OVERVIEW

Vanderbilt University Medical Center has built a strong reputation as a leader in medical education, research and patient care throughout the Southeast and the nation over the course of its 136-year history. At its heart, the Medical Center is driven by discovery incorporating new knowledge into innovation in patient care and physician and nurse education.

MEDICAL EDUCATION

The School of Medicine, which originally shared faculty with the University of Nashville, awarded its first Vanderbilt medical degrees in 1875. Since the early days, a Vanderbilt medical education has been held in high esteem among its peer institutions, and that legacy continues.

The School of Medicine attracts the most accomplished and talented students in the country. They are drawn by the quality of the training, the excellence of the faculty, the collegial atmosphere between faculty and students, and the close personal attention students receive. The diverse first-year class of 2014, selected from a pool of more than 5,000 applicants, represents 31 states and undergraduate degrees from 59 colleges and universities. The School of Medicine placed 15th among 126 medical schools in *U.S. News & World Report's* 2010 survey of America's Best Graduate Schools.

NURSING EDUCATION

The School of Nursing, founded in 1908, was one of the nation's first nursing programs to incorporate its curriculum into a liberal arts degree. The School just completed its centenary decade as one of the country's premier nursing schools, listed among the Top 20 by *U.S. News & World Report*. The School offers multiple entry options including the "pre-specialty" program that has served as a model for schools of nursing around the country.

The School is a leader in technological innovation with state-of-the-art nursing informatics lab and the application of evolving technologies such as patient simulators in the classroom. Through recent grant-funded research, the School will participate in a collaborative research project to develop simulation management software for nursing faculty using the virtual reality environment of Second Life. The School of Nursing's commitment is to embrace change and use technology and advanced nursing informatics to deliver superior teaching and patient care.

The School of Nursing offers an extensive nurse practice faculty network of owned and affiliated clinics within the community. The School's research and scholarly activity are leading the nursing discipline forward with evidence-based education and nursing interventions that are key to providing high-quality patient care.

RESEARCH

Biomedical research at Vanderbilt has long helped to advance medicine. The School of Medicine claims two Nobel Laureates: Earl W. Sutherland Jr., in 1971, for his discovery of the metabolic regulating compound cyclic AMP, and Stanley Cohen, in 1986, for his discovery (with a colleague) of epidermal growth factor. The Medical School's reputation for outstanding research is reflected in the federal and private support it receives. Because of the creativity of the faculty, the School of Medicine ranked No. 10 among U.S. medical schools for National Institutes of Health funding for federal fiscal year 2009. VUMC research funding from all sources has doubled since 2001. Support for competitive research grants from all external sources has grown to more than \$445 million for fiscal year 2010. In addition, five School of Medicine departments ranked in the top 10 nationwide in scholarly output in 2006-07, calculated in terms of faculty publications, citations, awards and grants. Major translational research at Vanderbilt is moving discoveries from the bench to the bedside and will transform health care and health care delivery.

Vanderbilt, in partnership with Meharry Medical College, has received a \$50 million NIH award to support clinical and translational research infrastructure and to translate discoveries in research to improve human health.

At the School of Nursing, faculty researchers collaborate with investigators from across the Medical Center, University and the world. School of Nursing researchers accomplish their mission through studies that emphasize clinical and health services interventions.

Recent research programs have focused on the health workforce, quality and safety across the health care system, prevention and treatment of lymphedema, congestive heart failure symptom management, premature births, child health, death and dying, and acute and chronic pain. The School prepares future researchers primarily through its Ph.D. and post-doctoral education programs.

PATIENT CARE

In 2010, The Vanderbilt Clinics had more than 1.5 million patient visits, and more than 53,000 patients were admitted to the Vanderbilt Hospitals. Vanderbilt University Hospital and The Vanderbilt Clinics consistently rank among the premier health care facilities in the United States. VUH and the Monroe Carell Jr. Children's Hospital at Vanderbilt are two of only three Tennessee hospitals included on the list of "America's Best Hospitals" compiled by *U.S. News & World Report*. Vanderbilt is the only Tennessee health care provider with 10 of its adult medical specialties ranked among the nation's top 50 by *U.S. News*. VUH was named among the nation's top 100 hospitals by Thomson Reuters.

U.S. News & World Report named Vanderbilt's specialty programs in heart and heart surgery; geriatrics; gastroenterology; gynecology; cancer; kidney disease; ear, nose and throat; endocrinology; respiratory disorders; and urology as among the best programs nationally. In 2006, the American Nurses Credentialing Center designated Vanderbilt as Nashville's first Magnet hospital.

Among Vanderbilt's specialty programs is the Vanderbilt-Ingram Cancer Center, the only Comprehensive Cancer Center designated by the National Cancer Institute in Tennessee that conducts research and cares for adults and children. VICC provides innovative, multi-disciplinary care for patients and families along with comprehensive programs in discovery science; translational, clinical and population-based research; and prevention, early detection and survivorship. It is a member of the National Comprehensive Cancer Network, a nonprofit alliance of the world's 21 elite centers collaborating to improve cancer care for patients everywhere.

Additionally, VUMC's Level I Trauma Center, comprehensive Regional Burn Center and LifeFlight air emergency transport program offer critical trauma care to a three-state region.

The Monroe Carell Jr. Children's Hospital at Vanderbilt is the most comprehensive children's hospital in the multi-state area and is dedicated to meeting the unique health care needs of children, from newborns to young adults, by providing primary and sub-specialty services. The Children's Hospital serves as a regional referral center, and has been recognized by *U.S. News and World Report* as one of the best children's hospitals in the nation. Furthermore, the Leapfrog Group has ranked the Children's Hospital one of seven pediatric "Top Hospitals" in the nation for providing excellent patient safety.

The Vanderbilt Heart and Vascular Institute has become one of the nation's foremost cardiac research programs. *U.S. News & World Report* recently ranked the Institute 24th on its list of Best Hospitals in the Heart and Heart Surgery category.

Vanderbilt Transplant Center is one of the largest and most respected in the Southeast, with more than 400 solid organ and bone marrow transplants performed each year.

The Nurse Faculty Practice network includes two primary care centers, three school health clinics, two women's health centers and ten employer-based care centers. During fiscal year 2010, these clinics treated more than 45,000 patients. The Faculty Nurse Midwifery Service delivered 900 babies at VUMC. All clinics are staffed by faculty nurse practitioners and faculty nurse midwives.

COMMUNITY IMPACT

Vanderbilt University employs 22,500 and has an annual regional economic impact of approximately \$6.5 billion. Vanderbilt will provide more than \$325 million in uncompensated and charity care to those unable to pay for their own care. It is the largest provider in the region under TennCare, the state's Medicaid program for the poor and uninsured.

Vanderbilt consistently leads all private universities in the country in support of the United Way and Combined Charities. The Medical Center also leads one of the country's largest fundraising efforts for the American Heart Association. Vanderbilt gives to its community but it also receives support from it. In fiscal year 2010, the Medical Center received more than \$48.7 million in philanthropic gifts.

VUMC provides such community services as the Adolescent Substance Abuse Program, nurse-managed primary care to an underserved urban neighborhood, the maternal-infant health care outreach workers' program in Appalachia, and the Tennessee Poison Center, an independent agency based at Vanderbilt and partially funded by VUMC.

MAJOR FACILITIES

In addition to the School of Medicine (page 17), the School of Nursing (page 28), Vanderbilt University Hospital, The Vanderbilt Clinic (page 32), and Monroe Carell Jr. Children's Hospital at Vanderbilt (page 88), major components of VUMC are as follows:

Annette and Irwin Eskind Biomedical Library (EBL)

2209 Garland Ave., Nashville, TN 37232
(615) 936-1401
mc.Vanderbilt.edu/diglib

This state-of-the-art library gives patrons access to information worldwide through the latest in informatics retrieval and management technology. The Eskind Biomedical Library incorporates knowledge management principles into education, research and patient care. The Informatics Center's Knowledge Management team provides high-level data and knowledge organization skills. Current knowledge management services include expert genetics/molecular biology information assistance to support biomedical research and in-depth clinical evidence to inform the development of local and national patient care guidelines.

Bill Wilkerson Center for Otolaryngology and Communication Sciences

Medical Center East,
South Tower, Suite 6310
1215 21st Ave. S., Nashville, TN 37232
(615) 936-5000

The center is devoted to comprehensive patient care, education and research in communication disorders and diseases as well as ailments of the ear, nose and throat, head and neck. Its programs are highly regarded nationally; *U.S. News & World Report's* 2008 survey of the nation's best hospitals[®] ranked VUMC's Otolaryngology program 14th in the category of ear, nose and throat. Bill Wilkerson's audiology program ranked 1st among 118 other programs, and its speech pathology tied for 5th out of 225 programs.

Comprehensive Spine Center

Vanderbilt Health One Hundred Oaks
719 Thompson Lane, Suite 23108
Nashville, TN 37204
(615) 875-5100

VanderbiltSpine.com

The center provides all aspects of spine care including neurosurgery, orthopaedic surgery and non-surgical care.

Dayani Center for Health and Wellness

1500 Medical Center Drive
Nashville, TN 37232 (615) 322-4751
DayaniCenter.org

The center is a medically-based fitness/health promotion center that specializes in modifying risk factors for cardiovascular disease, weight management, stress, sedentary lifestyle and smoking.

Orthopaedic Institute

Medical Center East, South Tower, Suite 4200
Nashville, TN 37232-8774
VanderbiltOrthopaedics.com

This multidisciplinary practice offers sports, trauma, oncology, foot and ankle, hand, joint, general orthopaedics and physical and occupational therapy services.

Sports Medicine Center

Medical Center East, South Tower, Suite 3200
1215 21st Ave. S.
Nashville, TN 37232-8828
(615) 322-7878, Fax (615) 936-5931
VanderbiltSportsMedicine.com

The center brings a full-service medical, surgical and rehabilitative approach to acute and chronic musculoskeletal injuries.

Stallworth Rehabilitation Hospital

2201 Children's Way, Nashville TN 37212
(615) 320-7600 • Fax (615) 327-9289
Admissions: (615) 963-4030
Referral fax (866) 558-2081
VanderbiltStallworthRehab.com

Stallworth provides comprehensive inpatient rehabilitation services for adults and children over age 6 with neurological, orthopaedic and other injuries as well as chronic conditions. With state-of-the-art treatment technology, the hospital specializes in treating stroke, brain and spinal cord injury, multiple traumas, amputees, hip fracture and other diagnoses. Designated as a Joint Commission Disease Specific Certified Stroke program, Stallworth consistently exceeds national benchmarks for patient satisfaction and functional outcomes. This hospital is a joint venture with HealthSouth Corporation.

Transplant Center

801 Oxford House, Nashville, TN 37232-4753
(615) 936-0388
VanderbiltTransplant.com

The Transplant Center is a multidisciplinary alliance of transplant specialists. Each transplant program within the center represents a collaboration of medical and surgical professionals working together in the best interests of the transplant patient.

Vanderbilt Center for Better Health

3401 West End Ave. Suite 290
Nashville, TN 37203-8670
(615) 322-6591 • Fax (615) 322-8844
mc.Vanderbilt.edu/vcbh

The VCBH seeks to accelerate change in health care. VCBH helps clients design plans to reduce overall cost and time to benefit from role-process-technology change; to rapidly build stakeholder cooperation and collaborative relationships; to increase quality while reducing costs in healthcare delivery; and to reduce risk in business planning. Current research interests include systems approaches to care; personal health applications; public and personal services through health information exchange; medical home; and consumerism trends in health care.

Vanderbilt Heart and Vascular Institute (VHVI)

Medical Center East, South Tower, Suite 5209
1215 21st Ave. S.
Nashville, TN 37232-8802
(615) 322-2318 • Fax (615) 343-1786
VanderbiltHeart.com

719 Thompson Lane, Suite 22100
Nashville, TN 37204
(615) 322-2318 • Fax (615) 343-1786

The VHVI is an integrated heart and vascular program offering diagnosis, medical treatment, minimally invasive therapies, surgical intervention and disease management, state-of-the-art techniques and personalized treatment programs.

