mental Health Center**  
2200 Village at Vanderbilt, Nashville, TN 37232-8646  
(615) 322-2028  
The CMHC provides a broad range of mental health care to children, adolescents and adults. Special emphasis is placed on serving individuals with serious and persistent mental illness.

**Comprehensive Care Center**  
345 24th Avenue South, Suite 103, Nashville, TN 37203  
(615) 321-9556 • Fax (615) 322-2350  
The Comprehensive Care Center, a collaborative enterprise between Vanderbilt Medical Center and a community hospital, is an outpatient medical facility that provides medical care for HIV/AIDS patients. The center also offers screening and enrollment in AIDS clinical studies.
Corporate Health Services
3319 West End Avenue, Suite 950
Nashville, TN 37203
(615) 936-6074 or 1-888-869-6757
Fax (615) 936-6077
Vanderbilt Medical Center has implemented a worker’s compensation access system to effectively respond to the needs of the worker’s compensation community. Vanderbilt Corporate Health Services has served as the single point of access for the workers’ compensation needs of employers, case managers and adjustors. In addition, a ‘preferred’ list of Vanderbilt providers, available in numerous specialties, has been developed to serve the worker’s compensation community. To receive the greatest benefit from our system, please call the number(s) above to reach one of our four dedicated Worker’s Compensation Division Team members.

Craniofacial Surgery Center
3630 The Vanderbilt Clinic, Nashville, TN 37232-0001
(615) 936-0160
The Vanderbilt Center for Craniofacial Surgery is a multi-disciplinary group that treats both acquired and congenital deformities of the soft tissues and bone of the head and neck region. The team consists of craniofacial surgeons, neurosurgeons, otolaryngologists, orthodontists, oral surgeons, psychiatrists, dentists, ophthalmologists, pediatricians, geneticists, speech pathologists and social workers. The Center is recognized by the American Cleft Palate/Craniofacial Surgery Association and is one of the few centers in the country that performs this type of surgery.

Dental and Orthodontic Center
3300/3400 Village at Vanderbilt, Nashville, TN 37212-8224
(615) 322-2193 (Dental Center)
(615) 343-0633 (Orthodontic Center)
The Vanderbilt dentistry practice provides comprehensive dental and orthodontic care for children and adults. The program also offers special expertise in orthodontic therapy to patients requiring orthognathic surgery.

Dermatology/MOHS Practice
3903 The Vanderbilt Clinic, Nashville, TN 37232-5227

VOI Rehabilitation – Physical and Occupational Therapy (615) 343-0100
VOI Fitness Center • (615) 322-4540
Vanderbilt Orthopaedics Institute combines some of the region’s best physicians and rehabilitation professionals. Patients benefit from a staff of fellowship trained physicians that offer subspecialized orthopaedic care. Specialties include: Sports Medicine, Hand, Joint Replacement, Oncology, Spine, Ortho Trauma, Foot and Ankle, Physical and Occupational therapy and fitness.

John S. Odess Otolaryngology Head and Neck Surgery Clinic Medical Center
1215 21st Avenue South
7209 Medical Center East, South Tower
Nashville, TN 37232-8783
(615) 322-6180 • Fax (615) 343-9556
The Odess Clinic opened in 1998 on the second floor of the Vanderbilt Clinic as a result of a substantial financial gift from its benefactor, the late Dr. John S. Odess, an alumnus of the Vanderbilt University Medical School. This gift continues to play a major role to the success of the Department of Otolaryngology. In 2005, the clinic moved to its new space in the Bill Wilkerson Center for Otolaryngology and Communication Sciences. Increasing patient-care rooms with state-of-the-art care, thousands of patients seek specialized treatment in head and neck, ear, nose and throat disorders and diseases in the Odess Clinic. Ranked continuously among the top 20 otolaryngology departments by U.S. News & World Report, faculty is recognized both nationally and internationally. Its fellowship programs in head and neck surgery, otology and rhinology continue to train high quality otolaryngologists in its specialized sub-specialties.
Palliative Care
The Palliative Care Consultation service offers an integrative approach to patients diagnosed with a terminal diagnosis, specifically assisting in the treatment of distressing symptoms, the development of patient centered goals of care, and facilitate referrals to hospice. The team is available to assist families and patients with difficult decisions including but not limited to decisions regarding chemotherapy, dialysis, code status and advanced care directives. In addition, the team assists with communicating difficult information to family members of our patients including children of all ages.
Adult Service:
WIZ Consult or pager 317-CARE (317-2273).

Pharmaceutical Services
Vanderbilt University Hospital Pharmacy Administration, (615) 322-2374
The Department of Pharmaceutical Services provides comprehensive pharmaceutical care services to all patients of Vanderbilt University Hospital, Psychiatric Hospital at Vanderbilt and The Vanderbilt Medical Group. This patient-focused service is provided through the Patient Care Center organization and clinic structure. The role of the Pharmacy is to promote safe and effective medication therapy for all patients.

Phototherapy and Skin Treatment Center

The Middle Tennessee Poison Control Center provides access to Poison information Specialists that are available 24 hours a day to provide accurate information on how to handle any suspected poisoning or toxic substance exposure. The Pharmacy supports seven pharmacy residency programs – three are Specialty Pharmacy Practice Practice residencies, and four are General Practice residencies. In
addition, the department works with numerous Schools of Pharmacy to educate pharmacy students with educational and practice opportunities.

**Transplant Center**
808 Oxford House, Nashville, TN 37232-4753
(615) 936-0388 • Fax (615) 936-6431
The Vanderbilt Transplant Center is a multidisciplinary alliance of transplant specialists. Each transplant program within the center represents a collaboration of medical and surgical professionals working together in the best interests of the transplant patient. Clinical transplant services offered include kidney, pancreas, combined kidney/pancreas, heart, lung, liver, bone marrow and stem cell transplantation.

**Travel Clinic**
B-818 The Vanderbilt Clinic, 1301 Medical Center Drive, Nashville, TN 37232-5735
(615) 936-1174 • Fax (615) 343-3749
Moving in 2009 to VanderbiltHealth One Hundred Oaks, 719 Thompson Lane, 37204
A complete source for health-related pre-travel and post-travel assistance, the Travel Clinic provides immunizations and certificates, prescriptions, recommended lists of first aid supplies, advice on preventive health habits and instructions on recognizing symptoms of common travel-related illnesses. Appointments are available for individuals, tour groups, corporations and institutions.

**Trauma Patient Care Center**
404 Medical Arts Building, Nashville, TN 37232-1750
(615) 936-0175 • Fax (615) 936-0185
Trauma Service Patient Referral: (615) 343-0976
The Vanderbilt Trauma Center provides comprehensive care to trauma victims from pre-hospital care through hospitalization and rehabilitation. Patients may be referred through the Vanderbilt Trauma Line, which provides 24-hour access to a Vanderbilt physician. Rapid transport from a referring hospital can be arranged through the Vanderbilt LifeFlight Program. The Trauma Care Center consists of 31 beds on the 10th floor of Vanderbilt University Hospital.

**Treatment and Research Institute for Autism Spectrum Disorders (TRIAD)**
Vanderbilt Kennedy Center, 110 Magnolia Circle Nashville, TN 37203
(615) 322-7565
triad.vanderbilt.edu
TRIAD's threefold mission is service, training, and research to advance the understanding and treatment of autism spectrum disorders. Assessment and intervention consultation are provided through TRIAD's Infant-Toddler Screening Clinic, Parent Support and Education Program, and Autism School-Age Clinic. Other services for families include the Ann and Monroe Carell Jr. Families First Workshops, the Individualized Family Consultation program, and summer Social Skills Camp. Training for educators includes collaborative student-focused consultation, program consultation, teacher training, and an administrators academy.

