How to Connect to the Wireless Network

Vanderbilt University Medical Center

For Windows 7

1. Click on the **Wireless** icon on the bottom right corner of the toolbar.

2. A window will open, displaying the networks that are currently available.

3. Click **Open Network & Sharing Center**.

4. Click **Setup a Connection or Network**.

5. Choose **Manually Connect to a Wireless Network**, and click **Next**.

6. For **Network Name**, type **vummiv**.

7. For **Security Type**, choose **No authentication (Open)**.

8. For **Encryption Type**, choose **None**.

9. Select the check boxes to **Start this connection automatically** and **Connect even if the network is not broadcasting**.

10. Click **Next**.

11. Close the **Connection Wizard**.

12. You should now be able to access the wireless network.

For Windows XP

1. Right-click the **Wireless Connection** icon in the lower right corner of the screen.

2. Choose **View Available Wireless Networks**.

3. Click **Change Advanced Settings** in the lower left of the page.

4. On the **Wireless Networks** tab, click **Add**.

5. Type **vummiv** in the **SSID** text box.

6. For **Data Encryption**, choose **Disabled**.

7. For **Network Authentication**, choose **Open**.

8. Select the check box for **Connect even if the network is not broadcasting**.

9. Click **OK**, and close the **Network Properties** window.

10. You should now be able to access the wireless network.

For Windows Vista

1. Click **Start**.

2. Click **Connect To**.

3. Choose **Setup a connection or network**.

(continued)
4. Select **Manually connect to a wireless network**, and then click **Next**.

5. For **Network Name**, type **vummiv**.

6. For **Security Type**, choose **No authentication (open)**.

7. Select the check boxes for **Start this connection automatically** and **Connect even if the network is not broadcasting**.

8. After receiving the **Successfully added vummiv message**, click **Connect To**.

9. Click on **vummiv**.

10. You should now be able to access the wireless network.

**For an iPhone, iPod touch, or iPad**

1. Touch the **Settings** icon.

2. Touch the **Wi-Fi** icon. Make sure that **Wi-Fi** is set to **On**.

3. On the **Wi-Fi Networks** page, under **Choose a Network**, select **Other**.

4. For **Name**, type **vummiv**.

5. For **Security**, select **None**.

6. Click **Join**.

7. You should now be able to access the wireless network.

**For Mac OSX**

1. Click on the **Wi-Fi** icon located in the top right corner of the screen.

2. Make sure that **Airport** is set to **On**.

3. Click **Join Other Network**.

4. For **Network Name**, type **vummiv**.

5. Click **Join**.

6. You should now be able to access the wireless network.