Vanderbilt-Ingram Cancer Center (VICC)

2220 Pierce Ave.
Nashville, TN 37232
(800) 811-8480 Clinical Trials Information Program
Director's Office (615) 936-1782
Fax (615) 936-1790
VICC.org

The VICC is the only National Cancer Institute-designated Comprehensive Cancer Center in Tennessee that conducts research and cares for adults and children. It is one of only 40 such centers in the country. It is a member of the prestigious National Comprehensive Cancer Network, a nonprofit alliance of 21 of the world's elite cancer centers collaborating on improving cancer care for patients every-

where. VICC provides innovative, multidisciplinary cancer care for all types of cancer, with a special strength in clinical trials (especially Phase I studies) and treatment of colorectal, lung, breast, prostate, head and neck, and kidney cancers; as well as, melanoma, leukemias, lymphomas and sarcomas. The program unites nearly 300 physicians and scientists who generate more than \$180 million in annual support from public and private sources. The Cancer Center ranks among the top ten in competitive grant funding from the National Cancer Institute. VICC's specialized programs include the region's only Family Cancer Risk Service, its most comprehensive and experienced Blood and Marrow Transplant Program, and its only Clinical Trials Information Program staffed by experienced oncology nurses and linked to the NCI and the NCCN. The Center's Affiliate Network of more than 12 oncology practices and hospitals offers cancer clinical trials in home communities, and its REACH for Survivorship Program offers the nation's only comprehensive service for cancer survivors who have completed treatment, regardless of age at diagnosis, type of cancer or where treatment was received.

Vanderbilt Psychiatric Hospital

1601 23rd Ave. S., Nashville, TN 37212

(615) 320-7770, (800) 365-2270

VanderbiltPsychiatric.com

This facility provides inpatient and hospitalization services to people of all ages with psychiatric and substance abuse problems. Services include 24-hour crisis assessment and a year-round accredited school for children and teens.

MEDICAL CENTER AFFAIRS COMMITTEE

Orrin H. Ingram

*Chairman of the Medical Center Affairs Committee
President and CEO, Ingram Industries, Inc., Nashville*

Levi Watkins, Jr., M.D.

*Vice Chairman, Vanderbilt University Board of Trust
Cardiac and Thoracic Surgeon, Baltimore, MD*

Dennis C. Bottorff

Chairman, Council Ventures, Nashville

Mark F. Dalton

*President and Vice Chairman, Tudor Investment Corporation,
Greenwich, CT*

John R. Ingram

Chairman, Ingram Industries, Inc., Nashville

Martha R. Ingram

*Chairman, Vanderbilt University Board of Trust
Chairman, Ingram Industries, Inc., Nashville*

Edith C. Johnson

Civic Leader, Nashville

Jackson W. Moore

*Executive Chairman, Regions Financial Corporation
Birmingham, AL*

Joe L. Roby

Chairman Emeritus, Credit Suisse, New York, NY

Eugene B. Shanks Jr.

Financial Services Consultant, Greenwich, CT

Cal Turner

Chairman, Turner Family Foundation, Nashville

Andrew M. Wilson

Student, Baylor College of Medicine, Houston, TX

Rebecca W. Wilson

Civic Leader, Memphis

William M. Wilson

President, Cherokee Equity Corporation, Nashville

Nicholas S. Zeppos, J.D.

Chancellor, Vanderbilt University, Nashville

Overview

The School of Medicine at Vanderbilt University is committed to educating physicians who are firmly grounded in the basic medical sciences; who will provide compassionate care to their patients based upon their evaluation and application of the latest scientific research; and who will become leaders and scholars in their fields.

The Medical School's major strength is the quality of its students and faculty. The school provides a supportive and stimulating environment where students pursue individualized interests in clinical medicine and research. Graduating students regularly enter high quality residency programs of their choice throughout the country. The faculty, which represents a variety of specialties and research programs, has a national and international reputation for excellence in the biomedical sciences and clinical care.

Class Profile

Number of degrees granted in May 2010	198
2010–2011 Enrollment	435
First Year	106
Second Year	115
Third Year	117
Fourth Year	97
	118
	11

M.S. (Clinical Investigation)	19
M. S. (Speech-Language Pathology)	84
M.E. (Master of Education of the Deaf)	2
M. S. (Medical Physics)	7
M.D. (Master of Laboratory Investigation)	7
A.U.D.	

Profile of the First-Year Medical School Class

55 women, 51 men
 24 underrepresented minority students
 Residents of 31 states
 Undergraduate degrees from 59 colleges
 & universities
 Average MCAT score: 11.6
 Average GPA 3.8
 Tuition: \$39,900

Financial Aid (2009–2010)

One hundred percent of the medical students at Vanderbilt received financial aid. In total, \$19,770,331 was awarded to students. The School of Medicine funded \$8,812,036. Institutional aid is composed of need- and non-need-based scholarships and loans. Federal aid consists of Stafford and Graduate PLUS Loans. Students also use other sources such as alternative private loans. Students in the Class of 2010 who received financial aid graduated with a total average indebtedness of \$126,700, including their educational debts from college.

Meharry-Vanderbilt Alliance

Suite 511 Signature Center
 1900 Church St.
 Nashville, TN 37203-2106
 (615) 936-6070 • Fax (615) 322-8375
meharry-vanderbilt.org

Established in 1999, this nationally recognized historic collaboration between two diverse medical institutions and traditions has become a tremendous success. This partnership has focused on clinical science training, academic support, biomedical research and training, and health services initiatives with emphasis on disparities between the majority and minority populations. More than 50 students each year from both campuses have shared cross-campus experiences through clerkships, residencies and fellowships. The initiatives focus on five specific areas: undergraduate medical education, graduate medical education, graduate student Ph.D. training, student affairs, and information management and libraries. Collaborative research and training yielded over \$60 million in grants in fiscal year 2009 including the major partnership between

Meharry and Vanderbilt in the Clinical and Translational Science Award from the NIH. Joint projects have resulted in 284 publications, of which 92% were published post-creation of the Alliance. The Alliance has created translational and participatory community health initiatives which are benefiting the underserved community. The Alliance has also formed a Meharry-Vanderbilt Student Alliance which involves over 200 students from both campuses in educational, clinical and community service programs. MVSA is a student-run organization with joint institutional leadership and develops programs proposed by students.

DEPARTMENTS AND DEPARTMENT CHAIRS

Anesthesiology

Warren S. Sandberg, Ph.D.

Biochemistry (Interim)

Peter Guengerich, Ph.D.

Biomedical Informatics

Daniel R. Masys, M.D.

Biostatistics

Frank E. Harrell Jr., Ph.D.

Cancer Biology

Lynn M. Matrisian, Ph.D.

Cell and Developmental Biology (Interim)

William P. Tansey, Ph.D.

Emergency Medicine

Corey M. Slovis, M.D.

Hearing & Speech Sciences
Anne Marie Tharpe, Ph.D.

Medicine

Nancy J. Brown, M.D.

Microbiology and Immunology

Jacek J. Hawiger, M.D., Ph.D.

Molecular Physiology and Biophysics

Roger D. Cone, Ph.D.

Neurology

Robert L. Macdonald, M.D., Ph.D.

Obstetrics and Gynecology

Howard W. Jones III, M.D.

Ophthalmology and Visual Sciences

Paul Sternberg Jr., M.D.

Orthopaedics and Rehabilitation

Herbert S. Schwartz, M.D.

Otolaryngology

Roland D. Eavey, M.D., S.M.

Pathology

Samuel A. Santoro, M.D., Ph.D.

Pediatrics (Interim)

Margaret G. Rush, M.D.

Pharmacology

Heidi E. Hamm, Ph.D.

Preventive Medicine

William Schaffner, M.D.

Psychiatry

Stephan H.W. Heckers, M.D.

Radiation Oncology

Arnold W. Malcolm, M.D.

Radiology and Radiological Sciences

Jeremy J. Kaye, M.D.

Section of Surgical Sciences

R. Daniel Beauchamp, M.D.

Cardiac Surgery: John G. Byrne, M.D.

Neurosurgery: Reid C. Thompson, M.D.

Oral Surgery: Samuel J. McKenna, D.D.S., M.D.

Pediatric Surgery: Wallace W. Neblett III, M.D.

Plastic Surgery: R. Bruce Shack, M.D.

Surgery: Najj N. Abumrad, M.D.

Thoracic Surgery: Joe B. Putnam Jr., M.D.

Urology: Joseph A. Smith Jr., M.D.

ENDOWED CHAIRS

(as of June 30, 2010)

Accenture Chair in the Vanderbilt Center for Better Health

Mark E. Frisse, M.D., MBA

Dorothy Beryl and Theodore R. Austin Chair in Pathology

Samuel A. Santoro, M.D., Ph.D.

Betty and Jack Bailey Professorship of Cardiology

Vacant

Barry and Amy Baker Chair in Laryngeal,

Head and Neck Research

Wendell Gray Yarbrough, M.D.

Allan D. Bass Chair in Pharmacology

Randy D. Blakely, Ph.D.

Melinda Owen Bass Chair in Medicine

Gordon R. Bernard, M.D.

Bixler/Johnson/Mayes Chair in Psychiatry

Herbert Y. Meltzer, M.D.

James G. Blakemore Research Chair in Psychiatry

Richard C. Shelton, M.D.

James G. Blakemore Chair in Psychiatry

Stephan H.W. Heckers, M.D.

William L. Bray Chair in Urology

Joseph A. Smith Jr., M.D.

Frances and John C. Burch Chair in Obstetrics and Gynecology

Lonnie S. Burnett, M.D.

Lucius E. Burch Chair in Reproductive Physiology and Family Planning

Katherine E. Hartmann, M.D., Ph.D.

Betty and Lonnie S. Burnett Chair in Obstetrics and Gynecology

Howard Jones III, M.D.

Benjamin F. Byrd Jr. Chair in Oncology

Jennifer A. Pietenpol, Ph.D.

Ann and Monroe Carell Jr. Family Chair in Pediatric Cardiology

Thomas P. Doyle, M.D.

Chancellor's Chair in Medicine

Vacant

Chancellor's Chair in Medicine

Walter J. Chazin, Ph.D.

Amos Christie Chair in Global Health

Sten H. Vermund, M.D., Ph.D.

Sam L. Clark, M.D., Ph.D. Chair in Genomics

Vacant

Sam and Darthea Coleman Chair in Pediatric Ophthalmology

Sean P. Donahue, M.D., Ph.D.

Mark Collie Chair in Diabetes Research

Vacant

Cornelius Abernathy Craig Chair in the Vanderbilt-Ingram Cancer Center

Vacant

Craig-Weaver Chair in Pediatrics

Vacant

Hertha Ramsey Cress Chair in Medicine

John C. Gore, Ph.D.

Joe C. Davis Chair in Biomedical Science

Alvin C. Powers, M.D.

Annette Schaffer Eskind Chair in the Vanderbilt Kennedy Center

Elisabeth M. Dykens, Ph.D.

Gerald M. Fenichel Professorship in Neurology

Vacant

Edward and Nancy Fody Chair in Pathology

Michael Laposata, M.D., Ph.D.

John Clinton Foshee Distinguished Chair in Surgery

R. Daniel Beauchamp, M.D.

Gottlieb C. Friesinger II Chair in Cardiovascular Medicine

Vacant

Thomas F. Frist Sr. Chair in Medicine

John A. Oates, M.D.

Ernest W. Goodpasture Chair in Experimental Pathology for Translational Research

Cheryl W. Coffin, M.D.

Mary Phillips Edmonds Gray Chair in Stem Cell Biology and Tissue Regeneration

Vacant

Catherine McLaughlin Hakim Chair in Vascular Biology

T. Alp Ikizler, M.D.

George W. Hale Professorship in Ophthalmology

Paul Sternberg Jr., M.D.

Donna S. Hall Chair in Breast Cancer

Carlos Arteaga, M.D.

Paul V. Hamilton, M.D. Chair in Geriatrics

John F. Schnelle, Ph.D.

Paul V. Hamilton, M.D. and Virginia E. Howd Chair in Urologic Oncology

Vacant

Elsa S. Hanigan Chair in Pulmonary Medicine

John H. Newman, M.D.

Joel G. Hardman Chair in Pharmacology

Ronald B. Emeson, Ph.D.

Patricia and Rodes Hart Chair in Urologic Surgery

Michael John Cookson, M.D.

Ingram Cancer Research Professorships

Jordan D. Berlin, M.D.

Robert J. Coffey Jr., M.D.

David K. Cortez, Ph.D.

James E. Crowe Jr., M.D.

Scott W. Hiebert, Ph.D.

Daniel C. Liebler, Ph.D.

Jana Lauderdale, Ph.D., R.N.

Assistant Dean, Cultural Diversity

Patricia A. Peerman, M.S., R.N.

Assistant Dean for Enrollment Management

Craig R. Carmichel, M.S., CPA

Vice President, Academic and Research Enterprise

Sarah B. Ramsey, M.Ed.

Assistant Dean of Student Affairs

Clare Thomson-Smith, M.S.N., R.N., J.D., F.A.A.N.P.