**The Vanderbilt Voice Center**
7302 Medical Center East, South Tower, 1215 21st Avenue South, Nashville TN 37232-8783
(615)343-7464 • Fax (615) 343-0872
Opened in 1991, The Vanderbilt Voice Center is a major component of the Bill Wilkerson Center for Otolaryngology and Communication Sciences. The Voice Center's mission is "taking care of patients who use their voice professionally," and is dedicated to treating any patient with a voice-related issue. The Center is a unique resource for those who use their voice professionally or during the course of everyday use. Its advanced medical capabilities include equipment and techniques for the diagnosis and treatment of voice problems, voice training, and intervention to prevent voice problems. The center also treats the entire medical and surgical spectrum of upper aerodigestive tract related problems. Services include laryngology, bronchoesophagology, endoscopic laser surgery, laryngeal and tracheal reconstructive surgery and phonosurgery. The Voice Center staff includes otolaryngologists, speech pathologists/voice scientists and a singing specialist. As a training facility for otolaryngologists wishing to specialize in laryngology and the care and treatment of the voice, it was one of the first laryngology fellowship programs in the world. Approximately 85% of its fellows are in academic medical centers.
**Vanderbilt Center for Women’s Health**

OB/GYN Practice (includes MFM and OB Ultrasound):
The Vanderbilt Clinic, Suite 3701 Nashville, TN 37232-5518
(615) 322-6173 • Fax (615) 343-6724

Women’s Health Center:
B-1111 Medical Center North, Nashville TN 37232-2515
(615) 322-6173 • Fax (615) 343-4902

Reproductive Medicine Center:
B-1110 Medical Center, North, Nashville TN 37232-2515
(615) 322-6576 • Fax (615) 343-8881

Medical Arts Group OB/GYN:
The Medical Arts, Building, Suite 220, Nashville TN
(615) 396-1103 • Fax (615) 396-1106

Moving in 2009 to VanderbiltHealth One Hundred Oaks,
719 Thompson Lane, Suite 27100, 37204
(615) 343-5700

The Vanderbilt Center for Women’s Health provides an interdisciplinary approach to patient care and a wide range of obstetric and gynecologic services. Pregnant women are cared for by OB/GYNs, Certified Nurse Midwives or Certified Nurse Practitioners in the Medical Arts OB/GYN Group and the TVC OB/GYN Practice. The Maternal Fetal Medicine practice provides care to women experiencing a high-risk pregnancy. Obstetric Ultrasound is on site. Comprehensive genetic counseling and testing is available. Gynecology care is provided by a team of Gynecologist, Certified Nurse Practitioner or Certified Nurse Midwives. Well women care is provided in all locations. For women needing specialized gynecologic services the center provides uro-gynecology, pelvic support, minimally invasive surgery, reproductive endocrinology and infertility, colposcopy and gyn-oncology. The majority of the gynecology specialty care is provided in the Women’s Health Center.

---

**BENCH TO BEDSIDE: COMPREHENSIVE RESEARCH CENTERS**

**Vanderbilt Diabetes Center**

702 Light Hall, Nashville, TN 37232-0615
(615) 322-7004 • Fax (615) 343-0172

The Vanderbilt Diabetes Center provides a comprehensive approach to diabetes. Programs dealing with education and training of students and fellows provide the next generation of care-givers and scholars. Other programs support the diabetes-related research of over 80 VUMC faculty members. Several sophisticated core resources are of particular importance in this regard. Finally, the VDC, through the recently established Vanderbilt-Eskind Diabetes Clinic, provides comprehensive clinical care, including addressing complications of the disease, for diabetics of all ages.

**Vanderbilt-Ingram Cancer Center**

2220 Pierce Avenue, Nashville, TN 37232
1 (800) 811-8480 - toll free Cancer Information Program
(615) 936-1782, Director’s Office
Fax (615) 936-1790
www.vicc.org

The Vanderbilt-Ingram Cancer Center is the only Comprehensive Cancer Center designated by the National Cancer Institute in Tennessee that conducts research and provides care for adult and pediatric cancers, and one of only 41 such centers in the country. In 2007, the Cancer Center was invited to join the prestigious National Comprehensive Cancer Network, a non-profit alliance of the 21 of the world’s elite cancer centers collaborating on improving the quality and effectiveness of cancer care for patients everywhere. The Center unites nearly 300 physicians and scientists in seven research programs in breast cancer, gastrointestinal cancer, experimental therapeutics, genome maintenance, host-tumor interactions, signal transduction and cell proliferation, and cancer prevention and population-based research. These scientists generate more than $180 million in annual support from public and private sources, including $67 million in grants from the NCI, ranking the center seventh in competitive grant support from the institute. The Center includes a long list of large “team science” grants from the NCI and other sources, including three Specialized Programs of Research Excellence (SPORES) in breast, gastrointestinal and lung cancers, the Southern Community Cohort Study, a Digestive Disease Center grant, a Tumor Microenvironment Network grant, A Mouse Models Consortium grant, a Molecular Signatures of Lung Cancer grant, a Clinical Proteomic Technology assessment grant, a Minority Partnership grant (with Meharry Medical College) and
a Multiscale Mathematical Modeling for Cancer grant. Its clinical trials program includes robust work in Phase I drug development and designation by the NCI as sites for Phase I and Phase II clinical trials. The center also boasts several important donor-supported research initiatives, including the Frances Williams Preston Laboratories of the T.J. Martell Foundation, the A.B. Hancock Jr. Memorial Laboratory for Cancer Research, the Jim Ayers Institute for Pre-Cancer Detection and Diagnosis and Robert J. Kleberg and Helen C. Kleberg Center for Cancer Genetics and Genomics.

Vanderbilt Kennedy Center
(John F. Kennedy Center for Research on Human Development)
237 MRL Building, Nashville, TN, 37203
(615) 322-8240 • Fax (615) 343-5737
kc.vanderbilt.edu
The mission of the Vanderbilt Kennedy Center is to improve the quality of life of persons with disorders of thinking, learning, perception, communication, mood and emotion caused by disruption of typical development. It is dedicated to improving the lives of children and adults with disabilities by embracing core values that include the pursuit of scientific knowledge with creativity and purpose; the dissemination of information to scientists, practitioners, families, and community leaders; the facilitation of discovery by Kennedy Center scientists; and the translation of knowledge into practice. The Center is one of fourteen nationally designated National Institutes of Health research centers on mental retardation and other development disabilities supported in part by the National Institute of Child Health and Human Development. In 2005, it was designated a University Center for Excellence on Developmental Disabilities Education, Research and Service by the federal Administration on Developmental Disabilities. The Center is an interdisciplinary research, training, diagnostic, and treatment institute, embracing faculty and resources available through Vanderbilt Medical Center, the College of Arts and Science, and Peabody College. The Center brings together scientists and practitioners in behavior, education, genetics and neuroscience to work together in unique ways to solve the mysteries of development and learning.

