SYMPHILIS TESTING – NEW TEST REPLACES RPR SCREEN

Effective February 1, 2016 – VUMC will implement a new Treponemal Antibody IgG Assay

Our new assay provides improved specificity and turnaround time vs traditional RPR screening.

Positive tests will be reflexed to an RPR titer, following the CDC-recommended guidelines for reverse sequence screening for syphilis infection.

NEW TEST INFORMATION:

1. Test Code: TAG
2. Test Name: Treponemal Antibody IgG
3. CPT Code: 86780
4. Specimen: Serum – Red Top Tube with or w/o gel separator
5. Test Performed: Monday-Friday