Assistant Dean Faculty Practice

Overview

The School of Nursing values excellence and innovation in advancing the art and science of nursing in education, practice, research and informatics. These values are pursued through personal interactions and integrating technology, while embracing cultural and academic diversity.

The School offers dynamic curricula built on a foundation of multidisciplinary research and scholarly practice. The School shapes and responds to health care trends by creating partnerships that can be replicated in many settings. Nursing research fosters scholarly work that develops knowledge, and synthesizes information from multiple disciplines to enhance nursing and healthcare. *U.S. News & World Report* ranks the School among the nation's Top 20.

Class Profile

Nursing students	825	Special students	30
Pre-Specialty program	191	D.N.P. students	75
M.S.N. students	529	Ph.D. students	22

Financial Aid (FY10)

Last year, 153 Pre-Specialty level students received \$793,009 in scholarships and tuition assistance from the School of Nursing. Sources included endowed scholarships, foundations and the School's operating budget. There were 260 Specialty level students who received \$1,655,020 in scholarships and tuition assistance from school sources. Sixty Doctorate in Nursing Practice students received \$190,792 in tuition assistance from the School's operating budget. Eight Ph.D. students received \$225,792 in tuition assistance; three of those students received \$60,000 in fellowships from the School.

Two students received full funding from the National Health Service Corps and one student received partial funding from the Indian Health Services. The Federal Nursing Student Loan program awarded \$273,000 to nursing students. Pre-specialty and specialty students borrowed \$3,237,367 through the Federal Stafford Subsidized Loan Program, \$4,455,223 in Federal Stafford Unsubsidized Loans and \$9,128,344 in Federal Grad PLUS Loans. Both groups of students also borrowed \$230,122 in private loans.

Dual Degree Specialties

- M.S.N./M.Div.
- M.S.N./M.T.S.

Primary Care Programs

- Adult Nurse Practitioner
 - Cardiovascular Disease Prevention & Management
 - Palliative Care
- Adult Nurse Practitioner/Gerontological Nurse Practitioner
- Family Nurse Practitioner
- Pediatric Primary Care Nurse Practitioner

Specialty Care Programs

- Adult Acute Care Nurse Practitioner
- Neonatal Nurse Practitioner
- Family Nurse Practitioner/Acute Care Nurse Practitioner
- Nurse Midwifery
- Nurse Midwifery/Family Nurse Practitioner
- Pediatric Acute Care Nurse Practitioner
- Psychiatric Mental Health Nurse Practitioner
- Women's Health Nurse Practitioner
- Women's Health Nurse Practitioner/Adult Nurse Practitioner

Management Programs

- Health Systems Management
- Nursing Informatics

Special Programs

Senior Year in absentia with:

Birmingham Southern College

Covenant College

Mary Baldwin College

Vanderbilt University - Peabody College

Vanderbilt University - A&S College

Bryan College

Maryville College

Fisk University

Affiliation Agreements:

University of the South

Rhodes College

Millsaps College

Partnership Program:

BSN at Fisk University

Center for Research Development and Scholarship

The Center for Research Development and Scholarship at the Vanderbilt School of Nursing fosters a scholarly environment and offers services relevant to our researchers while considering science's future directions.

Clinical Facilities

In addition to VUMC and the Nashville Veterans Administration Medical Center, students may have clinical assignments in public hospitals, private hospitals, mental health or community health agencies, military hospitals, nursing homes and private practices in Middle Tennessee and across the country.

Chairs

Fully Endowed Chairs in the School of Nursing

Centennial Independence Foundation Chair in Nursing

Elizabeth Weiner, Ph.D., R.N., B.C., F.A.A.N.

Julia Eleanor Blair Chenault Chair in Nursing

Ann Minnick, Ph.D., R.N., F.A.A.N.

Independence Foundation Chair in Nursing Education

Lorraine Mion, Ph.D., R.N., F.A.A.N.

Martha Rivers Ingram Chair in Nursing

Barbara Given, Ph.D., R.N., F.A.A.N.

Valere Potter Distinguished Chair in Nursing

Peter I. Buerhaus, Ph.D., R.N., F.A.A.N.

Nancy and Hilliard Travis Chair in Nursing

Dean Colleen Conway-Welch, Ph.D., C.N.M.,

F.A.A.N., F.A.C.N.M.

VANDERBILT UNIVERSITY HOSPITAL ADMINISTRATION

Larry M. Goldberg, M.H.A.

Chief Executive Officer

Vanderbilt University Hospital

Charlotte B. Chaney, MBA, O.T.R.

Associate Hospital Director, Expansion & Transition

George DeLong, B.S.B.A.

Chief Supply Chain Officer and Associate Hospital Director,

Support Services/Supply Chain

Nancye R. Feistritzer, R.N., M.S.N.

Associate Hospital Director, Perioperative Clinical Operations

Pam O. Jones, R.N., M.S.N.

Chief Nursing Officer and Associate Hospital Director,

Patient Care Services, Vanderbilt University Hospital

Wendy Leutgens, R.N., M.S.N.

Associate Hospital Director, Professional Services

Allen B. Kaiser, M.D.

Chief of Staff, Vanderbilt University Hospital

Phyllis Ekdall, MMHC, MBA

Vice President of Finance, Clinical Enterprise

Bill Parsons, Ph.D.

Chief Administrator, Vanderbilt Psychiatric Hospital

Robin Steaban, M.S.N., R.N.

Associate Director, Director of Nursing, Vanderbilt Heart & Vascular Institute

Andrea White, M.S.H.A.

Administrative Director,

Business Planning & Administration

VANDERBILT CLINIC ADMINISTRATION

Paul Sternberg, Jr., M.D.

*Chief Medical Officer for
Adult Vanderbilt Medical Group Services*

David R. Posch, M.S.

*Chief Executive Officer of the Vanderbilt Clinic and
Executive Director, Vanderbilt Medical Group*

Margaret Head, R.N., M.S.N., MBA

*Chief Operating Officer and Chief Nursing Officer,
Vanderbilt Medical Group*

Sandy Cherry, MMHC

*Director, Vanderbilt Medical Group Strategy and
Program Development*

Phyllis Ekdall, MMHC, MBA

Vice President of Finance, Clinical Enterprise

Denis Gallagher, MBA

*Chief Administrative Officer,
Vanderbilt Medical Group Williamson*

Debra Grimes, MBA

*Associate Vanderbilt Medical Group Director,
Training and Organizational Development*

Tommy Hollinden, MMHC

Assistant Director, Finance

Mark E. Hubbard, B.S.

Director of Revenue, Vanderbilt Medical Group

Christopher W. Lee, M.S.H.A., MBA

*Associate Vanderbilt Medical Group Director,
Children's Ambulatory Services*

Julie Morath, R.N., M.S.

Chief Quality and Patient Safety Officer

Susan Moseley, R.N., M.S.N.

Administrative Director, Nursing

Racy P. Peters, R.N., M.S.N.

Associate Vanderbilt Medical Group Director, Quality and Access

Meyers Stallings, MBA

*Associate Vanderbilt Medical Group Director,
Performance Improvement*

Janice M. Smith, R.N., M.Ed.

Chief Administrator, One Hundred Oaks

Jeffrey P. White, M.H.A.

*Administrative Director, Vanderbilt Medical Group
Network Practices*

PATIENT CARE CENTERS/INSTITUTES

Bill Wilkerson Center

Malcolm G. Howell, Ed.D., MBA

*Administrator, Department and Clinic Operations
and Finance*

Roland D. Eavey, M.D., S.M.

Director

Anne Marie Tharpe, Ph.D.

Associate Director

Cancer

Carol Eck, R.N., MBA

Administrative Director

Jennifer Pietenpol, Ph.D.

Director

Beth A. Price, R.H.I.M.A., MBA

Chief Executive Officer

Carlos Arteaga, M.D.

Interim Director, Hematology/Oncology

Daniel Beauchamp, M.D.

Chair, Section of Surgical Sciences

Arnold Malcolm, M.D., FACR, MBA

Chair, Radiation Oncology

Clinical Neurosciences Institute

Candace Tillquist, M.A.

Administrative Director

P. David Charles, M.D.

Chief Medical Officer

Stephan H.W. Heckers, M.D.

Physician Director

Reid Thompson, M.D.

Physician Director

Robert L. Macdonald, M.D., Ph.D.

Physician Director

Emergency

Brent Lemonds, R.N., M.S., E.M.T.-P.

Administrative Director, Emergency Services, Specialty Nursing

Corey M. Slovis, M.D.

Physician Director

Gastroenterology/Endoscopy

Mary Duvanich, R.N., M.S.N., MMHC

Administrative Director

Richard M. Peek Jr., M.D.

Division Director

Michael Vaezi, M.D., Ph.D., M.S. (epi)

Clinical Director

General Medicine (Inpatient)

Christine Kennedy, R.N., M.S.N.
Administrative Director, Inpatient Medicine

Allen B. Kaiser, M.D.
Physician Director

Heart and Vascular Institute

Robin Steaban, R.N., M.S.N.
Associate Director, Director of Nursing

John G. Byrne, M.D.
Chairman, Department of Cardiac Surgery

Douglas B. Sawyer, M.D., Ph.D.
Interim Chief, Division of Cardiovascular Medicine

Keith B. Churchwell, M.D.
Executive Director and Chief Medical Officer

Medical Specialties

Wendy D. Monaci, MBA
Administrative Director, Ambulatory Care

David Hagaman, M.D.
Medical Director, Asthma Sinus Allergy Program

Stephen Raffanti, M.D.
Medical Director, Comprehensive Care Center

George Stricklin, M.D.
Division Chief, Dermatology

Patty Wright, M.D.
Medical Director, Infectious Diseases

Tony Langone, M.D.
Medical Director, Medical Specialties Clinic

Bonnie Slovis, M.D.
Medical Director, Pulmonary

Titus L. Daniels, M.D.
Medical Director, Travel Clinic

Ophthalmology

Brian R. Carlson, MBA, M.H.S.A.
Administrator

Paul Sternberg Jr., M.D.
Physician Director

Oral and Maxillofacial Surgery

Racy Peters, R.N., M.S.N.
Interim Director

Samuel J. McKenna, D.D.S., M.D.
Physician Director

Orthopaedics (Inpatient)

Devin Carr, M.S.N., R.N., A.C.N.S.-B.C.
Administrative Director

Kurt P. Spindler, M.D.
Physician Director

Orthopaedics and Rehabilitation (Outpatient)

Mark W. Miller, M.H.S.A., M.S.
Administrator, Department of Clinic Operations and Finance

Kurt P. Spindler, M.D.
Physician Director

Lisa M. Raines, B.S.
Administrative Director, Vanderbilt Bone and Joint

Perioperative Services

Nancye R. Feistritz, R.N., M.S.N.
Associate Hospital Director, Perioperative Clinical Operations

R. Daniel Beauchamp, M.D.
Warren Sandberg, M.D., Ph.D.
Executive Directors

Plastic/Cosmetic Surgery

Brian R. Carlson, MBA, M.H.S.A.
Departmental Administrator

R. Bruce Shack, M.D.
Physician Director

Primary Care/Center for Health Promotion and Disease Management

Betty J. Akers, B.S.
*Administrative Director, Ambulatory Care
Medicine Patient Care Center, Primary Care and
Eskind Diabetes Center*

Jim N. Jirjis, M.D., MBA
Medical Director, Adult Primary Care

Psychiatry

Michael J. Cull, Ph.D., M.S.N.
Administrative Director

Bill Parsons, Ph.D.
Chief Administrative Officer

Stephan H.W. Heckers, M.D.
Chair

Surgical Outpatient Services

CLINICAL CENTERS

Addiction Center

1601 23rd Ave. S., Nashville, TN 37212
(615) 327-7200

Housed at the Vanderbilt Psychiatric Hospital, the Addiction Center treats alcohol/drug dependence and associated psychiatric problems in patients age 18 and older. The program consists of a complete psychiatric and medical assessment and inpatient detoxification with follow-up treatment.

Asthma/Sinus/Allergy Program (ASAP)

2611 West End Ave., Suite 200, Nashville, TN 37203
(615) 936-2727

VanderbiltAllergy.com

ASAP was the first clinic in the nation to offer comprehensive treatment of all airway diseases and disorders in one central location. Patients can see specialists in allergy, pulmonary and ear, nose and throat.

Autism Resource Line

Vanderbilt Kennedy Center, 110 Magnolia Circle
Nashville, TN

(615) 322-7565 • (877) 273-8862

kc.Vanderbilt.edu/triad/vanderbiltautismline

The Autism Resource Line is a gateway to clinical and research programs and resources at Vanderbilt University. It serves families, caregivers, clinicians, educators and others in need of autism-related resources at Vanderbilt.