MULTI-INVESTIGATOR RESEARCH CENTERS AND PROGRAMS:

Vanderbilt AIDS Center
1161 21st Avenue South, A-2200 Medical Center North Nashville, TN 37232-2605
(615) 321-2260 or (615) 322-8972 • Fax (615) 321-2263
The Vanderbilt AIDS Center supports all HIV-related research and helps coordinate HIV care and provider education. Several multi-investigator NIH grants support the full spectrum of HIV research, from clinical trials to basic virology and immunology. The Vanderbilt Meharry Center for AIDS Research (CFAR) grant is a key component. The Vanderbilt Meharry CFAR was established in 2003 to strengthen HIV/AIDS research across both Vanderbilt and Meharry campuses, as well as the Comprehensive Care Center. It is one of 20 CFARs at academic medical centers across the United States that are competitively funded by the NIH. CFAR aims to synergistically enhance HIV/AIDS research by providing expertise, resources, and services that foster interdisciplinary collaboration, especially on translational research. The Vanderbilt Meharry CFAR focuses on research into disparities in the HIV epidemic, and collaborates closely with the Vanderbilt Institute for Global Health.

Developmental Medicine and Cognition
See page 94

Center for Biomedical Ethics and Society
2525 West End Avenue, Suite 400, Nashville, TN 37203
(615) 936-2686
The mission of the Center for Biomedical Ethics and Society is to provide leadership in education, research, and clinical service at VUMC concerning the ethical, legal, and social
dimensions of medicine, healthcare and health policy. The Center is committed to multi-disciplinary exploration of the individual and social values, cultural dynamics and legal and professional standards that characterize and influence clinical practice and biomedical research. The Center aims to be a catalyst for collaboration in teaching, research, and practice at Vanderbilt and to contribute to scholarship and policy making from the local to the international level.

Center for Human Genetics Research
519 Light Hall, Nashville, TN 37232
(615) 343-8555 • Fax (615) 343-8619
The Vanderbilt Center for Human Genetics Research (CHGR) was initiated in July, 1997, to bring a focus to human genetic research at Vanderbilt, to foster the expansion of this research, and to help develop appropriate training activities for a growing number of students interested in human genetics. The central theme of the CHGR is the understanding of how genes influence complex traits; traits that are influenced by the intricate interplay of multiple genes and environmental factors. This encompasses research at the molecular, clinical, and population levels performed by faculty in multiple departments and schools.

Center for Lung Research
Division of Allergy, Pulmonary and Critical Care Medicine
T-1218 Medical Center North, 1161 21st Avenue South, Nashville, TN 37232-2650
(615) 322-3412 • Fax (615) 343-7448
www.mc.vanderbilt.edu/vumc/lung.html
This center stimulates and facilitates lung research and training throughout the institution. Center investigators represent nine departments and are engaged in a wide range of basic and clinical research. These investigators work both individually and in collaboration with many other faculty members. The center serves to identify important research opportunities, to assist investigators in identifying collaborators within and outside the institution, and to facilitate the research process by providing physical facilities, financial support and administrative and scientific expertise. The center maintains close relationships with the departments of medicine, cell biology, pediatrics, pathology, biomedical engineering, pharmacology and molecular physiology and biophysics, as well as with other departments in the schools of medicine and engineering.

Center for Matrix Biology
1161 21st Avenue South, B-3102 Medical Center North, Nashville, TN 37232-2372
(615) 322-7299 or Billy G. Hudson (615) 322-7298
The mission of this center is to foster cohesive interactions among Vanderbilt University scientists who work, directly or indirectly, on extracellular matrix biology in order to facilitate collaborations, promote excellence in matrix research and acquire funding support.

Center for Molecular Neuroscience
6133 Medical Research Building III
Nashville, TN 37232-8548
(615) 936-3037 • Fax (615) 936-3040
The Center for Molecular Neuroscience supports research and training of neuroscientists who utilize sophisticated genetic, cell biologic, biochemical and biophysical techniques to understand fundamental aspects of development, signaling and disease in the brain. Major research foci of faculty are in neuronal development and differentiation, control of membrane excitability, mechanisms of synaptic plasticity, elucidation and analysis of drug actions in the brain, and altered gene/protein function in mental illness. Faculty of the CMN utilize state-of-the-art molecular and transgenic techniques to understand how key genes control brain development and function and to develop new animal models for syndromes such as ADHD, Parkinson’s disease and Alzheimer’s disease.

Center in Molecular Toxicology
638 Robinson Research Building, Nashville, TN 37232-0146
(615) 322-2261 • Fax (615) 322-3141
The Center in Molecular Toxicology is a National Institute of Environmental Health Science-funded research center. The Center’s overall research goals are to understand phenomena of toxicological interest in chemical terms, answer questions related to toxicity at the biochemical level and apply such chemical and biochemical knowledge to problems involving human health.

Center for Space Physiology and Medicine
AA-3228 Medical Center North
1161 21st Avenue South Nashville, TN 37232-2195
(615) 343-6499
To demonstrate its commitment to research in the physiological challenges of manned space flight, Vanderbilt Medical Center established the Center for Space Physiology and Medicine in 1989. Under the direction of David Robertson, M.D., Professor of Medicine, Pharmacology, and Neurology, and F. Andrew Gaffney, M.D., Professor of Medicine, the Center’s mission is to direct and coordinate
the Medical Center’s space-related research. The collaborating members of the medical faculty are internationally recognized authorities in many areas relevant to manned space flight. The Center also has close ties to scientists within NASA centers and to Russian investigators in the Institute for Biomedical Problems and the Russian Cardiological Research Center in Moscow.

Center for Structural Biology
5140 Medical Research Building III,  
465 21st Avenue South Nashville, TN 37232-8725  
(615) 936-2209 • Fax (615) 936-2211

The trans-institutional Center for Structural Biology, founded in 2000, is a new trans-institutional research and training unit that focuses on the integrated application of structural methods for solving fundamental problems in medicine and biology. The Center also provides education and training in all areas of structural biology to all interested researchers on campus. Faculty, drawn from eight departments in the College of Arts & Science and the School of Medicine utilize NMR, EPR and fluorescence spectroscopes, X-ray crystallography, cryo-electron microscopy and computational techniques to understand a range of critical events such as signal transduction, viral infection, the replications of genes in healthy cells, and the malfunction of the repair of damaged genes in cancer.

Diabetes Research and Training Center
2215 Garland Avenue, Nashville, TN 37232  
(615) 322-7990 • Fax (615) 343-0172

The Diabetes Research and Training Center (DRTC) at Vanderbilt is one of a network of centers established by the National Institute of Diabetes, Digestive and Kidney Diseases (NIDDK) to conduct research and training in diabetes mellitus and related endocrine and metabolic disorders. The DRTC is a multidisciplinary program with 95 participating faculty members distributed among 14 departments in two schools and three colleges of the University. The Biomedical Research Component consists of a research base of 65 investigators in the areas of in vivo metabolism, signal transduction, etiology and complications, gene regulation, beta cell function, demonstration and education.

Digestive Disease Research Center
Division of Gastroenterology  
C-2104 Medical Center North, Nashville, TN 37232-2279  
(615) 322-5200

The Digestive Disease Research Center (DDRC) is a multidisciplinary center at Vanderbilt Medical Center developed to serve a number of purposes. The center promotes digestive diseases-related research in an integrative, collaborative and multidisciplinary manner. In addition to enhancing the basic research capabilities of established DDRC investigators, the center attracts investigators not involved in digestive diseases-related research to pursue these lines of investigation, in order to develop and implement programs for training and establishment of young investigators in digestive diseases-related research and facilitate the transfer of basic research findings to the clinical area.

Frist Nursing Informatics Center
461 21st Avenue South, Nashville, TN 37240  
(615) 936-2581

The Frist Nursing Informatics Center is housed on the second floor of Frist Hall. Faculty, staff and student support is provided for various informatics applications, including handheld devices, clinical log software, use of Blackboard (web-based course template system), survey design and other knowledge building tools. In addition, a computer lab environment supports online learning activities with additional lab machines available for online testing.

General Clinical Research Center
AA-3208 Medical Center North,  
Nashville, TN 37232-2195  
(615) 322-2390 • Fax (615) 343-2979

The Clinical Research Center (CRC) is a 21-bed unit located in Medical Center North. Its objectives are to encourage and support clinical research into the cause, progression, prevention, control, and care of human disease. It fulfills these objectives by creating a controlled environment for studies of normal and abnormal body function. The CRC provides space, hospitalization costs, laboratories, equipment, and supplies for clinical research by any qualified member of the faculty of any medical school department. The common resources of the CRC support all disciplines, with particular emphases on nutrition, oncology, neurology, cardiology, clinical pharmacology, endocrinology, gastroenterology, hematology and diabetes. The CRC is supported by a grant from the National Center for Research Resources and also serves as a resource for teaching students, a site for research in the methodology of patient care systems and apprenticeship for young clinical investigators.
The objective of the Nephrology Center is to contribute to the understanding of pathogenic mechanisms leading to progressive nephron destruction in the kidney. Investigators from the departments of medicine, pediatrics, surgery, cell biology, pharmacology and pathology bring a multidisciplinary approach to bear on specific mechanisms leading to glomerular and tubular dysfunction and progressive glomerular destruction. Center funding is derived primarily from the National Institutes of Health grant entitled “Biology of Progressive Nephron Destruction.”

The Informatics Center at Vanderbilt functions as a highly effective system of people, processes and technology working at all levels of the medical center to improve health care using information technology and communication to change the face of health care to provide the best care, education and research possible.

The Institute for Experimental Therapeutics builds on Vanderbilt’s internationally recognized strengths in human pharmacology. The major missions of the Institute are to investigate mechanisms underlying variability in drug actions in humans and to translate those results into more effective use of available drugs and the development of improved drug therapies.

The Institute for Global Health fosters interdisciplinary research, teaching and service activities linked to health and/or development in resource-limited settings of the developing world. The Institute helps strengthen and sustain the interests and activities of the Vanderbilt community by:

- Facilitation of international contacts for program development and training
- Advocacy for better equity in global health investments
- Assistance in securing resources for international activities
- Standardization and facilitation of overseas administrative approaches

By facilitating the involvement, development, and growth of collaborations aimed at addressing problems in resource-limited settings, the Institute expects Vanderbilt itself to be enriched in its diversity and sensitivity to the global challenges in health and development. By serving as a facilitating body for expanding the activities of individual scientists and departments across the Vanderbilt campus, the Institute expects to aid multidisciplinary research efforts in diseases of poverty, tropical climes and health disparities.
Mass Spectrometry Research Center
9160 Medical Research Building III
465 21st Avenue South, Nashville, TN 37232-6400
(615) 343-8382 • Fax (615) 343-8372
The five areas that comprise the Mass Spectrometry Research Center Research and Development, MS Core Service, Proteomics, Serum and Biofluids Core and Bioinformatics provide the local research community with world-class instrumentation and collaborative support of cutting-edge research in the medical and bioscience fields. The Research & Development Laboratory is focused on the development of new mass spectrometry and data analysis techniques that can be applied to problems of medical significance. The Mass Spectrometry Service Laboratory is an advanced shared instrument facility. The MS Core Service provides cost effective, state-of-the-art instrumentation to students, fellows and faculty for identification and structural analysis of biological molecules and for qualitative and quantitative assays of drugs and metabolites in physiologic fluids. The Proteomics Lab provides assistance with or participation in proteomic studies. The Tissue and Biofluids Core Laboratory direct proteome profiling and protein imaging of intact tissues by MALDI-MS. The Core also provides proteome profiling of serum, plasma, and other biofluids by MALDI-MS and analysis of biofluid proteome fractions by "shotgun" LC-MS-MS methods. The newly established Bioinformatics Group develops new algorithms, software, and database tools for analysis of mass spectrometry data for proteomics and other applications within the MSRC. This group interacts with faculty in the Developments of Biomedical Informatics and Biostatistics, bringing together new analytical technologies with computational and statistical approaches to large complex datasets in biomedical research.

Skin Diseases Research Center
A-2300 Medical Center North, Nashville, TN 37232
(615) 343-4363 • Fax (615) 343-4365
sdrcc.research@vanderbilt.edu
The Skin Diseases Research Core Center at Vanderbilt University is an NIH/NIAMS-funded center with the mission of promoting skin-related research among both basic and clinical investigators. Organized within the Dermatology Division, this center involves investigators and core laboratories from multiple other areas. This center supports Core Laboratories in Phenotype Analysis, Morphology and molecular genetics. Pilot & feasibility projects are awarded for investigators new to skin-related research or for novel studies by established cutaneous researchers. Inquiries may be directed to the SDRCC.

Vanderbilt Addiction Center
1601 23rd Avenue South, Nashville, TN 37212
(615) 327-7200
www.mc.vanderbilt.edu/addiction/
The Vanderbilt Addiction Center provides the academic focus within Vanderbilt University for research, education, and clinical care activities related to the pathogenesis, prevention, and treatment of alcohol and other drug abuse and dependence. VAC represents an interdepartmental network of investigators and clinicians from the Schools of Medicine, Nursing, and Engineering, the College of Arts and Science, and Peabody College. Investigators and clinicians work individually and in collaboration with other faculty members. VAC identifies important research opportunities, assists investigators in identifying collaborators within and outside Vanderbilt and facilitates research by providing a forum for interdisciplinary discussions among clinical and basic scientists.

Vanderbilt Bill Wilkerson Center for Otolaryngology and Communication Sciences
Medical Center East, South Tower, Suite 3200
1215 21st Avenue South, Nashville, TN 37232
(615) 936-5013
The Vanderbilt Bill Wilkerson Center for Otolaryngology and Communication Sciences was created in 1997 to fill a need for ear, nose and throat doctors and hearing and speech therapists to work side by side for the benefit of their patients with communication and otolaryngological diseases and disorders. The center is composed of the Vanderbilt Department of Hearing and Speech Sciences (formerly the Bill Wilkerson Center) and the Vanderbilt Department of Otolaryngology. The Center offers diagnosis and treatment for a wide range of conditions that affect hearing, speech, language and voice production, as well as over twenty research laboratories addressing basic and applied issues in Otolaryngology and Hearing and Speech Sciences.
The Vanderbilt Brain Institute
U1205 Medical Center North, Nashville, TN, 37232-2050
(615) 936-3736 • Fax (615) 936-3613
brain.institute@vanderbilt.edu
Brain Awareness Schedule: (615) 936-2637
The Vanderbilt Brain Institute unites campus-wide neuroscience to facilitate interdisciplinary research, training and public outreach. The VBI’s mission is to:
- be a communication center for transinstitutional neuroscience
- advance neuroscience educational initiatives
- spearhead fund-raising in interdisciplinary research and training
- coordinate public relations and community outreach programs

Vanderbilt Center for Bone Biology
1235 Medical Research Building IV
Nashville, TN 37232-0575
(615) 322-6110 • Fax (615) 343-2611
The Vanderbilt Center for Bone Biology was created to investigate diseases of bone and mineral metabolism, which are now widely recognized as major public health problems. Although the last 15 years have seen an upsurge of interest in these diseases, this is not yet reflected by major changes in the way these diseases are treated or our understanding of what causes them. Technologic improvements in investigating mechanisms involved in normal bone remodeling, together with the widespread use of genetic mouse models to identify molecules responsible for common bone diseases, may now make it possible to unravel the pathophysiology of some of these common bones diseases, and to develop new diagnostic tools and treatments that could change the quality of life for many patients. The new Vanderbilt Center for Bone Biology is in the process of assembling a cadre of well-trained investigators to address these issues, with an initial primary focus on osteoporosis, and cancers such as breast cancer, prostate cancer and myeloma, which frequently affect the skeleton, and pharmacologic enhancement of fracture repair.