Bill Wilkerson Center

Medical Center East, South Tower
1215 21st Ave S.
Nashville, TN 37232-8718
(615) 936-5000

VanderbiltHealth.com/billwilkerson

The Vanderbilt Department of Otolaryngology provides a comprehensive medical and surgical program for patients with ENT and related disorders. It includes six clinical areas: Laryngology and the Voice Center, Otolaryngology, Rhinology, Head & Neck Surgery, Facial Plastic and Reconstructive Surgery and Pediatric Otolaryngology

Hearing and Speech Sciences treats patients in four clinical areas: Audiology, which offers testing, assessment and management of hearing loss for people of all ages; Speech-Language Pathology, which diagnoses and treats speech or language disorders caused by conditions such as developmental delay, cleft palate, stuttering and autism; the Pi Beta Phi Rehabilitation Institute, which provides speech, language, occupational and physical therapy for those who have sustained a traumatic brain injury; and the Cen-

ter for Childhood Deafness/Mama Lere Hearing School, which provides educational and hearing services to children with hearing loss. Hearing services are also provided at St. Thomas.

Audiology Clinic – (615) 322-4327

Center for Childhood Deafness – (615) 936-5262

Otolaryngology - (615) 322-7267

Pediatric Speech and Language Clinic – (615) 936-5000

Pi Beta Phi Rehabilitation Institute – (615) 936-5040

Vanderbilt Hearing at St. Thomas – (615) 222-6099

Voice Center - (615) 343-7464

Breast Center

Vanderbilt Health One Hundred Oaks

719 Thompson Lane, Suite 25000

Nashville, TN 37204

(615) 322-2064

VanderbiltHealth.com/breastcenter

The center offers total breast health care in one location. Services include mammography, breast ultrasound, MRI for diagnosis and screening of high risk patients, clinical breast examination, stereotactic biopsy, surgical evaluation, medical oncology, chemotherapy infusion and special multidisciplinary clinics newly diagnosed patients and for women at high risk of developing breast cancer.

Burn Center

11 South, Vanderbilt University Hospital

Nashville, TN 37232-7175

(615) 322-4590

Vanderbilt's 25-bed Burn Center is staffed by physicians, nurses, therapists and support personnel including psychiatrists, social workers and a chaplain. The Burn Center team provides the most advanced technology and treatment methods to burned adults and children.

Center for Clinical Improvement

2135 Blakemore Ave.

Nashville, TN 37212-3505

(615) 322-3366

The aim of the CCI is to improve care based on the Institute of Medicine's dimensions of care: Safe, Timely, Effective, Efficient, Patient-Centered and Equitable. The Center monitors clinical data and provides analysis to administrators. Staff members also teach quality improvement techniques to clinicians.

Center for Human Nutrition

Adult Practice

1211 21st Ave. S., 514 MAB
Nashville, TN 37232-2713
(615) 936-1288 • fax (615) 936-0006

The center gives intensive nutritional care to undernourished patients. Typical patients include those suffering from short bowel syndrome, inflammatory bowel disease, and eating disorders. CHN delivers quality nutrition care through patient care, research, and education.

Community Mental Health Center

Adult

2200 Village at Vanderbilt, Nashville, TN 37232-8646

Child/Adolescent

1601 23rd Ave. S., Nashville, TN 37232
(615) 936-3555

The CMHC provides mental health care to children, teens and adults. The Center specializes in serving individuals with serious and persistent mental illness.

Comprehensive Care Center

719 Thompson Lane, Suite 37189
Nashville, TN 37204

(615) 875-5111 • Fax (615) 875-5115

Pharmacy Fax Line: 615-875-3959

VanderbiltHealth.com/comprehensivecare

The clinic is an outpatient facility that advances and coordinates care, research and treatment for people living with HIV. It gives patients access to quality, cost-efficient outpatient medical care and support through the following services: medical evaluation and follow-up care; guidance and assistance with third party coverage issues and access to medical and dental care; access to screening and enrollment in clinical trials; medication reconciliation and adherence counseling; mental health services; nutrition assessment and guidance; and outreach/education.

Corporate Health Services

3319 West End Ave., Suite 950
Nashville, TN 37203

(615) 936-6074 or (888) 869-6757 • Fax (615) 936-6077

VUMC's access system responds to the needs of the worker's compensation community. Corporate Health Services is the single point of access for the workers' compensation needs for employers, case managers and adjusters. CHS also provides a preferred list of Vanderbilt providers, available in numerous specialties, for the worker's compensation community.

808 Oxford House, Nashville, TN 37232-4753
(615) 936-0388 • Fax (615) 936-6431
VanderbiltTransplant.com
The center is a multidisciplinary alliance of transplant specialists. Each transplant program in the center represents a collaboration of medical and surgical professionals working together in the best interests of the transplant patient. Clinical transplant services include kidney, pancreas, combined kidney/pancreas, heart, lung, liver, bone marrow and stem cell transplantation.

Trauma Patient Care Center

404 Medical Arts Building, Nashville, TN 37232-1750
(615) 936-0175 • Fax (615) 936-0185
Trauma Service Patient Referral: (615) 343-0976
The center provides cares for trauma victims from pre-hospital care through hospitalization and rehabilitation. Patients may be referred through the Vanderbilt Trauma Line, which provides 24/7 access to a Vanderbilt physi-

cian. Rapid transport from a referring hospital is arranged through the Vanderbilt LifeFlight Program. The Trauma Care Center has 31 beds on the 10th floor of Vanderbilt University Hospital.

Treatment and Research Institute for Autism Spectrum Disorders

Vanderbilt Kennedy Center, 110 Magnolia Circle
Nashville, TN 37203
(615) 322-7565
kc.Vanderbilt.edu/triad

TRIAD's threefold mission is service, training and research to understand and treat autism spectrum disorders. Evaluations are often offered through research studies and facilitated through clinics in the Division of Developmental Medicine, and the Department of Pediatrics. Training for families and for educators and other professionals is provided through workshops and consultation services.

Urology Clinic

3823 The Vanderbilt Clinic, Nashville, TN 37232
(615) 322-2880
Patients in the Adult Urology Clinic are seen by the clinical faculty members of the Department of Urologic Surgery. They provide complete medical and surgical disease management of the genitourinary system for men and women. A wide range of treatments and procedures are performed in the clinic including cystoscopies, prostate biopsies, vasectomies, penile injections, collagen injections, biofeedback, intravesical chemotherapy, and urodynamic studies.

Vanderbilt Heart and Vascular Institute (VHVI)

5209 Medical Center East, South Tower,
1215 21st Ave. S., Nashville, TN 37232-8802
(615) 322-2318 • Fax (615) 343-0512
VanderbiltHeart.com
Vanderbilt Health One Hundred Oaks
719 Thompson Lane, Suite 22100
Nashville, TN 37204
(615) 343-4142
The VHVI is a comprehensive heart and vascular program offering diagnosis, medical treatment, minimally invasive therapies, surgical intervention and disease management, state-of-the-art techniques and personalized treatment programs.

Vanderbilt Home Care Services, Inc.

2120 Belcourt Ave., Nashville, TN 37232-8600

(615) 936-0336

VanderbiltHealth.com/homecare

Home Care is an affiliate of VUMC and offers family-centered care with a team approach for patients and families needing specialized services.

Services are available to patients in Davidson, Cheatham, Robertson, Rutherford, Sumner, Williamson and Wilson counties. The staff includes registered nurses, physical therapists, occupational therapists, speech pathologists, social workers, certified nurse technicians and sitters. Intermittent and private duty services are available.

Vanderbilt-Ingram Cancer Center Family Cancer Risk Service

Vanderbilt Health One Hundred Oaks

719 Thompson Lane, Suite 22100

Nashville, TN 37204

(615) 343-0738

The service is an educational consultation service of VICC. The service is designed to help patients understand their personal and family cancer risk, facilitate genetic testing when appropriate, and develop a plan of action to reduce or manage their risks.

Vanderbilt Kennedy Center for Excellence in Developmental Disabilities

110 Magnolia Circle, Nashville, TN 37212

(615) 936-5118 VKC Family Outreach Center

(615) 322-8529 Tennessee Disability Pathfinder

VanderbiltKennedyCenter.org

The center provides services and training, conducts research and shares information to improve the lives of people with disabilities and their families. Programs include Arts and Disabilities, Behavior Analysis Consulting Services, Behavioral Health and Intellectual Disabilities Clinic, Camps, Family Outreach Center, Henderson Training Series for Educators, Hispanic and Multicultural Outreach, Learning Assessment Clinic, Reading Clinic, Sibling Supports, and Social Work Services. Information and referral services are provided by Tennessee Disability Pathfinder.

Vanderbilt Preoperative Evaluation Clinic (VPEC)

1501 The Vanderbilt Clinic, Nashville, TN 37232-5735

(615) 343-2230

Vanderbilt Health One Hundred Oaks

719 Thompson Lane, Nashville, TN 37204

VPEC is a free service for Vanderbilt patients scheduled for surgery. It helps ensure their safety and prevent sur-

gical delays and cancellations. Patients are evaluated by a nurse practitioner and anesthesiologist for their medical history. A physical and essential diagnostic tests are performed within 30 days of their scheduled surgery.

Vanderbilt Stallworth Rehabilitation Hospital

2201 Children's Way, Nashville, TN 37212

(615) 320-7600 • Fax (615) 327-9289 or (866) 558-2081

Inpatient Referral (615) 963-4030

Stallworth provides inpatient rehabilitation services for adults and children over 6 with neurological, orthopaedic and other injuries as well as chronic conditions and disabilities. The hospital specializes in the treatment of stroke, brain and spinal cord injury, multiple traumas, amputee, hip fracture and other diagnoses. It is a designated Stroke Center of Excellence in the 100 hospital rehabilitation network, and repeatedly exceeds national benchmarks for patient satisfaction and functional outcomes. It is home to the Vanderbilt Center for Multiple Sclerosis. This hospital is a joint venture with HealthSouth Corporation.

The Vanderbilt Voice Center

7302 MCE, South Tower

1215 21st Ave. S., Nashville TN 37232-8783

(615) 343-7464 • Fax (615) 343-0872

VanderbiltHealth.com/billwilkerson/26740

The center is a major part of the Bill Wilkerson Center for Otolaryngology and Communication Sciences. It serves patients who use their voice professionally, and treats any patient with a voice-related issue. Its advanced medical capabilities include equipment and techniques for diagnosing and treating voice problems, voice training, and intervention to prevent voice problems. The center also treats the entire medical and surgical spectrum of upper aerodigestive tract related problems. Services include laryngology, bronchoesophagology, endoscopic laser surgery, laryngeal and tracheal reconstructive surgery and phonosurgery. The center staff includes otolaryngologists, speech pathologists/voice scientists and a singing specialist. As a training facility for otolaryngologists wishing to specialize in laryngology and the care and treatment of the voice, it was one of the first laryngology fellowship programs in the world. Approximately 85% of its fellows are in academic medical centers.

Women's Health

Vanderbilt Health One Hundred Oaks
719 Thompson Lane, Suite 27100
Nashville, TN 37204
(615) 343-5700 • Fax (615) 936-1106
VanderbiltWomens.com

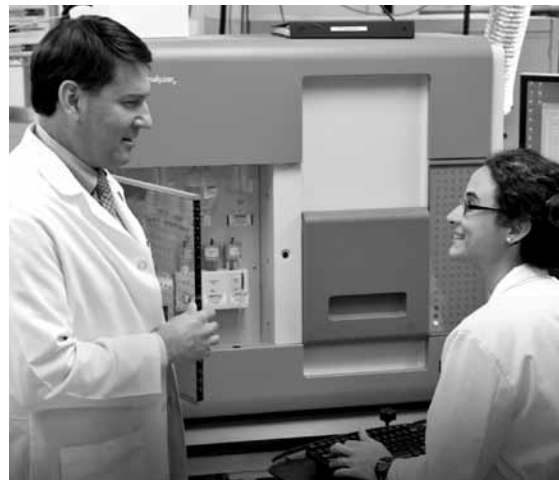

The center provides a wide range of obstetric and gynecologic services. Pregnant women are cared for by OB/GYNs, Certified Nurse Midwives or Certified Nurse Practitioners in the Medical Arts OB/GYN Group and the TVC OB/GYN Practice. The Maternal Fetal Medicine practice provides care to women experiencing a high-risk pregnancies. Obstetric Ultrasound is on-site. Comprehensive genetic counseling and testing is also available. Gynecology care is provided by a team with a gynecologist, Certified Nurse Practitioner or Certified Nurse Midwives. Well women care is provided in all locations. Women who need specialized gynecologic services can see an expert in uro-gynecology, pelvic support, minimally invasive surgery, reproductive endocrinology and infertility, colposcopy and gyn-oncology.