Vanderbilt Center for Evidence-based Medicine
D-3300 Medical Center North, Nashville, TN 37232-2104
(615) 343-1912
www.ebm.vanderbilt.edu
The mission of the VCEBM is to promote understanding and adoption of evidence-based medicine. In Vanderbilt Medical Center, VCEBM is responsible for coordinating journal clubs and clinical department efforts to adhere to evidence-based practice. In the School of Medicine, it is responsible for classroom instruction and case study assisting students in the development of evidence-based practice core competence. It is also a research center funded through grants from public and private organizations. Recent investigations include the impact of pay for performance programs in increased adherence to evidence-based practices by hospitals and a national study of consumer understanding of evidence-based medicine. Finally, VCEBM conducts workshops for hospitals and medical leaders on optimal ways to achieve clinical transformation through evidence-based practices.

Vanderbilt Center for Stem Cell Biology
802 Light Hall, Nashville, TN 37232-0255
(615) 322-6769 • Fax (615) 322-6645
www.vcsfb.org
The mission of the Vanderbilt Center for Stem Cell Biology is to perform basic research necessary to learn how to produce new cell-based treatments from embryonic stem cells. To do this, it is necessary to first learn more about the biology of stem cells and how to direct their differentiation towards specific fates. The Vanderbilt Center for Stem Cell Biology is home for the Coordinating Center for the Beta Cell Biology Consortium. A major goal of this consortium of scientists is to learn how to make pancreatic beta cells from embryonic stem cells. If achieved, this would provide a new cell-based therapy for the treatment of diabetes.
The Vanderbilt Institute of Chemical Biology (VICB) is a trans institutional initiative between the College of Arts and Science and the School of Medicine. The mission of the VICB is to promote research and education in the application of chemistry to important biological problems. Strong basic science programs and outstanding research and clinical centers exist at Vanderbilt that focus on understanding the molecular basis of disease. As these molecular studies increase our understanding, application of the tools of chemistry (e.g., synthesis, analysis, structure-activity) can be used to design and develop new agents to detect, treat, and prevent disease. The VICB operates core facilities in high throughput screening, chemical synthesis, antibody generation and bioanalytical nuclear magnetic resonance to support these activities, and sponsors major research programs in drug discovery and proteomics.

Vanderbilt Institute for Integrative Genomics
529 Light Hall, Nashville, TN 37232
(615) 936-2660 • Fax (615) 936-2661
The Vanderbilt Institute for Integrative Genomics is a trans institutional initiative to foster use of genomic approaches for understanding the biology of disease. Genomics is the term applied to a broad array of scientific paradigms aimed at determining how the genome of an organism defines its physiological and pathological conditions. The goal of this institute is to harness the full power of genomics by integrating this emerging field with more traditional as well as other new scientific disciplines. The institute strives to bring the science of studying genomes into phase with existing experimental paradigms in developmental biology, vascular biology, cancer biology, genetics, cardiovascular medicine, neuroscience and other fields. This initiative is designed to capitalize on institutional strengths in four specific areas: functional genomics/model organism disease models, cancer genetics, epigenetics/chromatin biology and computational genetics. Integrative Genomics interfaces strongly with the Zebrafish Initiative funded by the Academic Venture Capital Fund, as well as as other existing programs.

Goals include strategic faculty recruitment, a seminar series highlighting innovative approaches to obtaining or using genomic information and support of strategic core facilities to enable cutting-edge research.

The Vanderbilt University Institute of Imaging Science
R-1302 Medical Center North, Nashville, TN 37232-2675
(615) 322-8359 • Fax (615) 322-0734
The Vanderbilt University Institute of Imaging Science is a university-wide interdisciplinary initiative that brings together scientists whose interests span the spectrum of imaging research – from the underlying physics of imaging techniques to the application of imaging tools to address problems such as understanding brain function. The new Institute has a core program of research related to developing new imaging technology based on advances in physics, engineering, and computer science. The Institute promotes applied research in collaboration with biomedical scientists and physicians who have interesting questions that imaging can address. In addition to high-field MRI and MR spectroscopy in human subjects, the Institute offers state-of-the-art options for small animal imaging.

Women's Reproductive Health Research Center
B-1100 Medical Center North, Nashville, TN 37232-2519
(615) 322-4196 • Fax (615) 343-7913
The Women's Reproductive Health Research Center at Vanderbilt was established in 1999 with principal funding from the National Institute of Child Health and Human Development as part of the Specialized Cooperative Centers Program on Reproduction Research. This center's program was established to promote clinically focused research programs at institutions that possess research strength in both basic science and clinical medicine. At Vanderbilt, the center has developed a program that is broadly focused on the promotion of reproductive health by increasing understanding of normal reproductive biology as well as the dysfunction associated with diseases such as abnormalities of pregnancy, dysfunctional uterine bleeding, endometriosis and cancer. In addition to support from the National Institutes of Health, the center receives substantial support from the Endometriosis Association for an international research and training program in endometriosis research. This training program supports collaborations among basic and clinical scientists within the multi-disciplinary research environment at Vanderbilt with a focus on the care of women with endometriosis and associated diseases. The over-arching goal of the center is to move scientific discoveries of reproductive disease from bench to bedside to improve the health care of women.
The Monroe Carell Jr. Children’s Hospital at Vanderbilt is a place to hope and a place to heal for patients and their families. Recognized as one of the premier children’s hospitals in the nation by *U.S. News & World Report* in 2008, Children’s Hospital cares for the sickest patients in the region and beyond.

Children’s Hospital is the most comprehensive children’s hospital in the state, providing pediatric services from neurosurgery, cancer treatments, organ and bone marrow transplants to repairing broken legs and everything in between. We treat all children regardless of ability to pay. Children’s Hospital has the only Pediatric Emergency Department in Middle Tennessee with more than 41,000 visits in FY08. More than 161,000 patients were seen in outpatient clinics the same fiscal year.

Constructed in 2004, the new freestanding children’s hospital is filled with the latest state-of-the-art equipment and information systems to provide the best treatments for patients and offers a variety of family accommodations to help fulfill its mission of family-centered care. Children’s Hospital is a non-profit teaching and research hospital and relies on the support of individuals and others to help children get well and on their way.

**CLINICS, PROGRAMS, AND SERVICES**

**Access Center**
(615) 936-4444 or (866) 936-7811 (toll-free)
The Monroe Carell Jr. Children's Hospital at Vanderbilt handles all pediatric admissions initiated by an outside physician or hospital through the Children's Access Center. For quality assurance the Center maintains recorded lines and may be reached 24 hours a day, seven days a week.

**Acute Care Clinic**
2200 Children's Way, Doctors' Office Tower, 8th Floor
(615) 936-2555
The Pediatric Acute Care Clinic (PACC) is open six days a week, providing acute medical care for the patients of Vanderbilt's Primary Care practice. The clinic is staffed by attending physicians, residents and nurse practitioners. In addition, PACC serves as a valuable educational environment for the house staff and medical students.

**Adolescent Consultation/Referral Services**
2200 Children's Way, Doctors' Office Tower, 8th Floor
(615) 936-7000
Consultation and referral services are available to assist primary care physicians and other health service providers in the care of their adolescent and young adult patients. Diagnostic and management opinions are offered to assist referring professionals in patient care.

**Adolescent Primary Care Clinic**
2200 Children's Way, Doctors' Office Tower, 8th Floor
(615) 936-7000
Physicians serve as primary care providers for adolescents from twelve to eighteen years of age. Primary care services include acute illness and injury, annual/school physical exams, immunizations, pre-participation exams for sports, routine gynecological care, evaluation of problems of emotional adjustment and stress, coordination of services for children with special needs.

**Allergy and Immunology Clinic**
2200 Children's Way, Doctors' Office Tower, 5th Floor
(615) 343-7617
The Pediatric Allergy and Immunology Clinic provides diagnostic services and care for children who are suspected to have allergy-related and immunodeficiency diseases. The specialists provide evaluation and diagnostic testing for infants and children with suspected humoral and cellular immunodeficiency diseases and specialty care for patients with genetic immunodeficiency diseases.
**Asthma Diagnosis and Treatment Center**  
2200 Children's Way, Doctors’ Office Tower, 5th Floor  
(615) 343-7617  
The center provides a multidisciplinary approach to the evaluation and treatment of children and adolescents with pediatric asthma, and the education of the patients and their families. The goal for asthma care is to educate the child and family to use the least amount of proven medications to allow the children to engage in all age-appropriate activities.

**Behavioral Medicine Clinic**  
2200 Children's Way, Doctors’ Office Tower, 9th Floor  
(615) 936-7000  
The Behavioral Medicine Clinic provides outpatient behavioral health and counseling services to help patients and families cope with illness and symptoms that interfere with their lives. Patients who are dealing with recurrent abdominal pain, chronic fatigue syndrome, stress-related symptoms, anxiety, eating disorders and management of chronic diseases, such as diabetes are treated here. The goal is to help children and adolescents overcome or cope with symptoms so that they can live life to the fullest.

**Brain Tumor Program**  
2200 Children's Way, Doctors’ Office Tower, 6th Floor  
(615) 936-1762  
The acute and chronic care of brain tumor patients is addressed through a multidisciplinary program that permits a comprehensive care approach. Treatment programs and research in novel approaches are based on collaboration within the comprehensive multidisciplinary environment at Vanderbilt, collaboration with the Brain Tumor Program of the Vanderbilt-Ingram Cancer Center and collaboration with other institutions regionally and nationally.

**Bronchopulmonary Dysplasia Treatment Center**  
2200 Children's Way, Doctors’ Office Tower, 5th Floor  
(615) 343-7617  
As the survival of very low birth weight babies increases, the number of babies with a form of chronic lung disease also increases. This usually temporary form of chronic lung disease is called bronchopulmonary dysplasia or BPD. Our BPD Follow-Up program has been in place for 16 years, and patients are seen weekly until their BPD resolves.

**Cardiac Intensive Care Unit**  
(615) 936-4798  
The PCICU is a 12-bed unit within the 36-bed PCCU that is dedicated to the care of children with cardiovascular disease and complex congenital heart disease in the Perioperative period. Post-operative care of patients with complex congenital heart disease is staffed by a dedicated team of physicians and nurses with specialty training in cardiac critical care.

**Center for Advanced Maternal Fetal Care**  
2200 Children's Way, Doctors' Office Tower, 6th Floor  
(615) 936-3413 • (877) FETUSTN (1-877-338-8786)  
The Center for Advanced Maternal Fetal Care is a comprehensive fetal diagnosis and therapy center at Vanderbilt. The center has incorporated a clinical program in fetal diagnosis and therapy as well as clinical and basic research programs. Consultations by appropriate specialists are coordinated at a single site with Maternal Fetal Medicine, Pediatric Surgery, Neonatology, Pediatric Neurosurgery, Pediatric Cardiology, Pediatric Urology, Genetics and Diagnostic Imaging to decide what is best for them. Vanderbilt is at the forefront of fetal research and surgery as one of only three sites in the country to study in utero surgery for spina bifida. The advancement of fetal diagnosis and therapy has improved the plan of care and outcome of the fetus at risk.

**Child Life Services**  
(615) 322-0358  
Child Life Specialists work with patients and families to reduce the stress and anxiety that may be associated with the healthcare experience. They work to meet the developmental, psychosocial, educational, and emotional needs of patients and families by promoting normal growth and development through play and activity rooms; providing opportunities to help children enhance their self-esteem and retain appropriate independence; advocating for non-medical needs of patients and families; and increasing patients’ and families’ understanding of hospital experiences.

**Consultation Clinic**  
2200 Children's Way, Doctors’ Office Tower, 8th Floor  
(615) 936-2467  
The Pediatric Consultation Clinic is a service provided by Vanderbilt Children's Hospital to the patients and medical providers in Middle Tennessee and surrounding areas. Any physician or provider in need of assistance with diagnosis, treatment, or a second opinion may refer a patient.
Critical Care Unit
(615) 322-0928
The Pediatric Critical Care Unit is a 36-bed unit that provides highly specialized care for critically ill children. The patient population includes children with various conditions including neurological, respiratory, cardiovascular, gastrointestinal, renal/genitourinary and orthopedic, complex congenital anomalies, burns, traumatic and accidental injuries and/or multi-system involvement.

Cystic Fibrosis Diagnosis and Treatment Center
2200 Children's Way, Doctors' Office Tower, 5th Floor
(615) 343-7617
The Vanderbilt Cystic Fibrosis Diagnosis and Treatment Center is one of the Cystic Fibrosis Foundation's approved centers providing the expert care needed by those with Cystic Fibrosis. It is one of 110 centers in the network and is committed to top-notch, aggressive treatment. The center involves health care providers from many disciplines, including pulmonary medicine, nursing, psychology, social work, nutrition, pharmacy and physical therapy. There are also very close alliances with surgeons and gastroenterologists.

Dermatology Clinic
2200 Children's Way, Doctors' Office Tower, 8th Floor
(615) 936-2555
The Pediatric Dermatology Service at Children’s Hospital consists of both outpatient and inpatient consultations and ongoing care. Comprehensive evaluation and treatment of all types of skin diseases in children are offered, with physician referrals and self referrals accepted.

Developmental Medicine and Cognition
2200 Children's Way, Doctors' Office Tower, 9th Floor
(615) 936-0249
The clinics for the Division of Developmental Medicine and Cognition (formerly The Center for Child Development) provide interdisciplinary screening, medical evaluation and treatment and psychological testing and therapy for children (birth to 21 years) with a wide variety of developmental concerns, including developmental delay, cognitive impairment (mental retardation), autism, cerebral palsy, and ADHD and other behavioral problems. The Division offers specialized clinics for Down Syndrome, Fragile-X, spasticity, and genetics of developmental disabilities (Neurogenetics Clinic). Behavioral training for families of children with behavioral concerns is available in clinic and in homes. All of our specialists work with families to identify helpful resources in the community and the school system.