Women's Imaging

3319 West End Ave., Suite 650
Nashville, TN 37203
(615) 343-3100 • Fax (615) 343-3355

Vanderbilt Health One Hundred Oaks
719 Thompson Lane, Suite 25300
Nashville, TN 37204
(615) 936-3100 • Fax (615) 936-8655

The center offers women's ultrasound in a comfortable setting. Services include a wide range of non-obstetric women's ultrasounds including pelvic, renal, abdominal and thyroid ultrasound, as well as ultrasound of veins in the legs. Obstetric ultrasound services include first trimester ultrasound screening, fetal well-being, fetal anatomy screening, amniocentesis guidance and screenings for genetic abnormalities. The Center provides same day scheduling, same day reports, 3D/4D images and patient pictures and DVDs.

BENCH TO BEDSIDE: COMPREHENSIVE RESEARCH CENTERS

Vanderbilt-Ingram Cancer Center (VICC)

2220 Pierce Ave., Nashville, TN 37232
(800) 811-8480 - Toll-free Cancer Clinical Trials
(615) 936-1782, Director's Office
Fax (615) 936-1790
VICC.org

VICC is the only Comprehensive Cancer Center in Tennessee designated by the National Cancer Institute. It conducts research and provides care for adult and pediatric cancers. It is one of only 40 such centers in the country. The Center is a member of the prestigious National Comprehensive Cancer Network. It unites nearly 300 physicians and scientists in seven research programs in breast cancer, gastrointestinal cancer, thoracic/head and neck cancers, genome maintenance, host-tumor interactions, signal transduction/cell proliferation, and cancer prevention, control and population-based research. The National Cancer Institute Center ranks the Center among the nation's top 10 in terms of the number of grants and total grant dollars awarded. Its clinical trials program includes robust work in Phase I drug development and designation by the NCI as sites for Phase I and Phase II clinical trials. The center also boasts several important donor-supported research initiatives with partners including Frances Williams Preston Laboratories of the T.J. Martell Foundation, the A.B. Hancock Jr. Memorial Laboratory for Cancer Research, the Jim Ayers Institute for Pre-Cancer Detection and Diagnosis and Robert J. Kleberg and Helen C. Kleberg Center for Cancer Genetics and Genomics.

Vanderbilt Institute for Clinical and Translational Research (VICTR)

2525 West End Ave., Suite 600, Nashville, TN 37203

(615) 322-7343 • Fax (615) 936-8545

mc.Vanderbilt.edu/victr/pub/

The Vanderbilt Institute for Clinical and Translational Research focuses on bench to bedside, and bedside to practice translation of medical discoveries. VICTR programs and staff remove impediments and release investigators from administrative burdens, produce inspired personnel trained in translational research, foster innovation by stimulating contributions from collaborators, and enrich the translational research environment with informatics tools and biostatistics support. The institute leverages Vanderbilt's NIH-funded Clinical Research Center, which has been generating clinical research for 50 years. The funds are used to establish a Community Engagement and Research program, which leverages Vanderbilt community ties. A partnership with Meharry Medical College is important. The Institute for Medicine and Public Health as well as the Schools of Medicine, Nursing, Law, Business, Engineering, Peabody College of Education and Human Development, the College of Arts and Sciences, Meharry Medical College and the Kennedy Center for Research on Human Development are also involved.

Vanderbilt Kennedy Center (VKC)

237 MRL Building, Nashville, TN, 37203

(615) 322-8240 • Fax (615) 322-8236

VanderbiltKennedyCenter.org

VKC is an interdisciplinary research, training, diagnostic, and treatment institute, that embraces faculty and resources available through VUMC, the College of Arts and Science, and Peabody College. The Center brings together scientists and practitioners in behavior, education, genetics and neuroscience who work to solve the mysteries of development and learning.

The Center's mission is facilitating discoveries and best practices that make positive differences in the lives of people with developmental disabilities and their families. The Center is one of 14 NIH research centers on intellectual and other development disabilities supported in part by the National Institute of Child Health and Human Development. It was designated a University Center for Excellence on Developmental Disabilities Education, Research and Service by the Federal Administration on Developmental Disabilities in 2005. The Center trains health care professionals in many disciplines through the Leadership Education in Neurodevelopmental Disabilities Training Program, in collaboration with Developmental Medicine.

MULTI-INVESTIGATOR RESEARCH CENTERS AND PROGRAMS:

AIDS Center

Vanderbilt Health-One Hundred Oaks

719 Thompson Lane, Ste. 47183

Nashville, TN 37204

(615) 936-2642 • Fax (615) 936-2644

VanderbiltHealth.com/comprehensivecare

The Vanderbilt AIDS Center supports all HIV-related research and helps coordinate HIV care and provider education. Several multi-investigator NIH grants support the full spectrum of HIV research, from clinical trials to basic virology and immunology. The Vanderbilt Meharry Center for AIDS Research grant is a key component and was established to strengthen HIV/AIDS research at Vanderbilt and Meharry campuses, as well as the Vanderbilt Comprehensive Care Center. It is one of twenty CFARs at academic medical centers across the United States that are competitively funded by the NIH. CFAR aims to synergistically enhance HIV/AIDS research by providing expertise, resources, and services that foster interdisciplinary collaboration, especially on translational research. The Vanderbilt Meharry CFAR focuses on research into disparities in the HIV epidemic, and collaborates closely with the Vanderbilt Institute for Global Health.

Bill Wilkerson Center for Otolaryngology and Communication Sciences

Medical Center East, South Tower

1215 21st Ave. S., Nashville, TN 37232

(615) 936-5000

VanderbiltBillWilkersonCenter.com

The center uses service, education and research to serve people with communication disorders. The research program is located in 20 labs and includes the disciplines of neurotology, hearing sciences, language, voice, speech production and perception, animal models and human performance. In each of these areas, work focuses on applied and basic issues. Behavioral and electrophysiological measurements associated with communication science and communication disorders are emphasized. The many ongoing research projects are tied closely to the academic program and to the otology, voice, speech, language and audiology clinics that serve the Middle Tennessee.

Center for Biomedical Ethics and Society

2525 West End Ave., Suite 400, Nashville, TN 37203
(615) 936-2686

The center provides leadership in education, research and clinical service at VUMC concerning the ethical, legal and social dimensions of medicine and health policy. Staff are committed to exploring individual and social values, cultural dynamics and legal and professional standards that characterize and influence clinical practice and biomedical research. The center's goal is sparking collaboration in teaching, research, and practice and contributing to scholarship and policy making at all levels.

Center for Human Genetics Research (CHGR)

519 Light Hall, Nashville, TN 37232
(615) 343-8555 • Fax (615) 343-8619

The Vanderbilt Center for Human Genetics Research focuses on human genetic research as well as training activities for students interested in human genetics. The central theme of the CHGR is the understanding of how genes influence complex traits affected by the interplay of multiple genes and environmental factors. This encompasses research at the molecular, clinical, and population levels performed by faculty in many departments and schools.

Center for Lung Research

Division of Allergy, Pulmonary and
Critical Care Medicine

T-1218 Medical Center North, 1161 21st Ave. S.
Nashville, TN 37232-2650

(615) 322-3412 • Fax (615) 343-7448
mc.Vanderbilt.edu/vumc/lung.html

The center promotes lung research and training throughout Vanderbilt. Center investigators represent nine departments and are engaged in a wide range of basic and clinical research. The center identifies important research opportunities, assists investigators in identifying collaborators in and outside Vanderbilt, and facilitates research by providing physical facilities, financial support and administrative and scientific expertise. The center works closely with the departments of medicine, cell biology, pediatrics, pathology, biomedical engineering, pharmacology and molecular physiology and biophysics.

Center for Matrix Biology

1161 21st Ave. S., B-3102 Medical Center North
Nashville, TN 37232-2372

(615) 322-7299 or Billy G. Hudson (615) 322-7298

The center fosters cohesive interactions among Vanderbilt scientists who work, on extracellular matrix biology in order to create collaborations, promote excellence in matrix research and acquire funding.

Center for Molecular Neuroscience

6133 Medical Research Building III
Nashville, TN 37232-8548

(615) 936-3037 • Fax (615) 936-3040

CMN supports research and training of neuroscientists who use sophisticated genetic, cell biologic, biochemical and biophysical techniques to understand development, signaling and disease in the brain. The faculty focus their research on neuronal development and differentiation, control of membrane excitability, mechanisms of synaptic plasticity, elucidation and analysis of drug actions in the brain, and altered gene/protein function in mental illness. CMN faculty use molecular and transgenic techniques to understand how key genes control brain development and function and develop new animal models for syndromes such as ADHD, Parkinson's disease and Alzheimer's disease.

Center in Molecular Toxicology

638 Robinson Research Building, Nashville, TN
37232-0146

(615) 322-2261 • Fax (615) 322-3141

The center is a National Institute of Environmental Health Science-funded research center. Its overall research goals are understanding phenomena of toxicological interest in chemical terms, answering questions related to toxicity at the biochemical level and applying such chemical and biochemical knowledge to problems involving human health.

Center for Space Physiology and Medicine

AA-3228 Medical Center North
1161 21st Ave. S., Nashville, TN 37232-2195

(615) 343-6499

VUMC established the center to promote research in the physiological challenges of manned space flight. The Center directs and coordinates the Medical Center's space-related research. The Engineering School and the College of Arts and Sciences also have robust programs in space studies. The collaborating members of the medical faculty are internationally recognized authorities in many areas relevant to manned space flight. The Center also has close ties to scientists at NASA centers and to Russian investigators in the Institute for Biomedical Problems and the Russian Cardiological Research Center in Moscow.

Center for Structural Biology

5140 Medical Research Building III
465 21st Ave. S., Nashville, TN 37232-8725

(615) 936-2209 • Fax (615) 936-2211

This trans-institutional research and training unit focuses on applying structural methods for solving fundamental problems in medicine and biology. The Center educates and trains campus researchers on structural biology. Fac-

ultly, drawn from eight departments in the College of Arts & Science and the School of Medicine, use NMR, EPR and fluorescence spectroscopies, X-ray crystallography, cryo-electron microscopy and computational techniques to understand a range of critical events such as signal transduction, viral infection, the replication of genes in healthy cells, and the malfunction of the repair of damaged genes in cancer.

Developmental Medicine

See page 94

Diabetes Research and Training Center

2215 Garland Ave., Nashville, TN 37232

(615) 322-7990 • Fax (615) 343-0172

VanderbiltDRTC.com

The center is one of a network established by the National Institute of Diabetes, Digestive and Kidney Diseases to conduct research and training in diabetes mellitus and related endocrine and metabolic disorders. The DRTC is a multidisciplinary program with 95 participating faculty members distributed among 14 departments in two schools and three colleges of the University. The Biomedical Research Component consists of a research base of 65 investigators in the areas of in vivo metabolism, signal transduction, etiology and complications, gene regulation, beta cell function, demonstration and education.

Digestive Disease Research Center (DDRC)

Division of Gastroenterology

C-2104 Medical Center North, Nashville, TN 37232-2279

(615) 322-5200

The DDRC promotes digestive disease-related research in an integrative, collaborative and multidisciplinary manner. The center supports its investigators' research and attracts investigators not involved in digestive disease-related research who choose to pursue these lines of investigation. They come to DDRC to develop and implement programs for training and establishing young investigators in digestive disease-related research so that findings can be transferred to clinical practice.

Elizabeth B. Lamb Center for Pediatric Research

D-7235 Medical Center North, Nashville, TN 37232-2581

(615) 322-2250 • Fax (615) 343-7723

The center is an interdisciplinary research unit focused on infectious diseases, immunology, microbiology and pathology related to infectious diseases in children. The Center is located in the Division of Pediatric Infectious Diseases, and its primary mission is fostering basic biomedical research with the goal of developing new ways to prevent and treat childhood infectious diseases.

Frist Nursing Informatics Center

461 21st Ave. S., Nashville, TN 37240

(615) 936-2581

The center provides support for various informatics applications; including handheld devices, clinical log and evaluation software, Blackboard (web-based course template system), web-based conferencing, streamline instructional media, survey design and other knowledge building tools. A computer lab is available to support online learning activities and online testing.