Down Syndrome Program
2200 Children's Way, Doctors' Office Tower, 9th Floor
(615) 343-3696 • (866) 900-3696
The Down Syndrome Clinic offers a multidisciplinary team that evaluates children (birth through 21 years of age). Referrals and recommendations are provided to families after the clinic has evaluated patients both medically and developmentally.

Early Childhood Anger Management Clinic
2200 Children's Way, Doctors' Office Tower, 8th Floor
(615) 936-2467
Persistent aggression during the early years is a risk factor for violence later in life. The American Academy of Pediatrics recommends that all young children be screened for aggression and counseling be provided as indicated. The clinic is available to provide consultation for families of young children less than 7 years of age with aggression and anger management problems. Contributing factors will be reviewed and treatment will be individualized. In general, pharmacologic therapy will not be used, and there will be a strong emphasis on teaching behavior modification strategies.

Eating Disorders Program
2200 Children's Way, Doctors' Office Tower, 8th Floor
(615) 936-7000
The Eating Disorders Program is designed specifically for children, adolescents, and young adults. Services include evaluation and management of patients’ conditions, providing medical, psychological and nutritional treatment. Health care professionals are committed to a family-based, multi-disciplinary team approach, carefully orchestrated to include primary care physicians, psychologists, psychotherapists, nutritionists, psychiatrists and other pediatric specialists as needed.

ECMO Program
(615) 322-0519
Extracorporeal Membrane Oxygenation (ECMO) is a form of long-term heart-lung bypass used to treat infants, children, and adults in cardiac and/or respiratory failure despite maximal medical therapy. The ECMO program at Children’s Hospital has the capacity to run four ECMO patients at one time. The team includes doctors, registered nurses, and registered respiratory therapists.
Emergency Medicine
2200 Children’s Way
(615) 343-2996
The Children’s Emergency Department provides 24-hour access to experts in pediatric care to more than 40,000 patients seen annually. The Pediatric Emergency Department has 25 patient care areas plus three triage and 10 observation beds. The department is staffed by attending physicians, residents, social workers, and child life specialists.

Epilepsy Monitoring Unit
2200 Children’s Way, 7th Floor
(615) 322-3964
The two-bed unit is equipped with electroencephalogram (EEG) monitoring equipment and a video camera so that patients suspected of having a seizure disorder can get an accurate diagnosis and a refined treatment plan.

Gastroenterology, Hepatology and Nutrition Clinics
2200 Children’s Way, Doctors’ Office Tower, 9th Floor
(615) 322-7449
The Gastroenterology, Hepatology, and Nutrition Clinics provide comprehensive care, diagnostic evaluations/testing, management and treatment for a wide array of infants, children and young adults with nutritional, gastrointestinal or liver disorders.

General Surgery
2200 Children’s Way, Doctors’ Office Tower, 4th Floor
(615) 936-1050
Pediatric Surgeons are specially trained in the surgical care of infants and children, to treat fetal patients, newborns, infants, toddlers, children and young adults and to perform a broad range of general surgical procedures including minor office procedures, inpatient and outpatient procedures.

Pediatric Heart institute
2200 Children’s Way, Doctors’ Office Tower, 5th Floor
(615) 936-5500
A team of experienced pediatric cardiac surgeons, cardiac anesthesiologists, pediatric cardiologists and pediatric cardic intensivists work closely together to care for infants, children and young adults undergoing cardiac surgery. Nurses, respiratory therapists, child life specialists and social workers dedicated to the care of critically ill children attend to every need of the child undergoing heart surgery as well as the needs of the family. More than 500 children undergo heart surgery annually at Vanderbilt. Operations range from fairly straightforward closures of atrial or ventricular septal defects (ASDs or VSDs) to very complex operations including Norwood operation, Fontan operation and cardiac transplantation.

Infectious Disease Clinic
2200 Children’s Way, Doctors’ Office Tower, 6th Floor
(615) 322-2250
The Pediatric Infectious Disease Clinic is devoted to helping children who suffer from diseases such as HIV or tuberculosis. Except in rare cases, the clinic sees patients by referral only. Urgent visits are also available by contacting the Division; it is the clinic’s goal to provide a prompt consultative service for urgent visits.

International Adoption Clinic
2200 Children’s Way, Doctors’ Office Tower, 8th Floor
(615) 936-6800
The International Adoption Clinic provides consultation services for families and practitioners involved in the adoption of foreign-born children. Pre-adoption services include counseling, review of medical records, videos, travel information and vaccines. Post-adoption services include facilitating needed subspecialty consults and serving as a resource for the practitioners providing primary care for the adoptees.

Junior League Family Resource Center
2200 Children’s Way, Suite 2125, Nashville TN 37232
(615) 936-2558 • (800) 288-0391
The Junior League Family Resource Center offers health information and support to children, adolescents and their families. The center assists families in obtaining information about their child’s condition and other concerns. The center also provides information on community services and links families to local and national support and advocacy groups. The Flying Pig library within the Family Resource Center has health education books, DVDs and videos designed especially for children and teens.

Liver Transplant
2200 Children’s Way, Doctors’ Office Tower, 9th Floor
(615) 322-7449
Pediatric solid organ transplantation is provided by an experienced team dedicated to the delivery of highly specialized pediatric transplant care. The transplant team includes pediatric liver transplant surgeons, hepatologists, anesthesiologists, intensivists, transplant coordinators and pediatric nurses.
Lung Center
2200 Children's Way, Doctors’ Office Tower, 5th Floor
(615) 343-7617
The Lung Center has experts in the diagnosis and management of acute and chronic lung problems in infants, children and adolescents. The Lung Center is also the home of the Cystic Fibrosis Diagnosis and Treatment Center, Asthma Diagnosis and Treatment Center, Bronchopulmonary Dysplasia Treatment Center, Pediatric Sleep Disorders Program, Flexible Bronchoscopy Service and special services to technology-dependent children. The faculty and staff of the Lung Center strive to provide the highest quality and family-focused care to the children and families in our region.

Neonatal Intensive Care Unit
(615) 322-0963
Over 1,200 infants are treated in the Neonatal Intensive Care Units at Vanderbilt each year. There are two NICU’s at Vanderbilt – a 60-bed NICU on the fourth floor of Children's Hospital and the 18-bed Stahlman NICU at Vanderbilt University Hospital for critically ill infants born at Vanderbilt. The NICU is classified by AAP as level 3-C and provides care to complex, often premature, infants.

Neurology Clinics
2200 Children's Way, Doctor’s Office Tower, 9th Floor
(615) 936-5536
The pediatric neurology faculty offer consultation services by evaluating and working with patients and families who are dealing with illnesses, disorders and conditions that involve the nervous system (brain, spinal cord, nerves and muscles).

Neuromuscular Clinic
2221 Pierce Avenue, B-1053, Nashville, TN 37232
(615) 322-7246
The Neuromuscular Clinic, sponsored by the Muscular Dystrophy Association (MDA), offers an interdisciplinary team approach toward initial diagnosis and follow-up care. Children and adults with neuromuscular disorders included in MDA’s program have access to a clinic staffed by neuromuscular disease specialists.