General Clinical Research Center

AA-3208 Medical Center North

Nashville, TN 37232-2195

(615) 322-2390 • Fax (615) 343-2979

The CRC, part of the Vanderbilt Institute for Clinical and Translational Research, is a 17-bed inpatient and outpatient hospital unit. An outpatient Pediatric Clinical Research Center is in the Children's Hospital Doctors Office Tower. The CRC's supports clinical research into the cause, progression, prevention, control and care of human disease by providing infrastructure support for clinical research. It does this by creating a controlled environment for studies of normal and abnormal body function. The CRC provides inpatient beds, outpatient clinic space, ancillary testing, laboratories, equipment and supplies for clinical research to qualified faculty members of Vanderbilt or Meharry medical schools. The CRC supports all disciplines, with particular emphases on nutrition, oncology, neurology, cardiology, clinical pharmacology, endocrinology, gastroenterology, hematology, pediatrics and diabetes. It is supported by a grant from the National Center for Research Resources and serves as a resource for teaching students, a research site in the methodology of patient care systems and an apprenticeship program for young clinical investigators.

George M. O'Brien Renal Center

S-3223 Medical Center North, Nashville, TN 37232-2372

(615) 322-4794

The center's focus is understanding the pathogenic mechanisms that lead to progressive nephron destruction in the kidney. Investigators from the departments of medicine, pediatrics, surgery, cell biology, pharmacology and pathology bring a multidisciplinary approach to bear on specific mechanisms that lead to glomerular and tubular dysfunction and progressive glomerular destruction. The primary funding is from the NIH grant titled "Biology of Progressive Nephron Destruction."

Informatics Center

1161 21st Ave. S., D3300 Medical Center North,
Nashville, TN 37232
(615) 936-1424

Biomedical Informatics is the science of acquiring, structuring, analyzing and providing access to biomedical data. Informatics knowledge and application has allowed the center to develop or integrate products to identify the most effective ways to support clinical care, research and education at 10 times the capability at 10% the time and cost.

The Informatics Center includes the following multiple units.

- Informatics Center Operational Units
- Information Technology Integration
- Network Computing Services
- Eskind Biomedical Library
- Department of Biomedical Informatics
- Vanderbilt Center for Better Health
- Regional Informatics Program

Institute for Global Health

2525 West End Ave., Suite 750, Nashville, TN 37203
(615) 322-9374 • Fax (615) 343-7797

The institute promotes interdisciplinary research, teaching and health services and development in areas of the developing world with limited resources. The Institute helps strengthen and sustain the interests and activities of the Vanderbilt community by:

- Facilitating international contacts to develop programs and training
- Advocating for more equity in global health investments
- Helping to secure resources for international activities
- Standardizing and facilitating overseas administrative approaches
- Improving communication through grand rounds, seminars and discussion forums
- Partnering with institutions in the U.S. and abroad that share the Institute's goals.

Institute for Medicine and Public Health

Suite 6000, Medical Center East, North Tower
1215 21st Ave. S., Nashville, TN 37232-8300
(615) 936-1010 • Fax (615) 936-1269

The institute's mission is improving personal and public health through discovery, training and service programs designed to protect against health threats, promote healthy living, improve health services and prepare healthcare leaders. Its goal is improving the quality, safety, equity and efficiency of public and personal health services, with the ultimate goal of improving the health of all citizens.

Mass Spectrometry Research Center

9160 Medical Research Building III
465 21st Ave. S., Nashville, TN 37232-6400
(615) 343-8382 • Fax (615) 343-8372

The MSRC provides the local research community with world-class instrumentation and collaborative support of cutting-edge research in the medical and bioscience fields. The center is made up of the following labs: The Research and Development Lab, the Mass Spectrometry Service Lab, The MS Core Service, The Proteomics Lab, The Tissue and Biofluids Core Lab and the Bioinformatics Lab.

Oates Institute for Experimental Therapeutics

1285 MRB IV, Nashville, TN 37232-0575
(615) 322-0067 • Fax (615) 343-4522

The institute builds on Vanderbilt's internationally recognized strength in human pharmacology. The Institute investigates mechanisms underlying variability in drug actions in humans and translates those results into more effective use of drugs and improved drug therapies.

Skin Diseases Research Core Center (SDRCC)

A-2300 Medical Center North, Nashville, TN 37232
(615) 343-4363 • Fax (615) 343-4365

The SDRCC is an NIH/NIAMS-funded center that promotes skin-related research among basic and clinical investigators. Organized in the Dermatology Division, this center involves investigators and core laboratories in multiple other areas. This center supports core laboratories in phenotype analysis, morphology and molecular genetics. Pilot & feasibility projects are awarded for investigators new to skin-related research or for novel studies by established cutaneous researchers.

Vanderbilt Addiction Center (VAC)

1601 23rd Ave. S., Nashville, TN 37212
(615) 327-7200

mc.vanderbilt.edu/addiction

The VAC focuses on research, education and clinical care related to the pathogenesis, prevention and treatment of alcohol and other drug abuse and dependence. The center is an interdepartmental network of investigators and clinicians from the Schools of Medicine, Nursing, and Engineering, the College of Arts and Science, and Peabody College. VAC identifies important research opportunities, helps investigators find collaborators and offers a forum for research among clinical and basic scientists.

Vanderbilt Brain Institute (VBI)

U1205 Medical Center North, Nashville, TN, 37232-2050
(615) 936-3736 • Fax (615) 936-3613

Brain Awareness Schedule (615) 936-2637

The VBI oversees and supports the extensive neuroscience-related endeavors across Vanderbilt. Its primary mission is promoting research, education and training in brain-related disciplines. It includes nearly 500 faculty, students and staff who engage in neuroscience-directed research, training and clinical service. They represent five colleges, 22 departments and 27 centers and institutes. The program emphasizes cellular and molecular neuroscience and cognitive and systems neuroscience. The VBI administers the Neuroscience Graduate Program, one of the nation's leading programs in pre-doctoral training for neuroscience students. It includes 75 graduate students and 87 training faculty, and consistently ranks at the top of national listings of neuroscience graduate programs.

Vanderbilt Center for Bone Biology

1235 Medical Research Building IV
Nashville, TN 37232-0575

(615) 322-6110 • Fax (615) 343-2611

The VCBB investigates diseases of bone and mineral metabolism, which are now widely recognized as major public health problems. Molecules responsible for common bone diseases, may now make it possible to unravel the pathophysiology of some of these common bone diseases, and develop new diagnostic tools and treatments that could change the quality of life for many patients. The VCBB is in the process of assembling a cadre of well-trained investigators to address these issues, with an initial primary focus on osteoporosis, cancers that frequently affect the skeleton, and pharmacologic enhancement of fracture repair.

Vanderbilt Center for Stem Cell Biology

802 Light Hall, Nashville, TN 37232-0255

(615) 322-6769 • Fax (615) 322-6645

VanderbiltResearch.org/community/profile/id/3

The VCSCB performs basic research to learn about the biology of stem cells and ways to harness their potential. The Center is home of the Coordinating Center for the Beta Cell Biology Consortium. This consortium's major goal is learning to make pancreatic beta cells from embryonic stem cells because pancreatic beta cells are destroyed by Type 1 diabetes.

Vanderbilt Institute of Chemical Biology

896 Preston Building, Nashville, TN 37232-0146

Toll free: 866-303-VICB (8422) • Fax (615) 936-3884

Vanderbilt.edu/vicb

The VICB is a trans-institutional initiative between the College of Arts and Sciences and the School of Medicine. It promotes research and education applying chemistry to important biological problems. Strong basic science programs and outstanding research and clinical centers at Vanderbilt focus on understanding the molecular basis of disease. As these molecular studies increase understanding, the tools of chemistry can be used to design and develop new agents to detect, treat and prevent disease. The VICB operates core facilities in high throughput screening, chemical synthesis, antibody generation and bioanalytical nuclear magnetic resonance and sponsors major research programs in drug discovery and proteomics.

Vanderbilt Institute for Integrative Genomics

529 Light Hall, Nashville, TN 37232

(615) 936-2660 • Fax (615) 936-2661

The institute is a trans-institutional initiative that fosters genomic approaches for understanding the biology of disease. It seeks to harness the full power of genomics by integrating the field with traditional and other new scientific disciplines. It works to bring the science of studying genomes into phase with experimental paradigms in developmental biology, vascular biology, cancer biology, genetics, cardiovascular medicine, neuroscience and other fields. This initiative is designed to capitalize on institutional strengths in four specific areas: functional genomics/model organism disease models, cancer genetics, epigenetics/chromatin biology and computational genetics. Integrative Genomics interfaces strongly with the Zebrafish Initiative funded by the Academic Venture Capital Fund, as well as as other existing programs.

Vanderbilt University Institute of Imaging Science

R-1302 Medical Center North, Nashville, TN 37232-2675
(615) 322-8359 • Fax (615) 322-0734

The VUIIS is a university-wide interdisciplinary initiative bringing together scientists whose interests span the spectrum of imaging research, from the underlying physics of imaging techniques applying imaging tools to address problems such as understanding brain function. The Institute's core program of research is related to developing new imaging technology based on advances in physics, engineering and computer science. It promotes applied research in collaboration with biomedical scientists and physicians who have questions that imaging can address. In addition to high-field MRI and MR spectroscopy in human subjects, the Institute offers state-of-the-art options for small animal imaging.

Women's Reproductive Health Research Center

B-1100 Medical Center North, Nashville, TN 37232-2519
(615) 322-4196 • Fax (615) 343-7913

The center was established in 1999 with principal funding from the National Institute of Child Health and Human Development as part of the Specialized Cooperative Centers Program on Reproduction Research. It has developed a program that is focused on promoting reproductive health by increasing understanding of normal reproductive biology as well as the dysfunction associated with diseases such as abnormalities of pregnancy, dysfunctional uterine bleeding, endometriosis and cancer. In addition to support from the NIH, the center receives substantial support from the Endometriosis Association for an international endometriosis research and training program. It supports collaborations among basic and clinical scientists in the multidisciplinary research environment while caring for women with endometriosis and associated diseases. The center's goal is moving scientific discoveries of reproductive disease from bench to bedside while improving healthcare for women.

MONROE CARELL JR. CHILDREN'S HOSPITAL AT VANDERBILT

2200 Children's Way, Nashville, TN 37232
(615) 936-1000

The Monroe Carell Jr. Children's Hospital at Vanderbilt treats the region's sickest patients, caring for children from 44 states in the past year. Children's Hospital has been recognized as one of the premier children's hospitals in the nation by *U.S. News & World Report*, *Parents* magazine and the Leapfrog Group. It is the most comprehensive children's hospital in the state, offering Centers of Excellence for diabetes and congenital heart disorders, as well as services for cancer treatments, organ and bone marrow transplants and developmental disorders. The hospital provides the highest level of neonatal intensive care in the state, repairs broken legs and everything in between, while providing family-centered care every step of the way.

Children's Hospital treats all children regardless of ability to pay. Children's Hospital has the only Pediatric Emergency Department in Middle Tennessee with more than 53,000 visits in fiscal year 2010. More than 182,000 patients were seen in outpatient clinics in 2010. Constructed in 2004, the freestanding children's hospital is filled with the latest state-of-the-art equipment and information systems to provide the best treatments for patients. It also offers a variety of family accommodations to help fulfill its mission of family-centered care. Children's Hospital is a nonprofit teaching and research hospital and relies on the support of individuals and other organizations.

CLINICS, PROGRAMS AND SERVICES

Access Center

(615) 936-4444 or (866) 936-7811 (toll-free)

The Children's Hospital handles all pediatric admissions initiated by an outside physician or hospital through the Children's Access Center. For quality assurance, the center maintains recorded lines and may be reached 24 hours a day, seven days a week.

Adolescent Consultation/Referral Services

Vanderbilt Health One Hundred Oaks

719 Thompson Lane, Suite 36300

Nashville, TN 37204

(615) 936-8200

Consultation and referral services are available to assist primary care physicians and other providers in caring for teen and young adult patients. Diagnostic and management opinions are offered to assist referring professionals in patient care.

Adolescent Primary Care Clinic

Vanderbilt Health One Hundred Oaks

719 Thompson Lane, Suite 36300

Nashville, TN 37204

(615) 936-8200

Physicians serve as primary care providers for teens. Primary care services include acute illness and injury, annual/school physical exams, immunizations, pre-participation exams for sports, routine gynecological care, evaluation of problems of emotional adjustment and stress, and coordination of services for children with special needs.

Adolescent/Young Adult Eating Disorders Program

Vanderbilt Health One Hundred Oaks

719 Thompson Lane, Suite 36300

Nashville, TN 37204

(615) 936-8200

The program is designed for children, adolescents, and young adults. Services include evaluation and management of patients' conditions, providing medical, psychological and nutritional treatment. Health care professionals are committed to a family-based, multi-disciplinary team approach, carefully orchestrated to include primary care physicians, psychologists, psychotherapists, nutritionists, psychiatrists and other pediatric specialists as needed.