Neurosurgery
2200 Children's Way, Doctors' Office Tower, 9th Floor
(615) 322-6875
The Pediatric Neurosurgical Service treats patients with the following neurosurgical conditions – brain tumors, congenital malformations of the brain and spinal cord, epilepsy, head trauma, hydrocephalus, myelodysplasia (Spina Bifida), spasticity and cerebral palsy and vascular malformations, including AVMs, aneurysms, Vein of Galen, cavernous malformations and moyamoya syndrome.

Orthopaedics
2200 Children's Way, Doctors’ Office Tower, 4th Floor
(615) 343-5875
The Pediatric Orthopaedic Service provides extensive outpatient and inpatient experience in the diagnosis and treatment of all musculoskeletal diseases of children, including simple and complex fractures, pediatric and adolescent sports injuries, spine deformities and the treatment of scoliosis, congenital bone deformities, hip disorders, congenital foot disorders and osteomyelitis.

Otolaryngology
Medical Center East, South Tower
1215 21st Avenue South, 7th Floor, Suite 7202
(615) 322-6180
Pediatric Otolaryngology treats children with chronic ear infections, tonsil and adenoid infections, asthma and allergy/sinus problems, congenital airway problems and other birth defects of the head and neck.

Pediatric and Neonatal Transport Services: Critical Care and Back Transport
1-800-288-8111
The Neonatal Transport Program provides critical care and back transport services to infants from birth to 30 days of age. A neonatal specialty team provides transport via neonatal-specialty ground ambulances, helicopter or fixed wing aircraft from hospitals in TN, KY and AL. Equipment and supplies are available to assess and treat critically ill and recovering newborn infants during transport to and from the Hospital.

Plastic Surgery
3630 The Vanderbilt Clinic, 1301 22nd Avenue South
Nashville, TN 37232-3631
(615) 322-2350
The Plastic and Reconstructive Center at Children's Hospital offers diagnosis and treatment for cosmetic and reconstructive problems in children and adolescents who require major and minor alterations of their physical appearance.
Primary Care Practice
2200 Children’s Way, Doctors’ Office Tower, 8th Floor
(615) 936-2555
The Vanderbilt Pediatric Primary Care Practice provides comprehensive well-child care to the infants and children of Middle Tennessee. The clinic offers physical examinations, immunizations, vision/hearing screening and counseling/guidance for parents and children and also provides EPSDT (Early Periodic Screening, Diagnosis, and Treatment) services.

Rehabilitation Services
VanderbiltHealth One Hundred Oaks
719 Thompson Lane, Suite 21000, Nashville, TN 37204
(615) 343-6445
The Department of Rehabilitation Services offers occupational therapy, physical therapy, and speech therapy to patients who have impairments, functional limitations, disabilities, or changes in physical function and health status resulting from injury, disease or other causes. They provide therapy for children who have athletic injuries and are anxious to return to their normal activities and the game they love.

Rheumatology Clinic
2200 Children’s Way, Doctors’ Office Tower, 6th Floor
(615) 322-4397
The Rheumatology Clinic provides outpatient consultation and subspecialty care for children and adolescents with rheumatologic and inflammatory diseases.

Sleep Disorders Program
2200 Children’s Way, Doctors’ Office Tower, 5th Floor
(615) 322-7246
The Division of Pediatric Pulmonary Medicine has developed a Pediatric Sleep Disorders Program in partnership with the Department of Neurology and the Department of Internal Medicine. The Pediatric Sleep Clinic evaluates pediatric patients with possible obstructive sleep apnea, altered sleep patterns, and difficulty falling asleep and staying asleep.

Spina Bifida Program
2200 Children’s Way, Doctors’ Office Tower, 6th Floor
(615) 936-2457 or 800-526-4299
Spina Bifida is one of the most complicated and prevalent of congenital conditions. This clinic is organized to respond to the many diverse medical needs of people with Spina Bifida in one convenient setting.

Tennessee Lions Eye Center
2311 Pierce Avenue, Nashville, TN 37232
(615) 936-1034
The Tennessee Lions Eye Center offers subspecialty eye care for children from birth through 18 years. Inpatient consults are done at the request of other pediatric specialists who attend patients in the Children’s Hospital. Outpatient services include vision evaluation for newborns with a family history of eye disease, evaluation of surgical and non-surgical treatment for eye muscle disorders and double vision, orthoptic evaluation and treatment, pediatric contact lens fitting, and annual and preschool eye exams.

Trauma Program
2200 Children’s Way
(615) 936-1050
The Vanderbilt Trauma Service at the Children’s Hospital provides comprehensive care to pediatric trauma victims of all ages. Timely access to specialized care is often a matter of life and death in trauma situations, particularly when they involve children. Teams of experts in pediatric trauma care, including pediatric surgeons, emergency medicine physicians, intensivists, nurses, and child and family life specialists mobilize rapidly once alerted that a child victim of trauma is enroute to the emergency department. In most cases, the team is in place and waiting in the trauma bay prior to the child’s arrival and is able to relay instructions to the emergency response team or to the referring physician.

University Pediatrics:
General Pediatrics
539 Medical Arts Building
1211 21st Avenue South, Nashville, TN 37232-3909
(615) 936-3939

Urology
2200 Children’s Way, Doctors’ Office Tower, 4th Floor
(615) 936-1060
Pediatric Urologists care for children with any problems associated with the urinary tract and/or genitalia. Managing a diversity of problems ranging from complex genital and urinary tract disorders to socially debilitating voiding abnormalities requires the technical skill of a micro-surgeon with the reassuring touch of a friend and confidant.

Vanderbilt Childhood Cancer Program
2200 Children’s Way, Doctors’ Office Tower, 6th Floor
(615) 936-1762
The Vanderbilt Childhood Cancer Program sees patients at the Monroe Carell Jr. Children’s Hospital at Vanderbilt. It is part of the Vanderbilt-Ingram Cancer Center, one of
41 National Cancer Institute-designated Comprehensive Cancer Centers and a member of the National Comprehensive Cancer Network. The program includes dedicated faculty and staff who work together as a team in the diagnosis and treatment of children with cancer or blood diseases.

**Vanderbilt Children’s Health Improvement and Prevention (VCHIP)**

3401 West End Avenue, Suite 470W, Nashville, TN 37232  
(615) 936-5317

The VCHIP program is designed to focus on children’s health through community partnerships with a multi-disciplinary approach. Its goal is to give all children the very best chance at developing into healthy and productive adults and developing meaningful programs with measurable results showing that behaviors can be changed for the better. Teams of physicians, nurses, epidemiologists, nonprofits, business leaders, statisticians and community volunteers meet regularly to help identify those needs that can be addressed most effectively within the three primary advocacy and outreach areas: Healthy Children, Safe Children and Strong Families.

**Vanderbilt Eskind Pediatric Diabetes Clinic**

8210 Medical Center East, South Tower  
1215 21st Avenue South, Nashville, TN 37232-8147  
(615) 322-7842

The program provides comprehensive diabetes management, diabetes education, and self-management training for children and teens with diabetes and their families. On-going care and education is available for families new to the area or new to this program. Our staff works closely with the family’s primary care physician to provide expert guidance in diabetes treatment through adolescence.

**Weight Management Clinic**

2200 Children’s Way, Doctors’ Office Tower, 8th Floor  
(615) 936-5326 or (866) 577-5326

The clinic provides evaluation and treatment of childhood obesity. The vast majority of children become obese from unhealthy lifestyle and behavioral choices. The treatment approach includes lifestyle changes, since there is no approved medical therapy for treating obesity in children. The Weight Management clinic provides a multidisciplinary team approach to treatment.