Allergy and Immunology Clinic

Vanderbilt Health One Hundred Oaks
719 Thompson Lane, Suite 36300
Nashville, TN 37204
(615) 343-7617

The clinic provide diagnostic services and care for children with allergy-related and immunodeficiency diseases. The specialists evaluate and test infants and children with suspected humoral and cellular immunodeficiency diseases and care for patients with genetic immunodeficiency diseases.

Asthma Diagnosis and Treatment Center

2200 Children's Way, Doctor's Office Tower, 5th Floor
Nashville, TN 37232
(615) 343-7617

The center evaluates, treats and educates pediatric asthma patients and their families. The goal of care is to empower patients to live fulfilling, active lives while using the lowest amount of drugs necessary.

Behavioral Medicine Clinic

Vanderbilt Health at One Hundred Oaks
719 Thompson Lane, Suite 36300
Nashville, TN 37204
(615) 936-8200

The clinic provides outpatient behavioral health and counseling services to help patients and families cope with illness and symptoms that interfere with their lives. The clinic treats patients who are dealing with recurrent abdominal pain, chronic fatigue syndrome, stress-related symptoms, anxiety, eating disorders and diabetes.

Brain Tumor Program

2200 Children's Way, Doctor's Office Tower, 6th Floor
Nashville, TN 37232
(615) 936-1762

This program is focused on treating patients with acute and chronic brain tumors. Treatment and research programs are based on collaboration between experts at Vanderbilt-Ingram Cancer Center and across the nation.

Bronchopulmonary Dysplasia Treatment Center

2200 Children's Way, Doctor's Office Tower 5th Floor
Nashville, TN 37232
(615) 343-7617

As more low-birth weight babies survive, they often develop chronic lung disease such as bronchopulmonary dysplasia. Children's Hospital's BPD program has served children for 16 years, following patients until their condition is resolved.

Cardiac Intensive Care Unit

(615) 936-4798

The PCICU is a 12-bed unit within the 36-bed PCCU that cares for children with cardiovascular disease and complex congenital heart disease in the perioperative period. The unit's team of doctors and nurses trained in cardiac critical care serve postoperative patients with complex congenital heart disease.

Childhood Cancer Program

2200 Children's Way, Doctor's Office Tower, 6th Floor
Nashville, TN 37232
(615) 936-1762

The program is a collaboration between the Department of Pediatrics, Children's Hospital and the VICC. It provides therapies and advances research in all types of childhood cancers.

Child Life Services

(615) 322-0358

Child Life Specialists work with patients and families to reduce stress and anxiety. This can include using play rooms, advocacy, education and therapy to meet any needs, medical or otherwise, patients and their families may have.

Complex AeroDigestive Evaluation Team

2200 Children's Way, Doctor's Office Tower, 5th Floor
Nashville, TN 37232
(615) 936-8176

The CADET team at Children's Hospital is known for a comprehensive, interdisciplinary approach to evaluating and caring for chronically ill children with complex airway (voice box, windpipe), pulmonary (lung), upper digestive tract (esophagus, stomach), sleep and feeding disorders.

Consultation Clinic

2200 Children's Way, Doctor's Office Tower, 8th Floor
Nashville, TN 37232
(615) 936-2467

The clinic is a service provided by Children's Hospital to the patients and medical providers in Middle Tennessee and surrounding areas. Any physician or provider who needs assistance with diagnosis, treatment or a second opinion may refer a patient to this clinic.

Critical Care Unit

(615) 322-0928

The unit serves children with neurological, respiratory, cardiovascular, gastrointestinal, renal/genitourinary and orthopedic conditions as well as complex congenital anomalies, burns, trauma and/or multi-system involvement.

Cystic Fibrosis Diagnosis and Treatment Center

2200 Children's Way, Doctor's Office Tower, 5th Floor
Nashville, TN 37232
(615) 343-7617

The center is one of the Cystic Fibrosis Foundation's approved centers. It is one of 110 centers in the network and is committed to top-notch, aggressive treatment. The center involves health care providers from many disciplines including pulmonary medicine, nursing, psychology, social work, nutrition, pharmacy, surgery, gastroenterology and physical therapy.

Dermatology Clinic

2200 Children's Way, Doctor's Office Tower, 8th Floor
Nashville, TN 37232
(615) 936-8300

The clinic provides outpatient and inpatient consultations and care for types of skin diseases in children. Physician referrals and self referrals are accepted.

Developmental Medicine

2200 Children's Way, Doctor's Office Tower, 9th Floor
Nashville, TN 37232
(615) 936-0249

The clinics provide interdisciplinary screening, medical evaluation and treatment, psychological testing and therapy for children with a wide variety of developmental concerns. These include developmental delays, cognitive impairment (mental retardation), autism, cerebral palsy and ADHD. The division offers specialized clinics for Down Syndrome, Fragile-X, spasticity and genetics of developmental disabilities (Neurogenetics Clinic). The clinic offers on-site or at-home training for the families of children with behavioral concerns. Specialists work with families to find resources in their communities and school systems.

Diabetes Program

8410 Medical Center East, South Tower
Nashville, TN 37232
(615) 322-7842

The program is an integral part of the Vanderbilt Eskind Diabetes Clinic. Since pediatric and adult services are included in a single clinic, it creates an environment that enhances both diabetes care and research. This also makes shifting diabetes care from childhood to adulthood seamless for patients.

Down Syndrome Program

2200 Children's Way, Doctor's Office Tower, 9th Floor
Nashville, TN 37232
(615) 343-3696 • (866) 900-3696

The clinic has a multidisciplinary team that evaluates children through 21 years of age. Referrals and recommendations are given to families after the clinic has provided patients with medical and developmental evaluations.

Early Childhood Anger Management Clinic

2200 Children's Way, Doctor's Office Tower, 8th Floor
Nashville, TN 37232
(615) 936-2467

Persistent aggression during the early years is a risk factor for violence later in life. The American Academy of Pediatrics recommends that all young children be screened for aggression and counseling be provided as indicated. The clinic provides consultation for families of children younger than 7 years of age with aggression and anger management problems. Contributing factors are reviewed and treatment is individualized. The clinic stresses behavioral changes rather than drugs to achieve positive outcomes.

ECMO Program

(615) 322-0519

Extracorporeal Membrane Oxygenation is a form of long-term heart-lung bypass used to treat infants, children and adults in cardiac and/or respiratory failure despite maximal medical therapy. The ECMO program at Children's Hospital can run four ECMO patients at one time. The team includes doctors, registered nurses and registered respiratory therapists.

Emergency Medicine

2200 Children's Way
Nashville, TN 37232
(615) 343-2996

The Emergency Department provides 24-hour access to pediatric experts for more than 53,000 patients each year. The Pediatric Emergency Department has 25 patient care areas plus three triage and 10 observation beds. The department is staffed by attending physicians, residents, social workers and child life specialists.

Endocrinology Clinic

2200 Children's Way, Doctor's Office Tower, 6th Floor
Nashville, TN 37232
(615) 322-7427

Endocrinologists diagnose, follow and treat a wide range of hormone-related disorders in children. These include adrenal gland disorders, bone and calcium disorders, growth disorders, pituitary gland disorders, hypoglycemia, puberty

disorders, thyroid disease and certain genetic disorders. Diabetic patients are seen at the Diabetes Program.

Epilepsy Monitoring Unit

2200 Children's Way, 7th Floor
Nashville, TN 37232
(615) 322-3964

The two-bed unit is equipped with electroencephalogram (EEG) monitoring equipment and a video camera so that patients suspected of having a seizure disorder can get an accurate diagnosis and a refined treatment plan.

Fragile X Clinic

2200 Children's Way, Doctor's Office Tower, 9th Floor
Nashville, TN 37232
(615) 936-0249

The Clinic serves people affected by Fragile X and their families. It is part of the National Fragile X Foundation Clinics Consortium and serves children and adults with a diagnosis of Fragile X syndrome or Fragile X permutation carriers.

Gastroenterology, Hepatology and Nutrition Clinics

2200 Children's Way, Doctor's Office Tower, 9th Floor
Nashville, TN 37232
(615) 322-7449

The clinics provide comprehensive care, diagnostic evaluations/ testing, management and treatment for a wide array of infants, children and young adults with nutritional, gastrointestinal or liver disorders.

General Surgery

2200 Children's Way, Doctor's Office Tower, 7th Floor
Nashville, TN 37232
(615) 936-1050

Pediatric surgeons are specially trained in the surgical care of infants and children. They treat fetal patients, newborns, infants, toddlers, children and young adults; and they perform a broad range of general surgical procedures including minor office procedures, inpatient and outpatient procedures.

Genetics and Genomic Medicine

2200 Children's Way, Doctor's Office Tower, 6th Floor
Nashville, TN 37232
(615) 322-7601

Genetics and Genomic Medicine evaluates, diagnoses, treats and offers genetic counseling for people with familial disorders, birth defects, chromosomal disorders or concerns about personal or family medical histories. Services provided include specialty areas such as clinical,

biochemical and molecular genetics. Specialists also have expertise in adult onset disorders such as certain types of cancer, Huntington disease, hypertension and pulmonary fibrosis.

Hemostasis/Hemophilia Clinic

2200 Children's Way, Doctor's Office Tower, 6th Floor
Nashville, TN 37232
(615) 936-1765

The clinic provides the highest quality treatment and compassionate care for children and adults with bleeding disorders. It provides comprehensive health promotion with an emphasis on prevention and offers a variety of services for patients with bleeding disorders. The clinic offers many opportunities for patients to participate in current bleeding disorder research.

Heart Institute

2200 Children's Way, Doctor's Office Tower, 5th Floor
Nashville, TN 37232
(615) 322-7447

A team of experienced pediatric cardiac surgeons, cardiac anesthesiologists, pediatric cardiologists and pediatric cardiac intensivists work closely to care for infants, children and young adults undergoing cardiac surgery. Nurses, respiratory therapists, child life specialists and social workers attend to every need of the child undergoing heart surgery as well as the needs of the family. More than 500 children undergo heart surgery annually at Vanderbilt. Operations range from fairly straightforward closures of atrial or ventricular septal defects (ASDs or VSDs) to very complex operations such as Norwood operations, Fontan operations and heart transplants.

Heart Transplant

2200 Children's Way, Doctor's Office Tower, 5th Floor
Nashville, TN 37232
(615) 322-7447

Vanderbilt performed Tennessee's first pediatric heart transplant in 1987. Since that time, more than 150 pediatric patients have received heart transplants at Vanderbilt and the Children's Hospital. The experienced team of transplant professionals includes pediatric cardiologists, cardiac surgeons, anesthesiologists, intensivists, transplant coordinators and pediatric nurses.

Hospitalists Program

(615) 936-4444

Hospitalists develop and manage many aspects of hospital operations such as patient safety, inpatient flow and quality assurance programs. The Pediatric Hospitalist Program is available for immediate phone consultation or

management of patients who require hospitalization due to problems in the broad scope of general pediatrics. The program collaborates with primary care physicians to ensure patients receive coordinated care.

Inflammatory Bowel Disease Program

2200 Children's Way, Doctor's Office Tower, 9th Floor
Nashville, TN 37232
(615) 322-0128

This program improves the lives of children with inflammatory bowel disease by providing comprehensive family-centered care, educating families and providers, and advancing disease understanding and treatment through cutting-edge research.

Infectious Disease Clinic

2200 Children's Way, Doctor's Office Tower, 6th Floor
Nashville, TN 37232
(615) 322-2250

The clinic serves children who suffer from diseases such as HIV or tuberculosis. Except in rare cases, the clinic sees patients by referral only. Urgent visits are also available by contacting the Division. The clinic's goal is to provide prompt consultative service for urgent visits.

International Adoption Clinic

2200 Children's Way, Doctor's Office Tower, 9th Floor
Nashville, TN 37232
(615) 936-6800

The clinic provides consultation services for families and practitioners involved in adopting foreign-born children. Pre-adoption services include counseling, review of medical records, videos, travel information and vaccines. Post-adoption services include arranging subspecialty consults and serving as a resource for adoptees' primary care physicians.

Junior League Family Resource Center

2200 Children's Way, Suite 2125
Nashville, TN 37232
(615) 936-2558 • (800) 288-0391

The center offers health information and support to children, teens and their families. It helps families learn more about their child's condition and other concerns. The center also provides information on community services and links families to local and national support and advocacy groups. The Flying Pig library in the center has health education books, DVDs and videos for children and teens.

Junior League Fetal Center at Vanderbilt

2200 Children's Way, Doctor's Office Tower, 7th Floor
Nashville, TN 37232
(615) 343-4673 • (877) FETUSTN (338-8786)

Vanderbilt is at the forefront of fetal research and surgery. It is one of a small group of medical centers in the U.S. performing in utero surgery for spina bifida. This center specializes in comprehensive fetal diagnosis and therapy. It has incorporated a clinical program in fetal diagnosis and therapy as well as clinical and basic research programs. Consultations by appropriate specialists are coordinated at a single site with maternal fetal medicine, pediatric surgery, neonatology, pediatric neurosurgery, pediatric cardiology, pediatric urology, genetics and diagnostic imaging.

Kidney Transplant

2200 Children's Way, Doctor's Office Tower, 6th Floor
Nashville, TN 37232
(615) 322-7416

The program is one of the oldest and most respected programs of its kind in the Southeast. The transplant team includes pediatric nephrologists, kidney transplant surgeons, anesthesiologists, transplant coordinators and pediatric nurses dedicated to delivering high quality care for their pediatric patients.

Liver Transplant

2200 Children's Way, Doctor's Office Tower, 9th Floor
Nashville, TN 37232
(615) 322-7449

The Liver Transplant team strives to offer the highest-quality care in pediatric solid organ transplants. The team includes pediatric liver transplant surgeons, hepatologists, anesthesiologists, intensivists, transplant coordinators and pediatric nurses.

Lung Center

2200 Children's Way, Doctor's Office Tower, 5th Floor
Nashville, TN 37232
(615) 343-7617

The center's experts diagnose and manage acute and chronic lung problems in infants, children and teens. It is also the home of the Cystic Fibrosis Diagnosis and Treatment Center, Asthma Diagnosis and Treatment Center, Bronchopulmonary Dysplasia Treatment Center, Pediatric Sleep Disorders Program, Flexible Bronchoscopy Service and special services for technology-dependent children.

Neonatal Intensive Care Unit (NICU)

(615) 322-0963

The NICU provides intensive care, consultation and neonatal transport services for critically ill infants in Tennessee and beyond. The 78-bed NICU at Children's Hospital admits nearly 1,300 critically ill newborns each year. Almost half of them are transported from other hospitals in Tennessee or surrounding states. Vanderbilt Neonatology was ranked 11th in the nation by U.S. News and World Report in 2010. The NICU has 62 single patient rooms equipped with the latest technology and staffed by pediatric healthcare professionals trained to treat the most complex problems facing newborn infants. The 16-bed open bay Stahlman NICU is immediately next to Labor and Delivery, and keeps babies close to their mothers when possible.

Nephrology Service

2200 Children's Way, Doctor's Office Tower, 6th Floor
Nashville, TN 37232

(615) 322-7416

The service is a regional subspecialty practice that evaluates and treats children with congenital or acquired diseases of the kidney and all types of hypertension. The clinic includes a wide range of services ranging from early diagnosis of kidney problems to therapy and treatment of end-stage renal diseases. Dialysis and kidney transplantation are also provided.

Neurology Clinics

2200 Children's Way, Doctor's Office Tower, 9th Floor
Nashville, TN 37232

(615) 936-5536

The neurology faculty work with patients and families who are dealing with illnesses, disorders and conditions that involve the nervous system (brain, spinal cord, nerves and muscles).

Neuromuscular Clinic

2221 Pierce Ave., B-1053
Nashville, TN 37232

(615) 322-7246

The clinic, sponsored by the Muscular Dystrophy Association, offers an interdisciplinary team approach to initial diagnosis and follow-up care. Children and adults with neuromuscular disorders included in MDA's program have access to a clinic staffed by neuromuscular disease specialists.

Neurosurgery

2200 Children's Way, Doctor's Office Tower, 9th Floor
Nashville, TN 37232

(615) 322-6875

The Neurosurgical Service treats patients with the following neurosurgical conditions: brain tumors, congenital malformations of the brain and spinal cord, epilepsy, head trauma, hydrocephalus, myelodysplasia (Spina Bifida), spasticity, cerebral palsy and vascular malformations including AVMs, aneurysms, Vein of Galen, cavernous malformations and moyamoya syndrome.

Ophthalmology

(see Tennessee Lions Eye Center)

(615) 936-1034

Orthopaedics

2200 Children's Way, Doctor's Office Tower, 4th Floor
Nashville, TN 37232

(615) 343-5875

The Orthopaedic Service team diagnoses and treats musculoskeletal diseases of children, including simple and complex fractures, pediatric and adolescent sports injuries, spine deformities, scoliosis, congenital bone deformities, hip disorders, congenital foot disorders and osteomyelitis.

Otolaryngology

2200 Children's Way, Doctor's Office Tower, 7th Floor
Nashville, TN 37232

(615) 936-8176

The Otolaryngology Service sees a wide range of ear, nose, throat and neck conditions. Examples include ear infections, tonsil and adenoid disorders, nose/sinus conditions, tumors, infections, airway/swallowing/voice disorders, congenital malformations (such as microtia/atresia and cleft palate), vascular malformations, neck masses and hearing loss/deafness. Patients are seen in conjunction with audiologists and speech pathologists.

Pain Service

2200 Children's Way, Doctor's Office Tower, 3rd Floor
(615) 936-1840

A specialized team of pain doctors and nurses in the pediatric anesthesia division can help surgeons or primary care doctors treat children's pain. This service works with children both at home and in the hospital and is available through consultation.

Palliative Care

(615) 936-1762

The service manages symptoms in children with life-limiting and life threatening illness. The team focuses on enhancing the quality of life and relieving suffering for the child, family members and other significant people in the child's life. This can include managing pain, fatigue, shortness of breath, insomnia, agitation, nausea and constipation, among other symptoms.

Pediatric Blood and Bone Marrow Transplant Program

2200 Children's Way, Doctor's Office Tower, 6th Floor
Nashville, TN 37232

(615) 936-6989

The program is a partnership of Children's Hospital and the VICC. The program offers a full range of blood stem cell and bone marrow transplants including autologous transplants, related allogeneic transplants, unrelated transplants, umbilical cord transplants and reduced intensity transplants. The team consists of experienced physicians, nurses, social workers, pharmacists, physical therapists, psychologists and child life specialists.

Pediatric and Neonatal Transport Services: Critical Care and Back Transport

(800) 288-8111

The program provides critical care and back transport services to infants from birth to 30 days of age. A neonatal specialty team provides transport via neonatal-specialty ground ambulances, helicopters or fixed-wing aircraft from hospitals in Tennessee, Kentucky and Alabama. Equipment and supplies are available to assess and treat critically ill and recovering newborn infants during transport to and from the hospital.

Plastic Surgery Clinic

3701 The Vanderbilt Clinic, 1301 22nd Ave. S.
Nashville, TN 37232-3631

(615) 322-2350

The clinic diagnoses and treats cosmetic and reconstructive problems in children and adolescents who need care to alter their appearance.

Primary Care Clinic

2200 Children's Way, Doctor's Office Tower, 8th Floor
Nashville, TN 37232

(615) 936-2555

The clinic is staffed by residents and provides sick and well care to children from birth through adolescence. The clinic serves as a medical home for the patients in the practice. They intend to be the first and only place patients and families seek routine health care. Families have the option to choose a resident physician or nurse practitioner as their regular care provider. All staff work under the direction of attending physicians.

REACH for Survivorship Program (Cancer Survivorship Clinic)

Village at Vanderbilt, Suite 2500
1500 21st Ave. S.

Nashville, TN 37232

(615) 343-7400 • (877) 936-8422

This joint program of VICC, Children's Hospital and the Department of Pediatrics is Middle Tennessee's first dedicated Cancer Survivorship Clinic. It provides services for all survivors, regardless of age at diagnosis, type of cancer, or where they received their treatment. REACH stands for (research, education, advocacy, clinical care and health). The program is a community resource for pediatric and adult cancer survivors and a bridge between the care of a cancer specialist and their primary care doctor.

Rehabilitation Services

Vanderbilt Health One Hundred Oaks
719 Thompson Lane, Suite 21000
Nashville, TN 37204
(615) 343-6445

The Department of Rehabilitation Services offers occupational therapy, physical therapy and speech therapy to patients who have impairments, functional limitations, disabilities or changes in physical function and health status because of injury, disease or other causes. The team provides therapy for children with athletic injuries.

Rheumatology Clinic

2200 Children's Way, Doctor's Office Tower, 6th Floor
Nashville, TN 37232
(615) 322-4397

The Clinic provides outpatient consultation and subspecialty care for children and teens with rheumatologic and inflammatory diseases.

Sickle Cell Anemia and Hemoglobinopathy Program

2200 Children's Way, Doctor's Office Tower, 6th Floor
Nashville, TN 37232
(615) 936-1762

The program treats patients with all forms of sickle cell disease, thalassemias and other hemoglobinopathies. It consists of medical treatment and a strong health maintenance program, with an emphasis on patient education. The team works closely with other disciplines including pulmonary medicine, cardiology, ophthalmology and neurosurgery. Infant/toddler, school age and transition clinics are also offered.

Sleep Disorders Program

2200 Children's Way, Doctor's Office Tower, 5th Floor
Nashville, TN 37232
(615) 343-7617

The Division of Pediatric Pulmonary Medicine developed this program in partnership with the Department of Neurology and the Department of Internal Medicine. The clinic evaluates pediatric patients with possible obstructive sleep apnea, altered sleep patterns and difficulty falling asleep and staying asleep.

Spina Bifida Program

2200 Children's Way, Doctor's Office Tower, 6th Floor
Nashville, TN 37232
(615) 936-2457 or (800) 526-4299

Spina Bifida is one of the most complicated and prevalent of congenital conditions. This program serves the diverse medical needs of people with Spina Bifida.

Stem Cell Transplant

2200 Children's Way, Doctor's Office Tower, 6th floor
Nashville, TN 37232
(615) 936-6089

The program serves children with malignant and non-malignant disorders including metabolic disorders, hematologic disorders (sickle cell disease and thalassemia) and immune deficiencies. There are active protocols using marrow, peripheral blood stem cells and cord blood transplants. The program participates in the National Marrow Donor Program and the Pediatric Blood & Marrow Transplant Consortium.

Tennessee Lions Eye Center

2311 Pierce Ave.
Nashville, TN 37232
(615) 936-1034

The center offers eye care for children from birth through 18 years. Inpatient consults are available by referral from specialists in the Children's Hospital. Outpatient services include vision evaluation for newborns with a family history of eye disease, evaluation of surgical and non-surgical treatment for eye muscle disorders and double vision, orthoptic evaluation and treatment, pediatric contact lens fitting and annual and preschool eye exams.

Trauma Program

2200 Children's Way, Nashville, TN 37232
(615) 936-1050

This program serves pediatric trauma victims of all ages. Timely access to specialized care is often a matter of life and death in trauma situations, particularly when they involve children. Teams of experts in pediatric trauma care, including pediatric surgeons, emergency medicine physicians, intensivists, nurses and child and family life specialists mobilize rapidly when they learn a child victim of trauma is on the way to the emergency department. In most cases, the team is in place and waiting in the trauma bay prior to the child's arrival and is able to relay instructions to the emergency response team or to the referring physician.

University Pediatrics: General Pediatrics

Vanderbilt Health One Hundred Oaks
719 Thompson Lane, Suite 24500
Nashville, TN 37204
(615) 936-3939

University Pediatrics is a primary care pediatric practice with four physicians, serving children from birth through adolescence. The practice population is made up of children of Vanderbilt faculty and staff, as well as families from the local community.

Urology

2200 Children's Way, Doctor's Office Tower, 4th Floor
Nashville, TN 37232
(615) 936-1060

Pediatric urologists care for children with any problems associated with the urinary tract and/or genitalia. They manage problems ranging from complex genital and urinary tract disorders to socially debilitating voiding abnormalities.

Vanderbilt Children's Health Improvement and Prevention (VCHIP)

3401 West End Ave., Suite 460W
Nashville, TN 37203
(615) 936-5317

The VCHIP program focuses on children's health through community partnerships. Its goal is to help children develop into healthy and productive adults, and to create programs with measurable results to show that behaviors can be changed for the better. Teams of physicians, nurses, epidemiologists, nonprofits, business leaders, statisticians and community volunteers meet regularly to help identify needs that can be addressed most effectively within three primary advocacy and outreach areas: Healthy Children, Safe Children and Strong Families.

Weight Management Clinic

2200 Children's Way, Doctor's Office Tower, 8th Floor
Nashville, TN 37232
(615) 936-5326 or (866) 577-5326

The clinic evaluates and treats childhood obesity. The vast majority of children became obese because of unhealthy lifestyles and behavioral choices. The treatment approach involves lifestyle changes, since there is no approved medical therapy for treating obesity in children.
